WEDGETAIL ROOF RACKS embody all the qualities of the mightiest of all Australian birds, The Wedgetail Eagle,

Power, Strength, and Aerodynamics.

The Wedgetail manufacturing plant is based in Melbourne, Australia, and brings with it 48 years of roof rack design and manufacturing know-how. Renowned for making rugged and reliable custom roof racks for trade, commercial, and recreational applications. Designed and manufactured in Australia since 1978.

The Wedgetail mission is to create Strong, Fit for Purpose, Quiet roof racks.

Each Wedgetail Roof Rack is individualised to suit your vehicle, tool storage, load-carrying, and environment. When you require a roof rack for commercial or recreational use or both, you can be rest assured that when you choose a 'WEDGETAIL ROOF RACK', 'you are selecting a versatile product that will meet the challenges of its design.

Est: 1978 - Australia

Wedgetail is the peak of platform innovation, inspired by Australia's mighty Wedgetail Eagle. Crafted through 45 years of expertise, Wedgetail Roof Racks define Strength, Form and Function. No matter what corner of our great country you plan to visit, a Wedgetail rack will get you and your gear there and back home, allowing for easy use and a quiet trip.

Engineered for

- Adventurers
- Surfers
- Tourers
- Motorhomes
- Dual-purpose Trade and Recreational vehicles
- Hard-core offroad

Available for

- Extensive range of 4WD, Utes and wagons, including older models
- Large vans used in motor home conversions
- Range of aftermarket Ute canopies

QUICK REMOVAL

Sometimes, you need to remove your platform to clean your roof or enter a low car park in the city. A wedgetail platform, designed for easy, quick removal that does not break the watertight seal on the roof, will make this task much easier.

QUIET

Every wedgetail platform needing a wind deflector has one in the kit. A quiet trip and maximised fuel efficiency are essential to an enjoyable journey!

HEAVY DUTY CROSSBARS

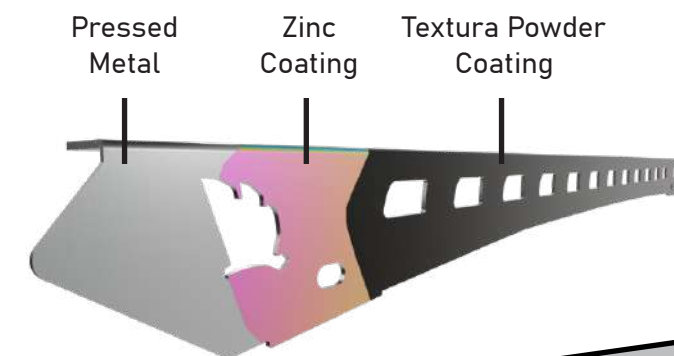

East/West heavy-duty crossbars, with top & bottom accessory mounting options. Allowing you to easily add accessories from our range or bring the accessories you may have previously purchased from other brands.

SUPERIOR OFFROAD RATINGS

Wedgetail roof racks are rated to carry 100% of their carrying capacity on and off the road. Forty-five years of experience making roof racks for Australian Conditions have taught us how to construct a platform to endure Australian Conditions.

SURFACE COATING

Wedgetail Core delivers dependable strength and performance in a streamlined roof rack system, designed for customers who want proven Wedgetail engineering at a more accessible price. Built on the same trusted foundation as our premium platforms, Core focuses on practical functionality, load-carrying capability, and everyday reliability. Finished in a durable Matte Black Textura powder coat, it offers a clean, understated look that suits a wide range of vehicles while standing up to regular use.

Engineered for

- Weekend recreational users
- Everyday drivers
- Practical tradies and explorers

Available for

- Selected passenger vehicles and SUVs
- Light commercial vehicles

ROOF RACKS THAT WORK

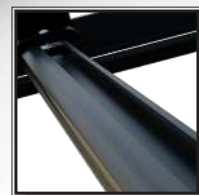

LOADING

full-width 50mm 316-stainless Steel Loading Roller to assist in rolling items onto the rack from the rear

TECHNICIAN ADAPTER KIT

Full range of buffers and ladder securement straps and locks

ACCESSORY MOUNTING

East-west top and bottom heavy-duty mounting channels

LOAD PROTECTION

Protect ladders and loads with integrated nylon buffers and rubber crossbar inserts

QUIET

Every wedgetail trade roof rack needing a wind deflector has one in the kit. A quiet trip and maximised fuel efficiency are essential to an enjoyable workday!

