Conceptual design renders for Type-X™ Pro Plus. Inspired by the existing Type-X™ Pro series, this modern form is designed to modernise an iconic driving light legacy. Concepts v2.0

INFINITE POSSIBILITIES, UNSTOPPABLE POWER.

We are excited to introduce the Type-X™ PRO PLUS—a bold evolution in the world of driving lights, engineered to set a new benchmark for performance, innovation, and versatility. Designed to deliver exceptional visibility across all terrains and conditions, the Type-X™ PRO PLUS represents the perfect harmony of cutting-edge technology and precision engineering. This advanced lighting solution is crafted to meet the demands of both off-road enthusiasts and everyday drivers who refuse to compromise on quality or style.

The Type-X™ PRO PLUS is more than just a driving light; it's a statement of individuality. With unparalleled levels of customisation—featuring an array of interchangeable

bezels, fascia, and covers to suit your style—the Type-X™ PRO PLUS caters to every taste, whether it be Rugged, Modern, Modern Rugged, Modern Classic, or Caged.

Type-X™ PRO PLUS (pair) will throw light at 1 LUX over 1.5km down the road with precision, with 12 dedicated flood reflectors illuminating the critical zones of the road, resulting in an incredibly smooth driving beam. Rendering a beautiful 5000K colour temperature, you'll experience the ideal balance between clarity and definition, allowing your eyes to process details like obstacles and terrain with ease.

YOUR LIGHT, YOUR WAY.

The Type-X PRO PLUS driving light series is designed with ultimate flexibility in mind, allowing you to customise every aspect to create a light that perfectly matches your style and needs. With a modular design, building your ideal setup is simple and intuitive; choose, customise, and create.

01 Base Light

Every setup begins with the base model light, available in DRL or non-DRL variants. This forms the foundation of your light, with the core features and extraordinary performance you've come to expect from the Type-X™ PRO PLUS range.

02 Bezel

Next, choose a bezel style that matches your desired look, with three distinct options; the Rugged bezel, inspired by the timeless design of our classics; the Modern bezel, offering sleek and refined styling for contemporary vehicles; or the Caged bezel, crafted for a tough, military-grade aesthetic.

03 Fascia

Once your bezel is selected, you can pair it with a compatible fascia, available in up to 9 colours, to add a unique touch or blend seamlessly with your vehicle design. Each fascia is carefully crafted to complement your chosen bezel.

04 Cover/Trim

Enhance both style and protection by electing a STEDI™ Cover designed to match your configuration, with options available for DRL and non-DRL variants. Complete your custom build with optional shoulder trims, adding a final layer of personalisation to refine the overall look of your lights.

RANGE BREAKDOWN

Front View (DRL Option)

Please Note: Above imagery is ONLY shown for design and reference purposes.

RUGGED.

The Rugged option in the Type-X™ PRO PLUS range pays homage to the classic Type-X™ PRO series, retaining its bold and dependable aesthetic. This style blends the timeless design of the original with the cutting-edge features of the PRO PLUS, making it a perfect choice for those who value tradition without sacrificing innovation.

Key components of the Rugged style include the rugged bezel, rugged fascia (available in up to 9 colourways), and rugged covers in both DRL and non-DRL variants. Optional shoulder trim accents provide further customisation, ensuring your driving lights deliver not only durability but also a tailored aesthetic to match your vehicle's style.

While the Rugged option is inspired by the past, its performance is firmly rooted in the present. Every feature of this combination has been thoughtfully engineered to provide unparalleled performance on and off the road. With the Rugged configuration, form meets function to deliver a driving light that isn't just visually powerful but also capable of withstanding the rigours of the most challenging terrains and conditions. Whether you're traversing muddy trails, rocky outcrops, or simply need dependable lighting for nightly drives, the Rugged option ensures you're covered with style and substance.

CAGED.

The Caged option in the Type-X™ PRO PLUS series is inspired by the rugged, no-nonsense design of military-spec vehicles. With its tough and durable aesthetic, this configuration embodies strength and resilience while ensuring no compromises on performance. Built to stand out and withstand the harshest conditions, the Caged option is ideal for those who demand both utility and bold design from their driving lights.

At the heart of the Caged option is the powder-coated cast alloy caged bezel, a feature that not only reinforces durability but also adds a distinct industrial flair. Complementing the robust bezel is a selection of shoulder trims, offering the flexibility to personalise your lights

while maintaining the rugged, military-inspired aesthetic. This combination delivers a striking look paired with exceptional functionality.

