ETB canopies offer spacious storage when mounted onto the tray, fitting all vehicle models from 500mm to 2400mm. Their enclosed, customisable interiors ensure secure and durable storage. Designed for Aussie tradies and outdoor enthusiasts, ETB canopies protect your tools and gear effectively.

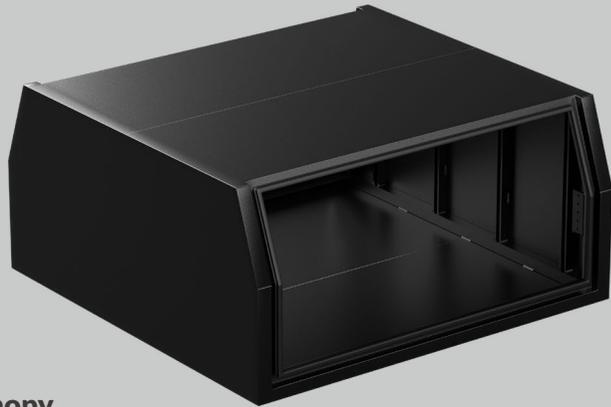

ETB REINFORCEMENT

With years of installation experience, we know the top corner welds of canopies are prone to compression and impact, leading to breakage. To prevent this, we've added four support tubes at each corner, a feature standard in all our canopies. This enhanced features ensures added strength, even in our basic models.

ALUMINIUM TRAYS

The tray is the most crucial part of vehicle modification, providing a solid base for canopies and toolboxes with more customisable space than traditional tubs.

Our new tray fits all mid-size dual cab utes, offering both lightweight and sturdy options in 1.8m and 1.6m sizes to work in harsh weather and demanding work environments.

- 2x Flare Mudguards
- 2x LED Tail Lights & License Plate Lights

Chassis Mount Canopy

ETB Service Body—known as a chassis mount canopy—is an integrated storage solution that securely attaches directly to a ute's chassis. Unlike traditional tray and canopy setups, this lightweight design features a built-in base tray for a seamless, unified appearance.

Engineered for durability and practicality, it includes an elevated false floor and rail system for customisable internal layouts to suit various storage needs. This versatile configuration maximises organisation and ensures rugged reliability, making it the ideal choice for optimising utility vehicle space.