WEDGETAIL *TRADE FLAT DECK*

Maximise practicality and load space with the Wedgetail Trade Flat Deck, a low-profile aluminium platform designed for efficient, quiet performance — delivering a strong, open solution for carrying oversized materials and trade equipment.

Engineered for

- Tradespeople
- Fleet and service operators
- Electric vehicle users

Available for

- Selected vans and electric vans
- Light commercial vehicles

LOW PROFILE

Streamlined design reduces overall vehicle height and wind resistance, ideal for urban driving and height-restricted environments.

DURABILITY

Constructed from heavy-duty aluminium with a tough powder-coated finish for long-term performance in demanding conditions

OPEN PLATFORM

Flat Deck layout provides maximum usable space for oversized materials, ladders, and trade equipment.

LOADING

Full-width stainless steel rear roller allows for safer, easier loading and unloading from the rear.

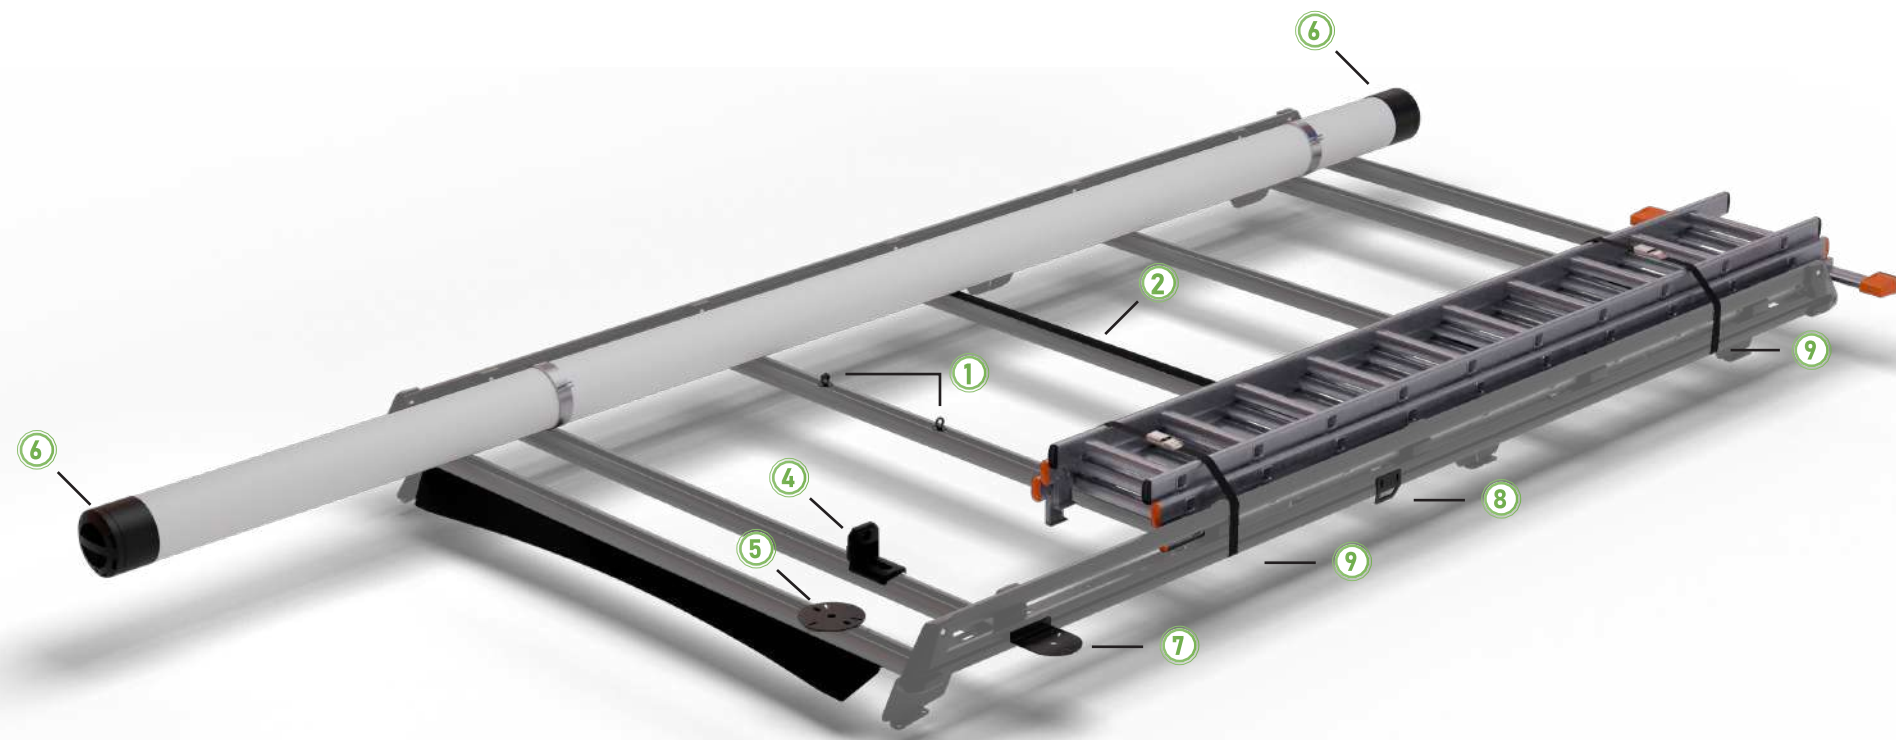

ROOF RACKS THAT WORK

WEDGETAIL TRADE ACCESSORIES

Wedgetail Trade roof racks are compatible with a full range of bolt-on accessories, allowing you to mount almost anything, from ladders to flashing beacons, quickly and safely. If you already have accessories, many accessories from other brands will fit the Wedgetail Trade platform.

COMMERCIAL-MAX

For over four decades, the entirely fabricated and welded 'Commercial-Max' roof racks have set the standard of strength in Australia, offering individually designed mounting systems and custom platform dimensions tailored to specific vehicle makes and models.

Engineered for

- Tradespeople. especially those carrying bulky and heavier materials

Available for

- Most Vans, new and old
- Older 4wd vehicles
- UTE Canopies

QUIET

Every commercial-max roof rack needing a wind deflector has one in the kit. A quiet trip and maximised fuel efficiency are essential to an enjoyable workday!

STRENGTH

Advanced welding processes combined with Australian materials to deliver a solid final result

LOW CLEARANCE

Manufactured with the lowest possible roof clearance to allow access to more underground car parks