Available in both DRL and non-DRL variants, the Caged option delivers durability and performance you can count on. Built to handle extreme conditions, this configuration ensures optimal lighting in any situation, no matter the challenge.

MODERN.

The Modern option in the Type-X™ PRO PLUS range is a sleek and refined take on contemporary driving light design. Inspired by the elegant curves and accents of modern vehicles, this configuration brings a sophisticated aesthetic to your lighting setup while maintaining the exceptional performance the Type-X™ series is known for. Perfect for those seeking a seamless blend of cutting-edge style and functionality, the Modern option commands attention on and off the road.

This stylish option includes the modern bezel, paired with an extensive range of modern covers and modern fascias, all available in 9 vibrant colourways. Additionally, a selection of shoulder trims allows for unparalleled

personalisation, making it easy to complement the sleek design of newer model vehicles. Every element of this configuration has been refined to deliver a unified and polished look without compromising durability.

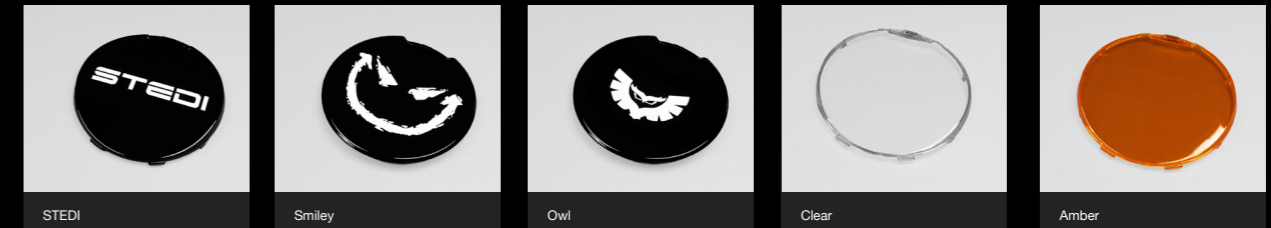

Available in both DRL and non-DRL variants, the Modern option is designed to not only look stunning but also provide superior lighting performance. Whether you're navigating city streets or rugged trails, the Modern configuration delivers reliable performance and cutting-edge style, making it a perfect match for today's driver.

MODERN RUGGED.

The Modern Rugged option in the Type-X™ PRO PLUS series strikes the perfect balance between timeless design and contemporary innovation. Combining elements of our classic driving lights with the sleek curves and accents of modern styling, this configuration offers a versatile aesthetic that's tough yet refined. Designed to appeal to both fans of the original and those seeking next-generation sophistication, the Modern Rugged option is a true blend of past and future.

This hybrid design is composed of the modern rugged bezel, paired with modern rugged covers and a selection of modern rugged fascia, available in 9 distinct colourways. Additionally, the option to add a variety of shoulder trims

ensures endless customisation possibilities, letting you achieve a look that is bold, functional, and perfectly tailored to your preferences. These carefully selected components make the Modern Rugged configuration as versatile as it is stylish.

Available in both DRL and non-DRL variants, the Modern Rugged option offers the ultimate combination of durability, performance, and style. Whether you're tackling demanding off-road adventures or enhancing your vehicle's everyday look, this configuration brings together cutting-edge lighting performance and a unique aesthetic designed to stand out while delivering reliable results.

MODERN CLASSIC.

The Modern Classic option in the Type-X™ PRO PLUS range represents the pinnacle of sleek, minimalist design. Taking the refined aesthetic of the Modern option to the next level, this configuration introduces a more sophisticated cover for an elevated, streamlined appearance. Crafted with a focus on clean lines and timeless elegance, the Modern Classic option embodies the styling of the modern age where minimalism reigns supreme.

This option includes the modern bezel, paired with a meticulously refined cover that enhances the sleek profile of this configuration. The array of modern fascias, available in 9 stunning colourways, along with a variety of

shoulder trims, allows for personalisation without losing the simplicity and elegance of this design. Every detail has been curated to deliver an understated and polished aesthetic without sacrificing the durability Type-X™ lights are renowned for.

The Modern Classic option offers a sophisticated style that doesn't compromise on performance. Whether navigating urban environments or more rugged landscapes, this elegant frame delivers reliable lighting power with an unmatched minimalistic aesthetic. The Modern Classic configuration is the perfect choice for those who appreciate refined design paired with outstanding functionality.
