LC79 CAB RACK

DESIGNED TO SUIT THE 79 SERIES LANDCRUISER

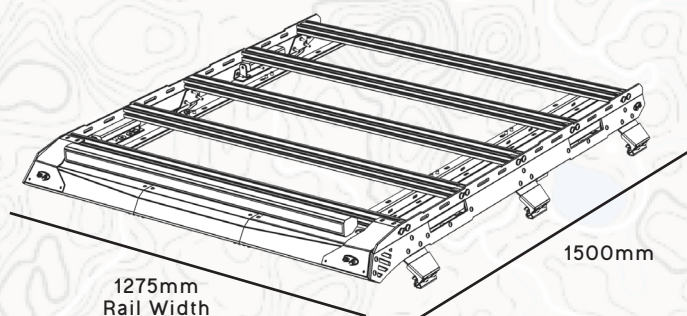

MODULAR RACK SYSTEM

OPTIONAL LIGHTING

DIMENSIONS

1275mm
Rail Width

1500mm

Built for real touring and work use, the Boss Aluminium LC79 Cab Rack is a purpose built, modular cab rack system engineered specifically for LandCruiser 79 fitment.

Designed and manufactured 100% in-house from marine grade alloy, this rack delivers high strength, low weight, and long-term corrosion resistance.

The rack features 5mm thick side plates and heavy duty T-nut extrusion cross rails for excellent load handling and easy accessory mounting. Every component is precision laser cut, folded, treated, and finished in a durable powder coat, with stainless steel fasteners used throughout for long-term reliability.

Developed using advanced 3D vehicle scanning and CAD modelling, the Boss LC79 Cab Rack is built to fit cleanly, perform under load, and support an evolving setup. The modular design allows you to add, move, or upgrade accessories over time to suit your touring or work requirements.

Stedi 7.8" Micro Touch Dual Colour side lighting is included as standard with the rack in a neat, plug and play fitment, while the front mount is compatible with a wide range of light bar brands and styles.