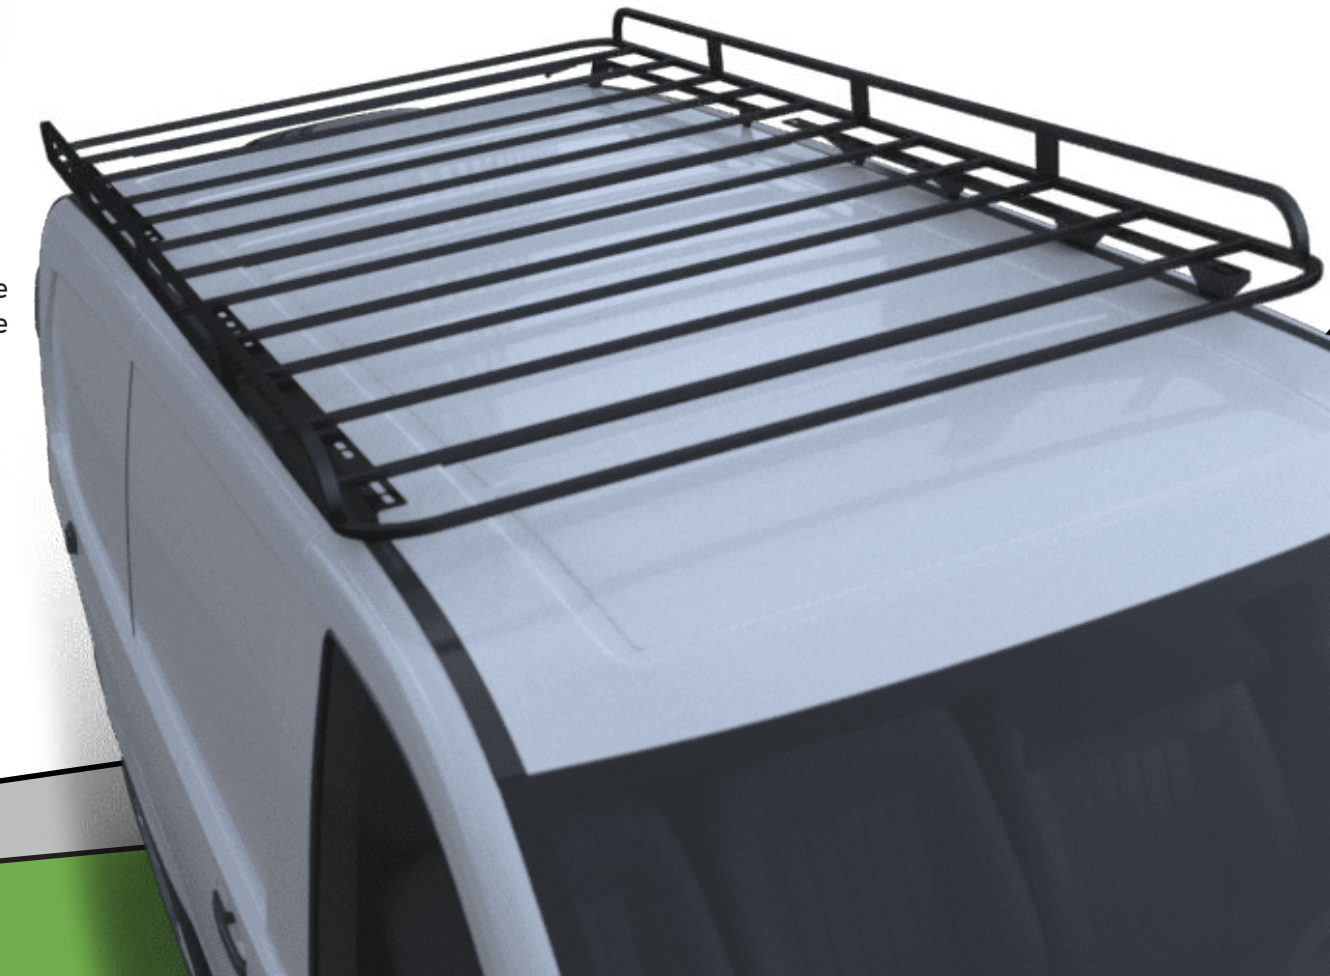

CUSTOMISABLE

We can customise the Commercial Max platform to suit your own specific needs.

FINISH

Manufactured from 22mm square galvanised tube, paired with our zinc plated and powder coated mounting systems to maximise rust resistance

TRADE-MAX

The Trade-Max series offers alloy roof bars engineered for a diverse array of vehicle applications. Designed to navigate low-clearance car parks with ease; these systems include the aerodynamically efficient Wedgetail extrusions for strength and unmatched durability and performance.

Engineered for

- Tradespeople.
- Recreational users

Available for

- A wide range of vans
- Utes and wagons

ADJUSTABLE BAR POSITIONS

The bars can be relocated along the length of the mounting kit to a desired mounting position and still remain level.

STRENGTH

Being braced together makes the crossbars much stronger when carrying a load.

ACCESSORY MOUNTING

Top and bottom heavy-duty channels to allow for easy accessory mounting

LOAD PROTECTION

Each Trademax crossbar comes complete with rubber inserts.

TECHNICIAN

The Technician ladder rack has long been a go-to for Tradespeople carrying ladders. It allows for fast and safe loading and unloading of ladders. Whilst the Wedgetail Trade platform has recently become more popular for technicians due to its versatility, the technician kit is still a go-to for many Tradespeople.

Engineered for

- Tradespeople carrying ladders

Available for

- Any vehicle that has a Trademax fitment

LOADING

full-width 50mm 316-stainless Steel Loading Roller to assist in rolling tapered ladders onto the rack from the rear

INTEGRATED ROLLER MOUNTS

Protect ladders and loads with integrated nylon buffers and rubber crossbar inserts

LOAD PROTECTION

Protect ladders and loads with integrated nylon buffers and rubber crossbar inserts

ACCESSORY MOUNTING

Top and bottom heavy-duty channels to allow for easy accessory mounting

OVAL SERIES

The OVAL series is the pinnacle of refinement and innovation, offering a premium choice for 4x4s, SUVs, and trade vehicles. Custom fabricated from aerodynamic oval ERW tubing with welded joints, these roof racks combine robust strength, reduced wind resistance, and a sleek appearance. Built in Australia for enduring performance in demanding environments.

Available in various configurations, including closed ends, basket, open ends, and options for tents with three sides closed or flat decks, the OVAL series roof racks cater to diverse needs and preferences.

Engineered for

- Adventurers who prefer a fabricated roof rack
- Tradespeople

Available for

- Canopies
- Utes
- Wagons
- Some vans

CUSTOMISABLE

We offer tailored customisation options for the OVAL SERIES platform to meet your unique requirements.

CORROSION RESISTANT

Crafted from 31mm zinc electro plated oval tube, complemented by our zinc-plated and powder-coated mounting systems, ensuring optimal resistance to rust.

QUIET

Every Oval roof rack needing a wind deflector has one in the kit. A quiet trip and maximised fuel efficiency are essential to an enjoyable workday!

STRENGTH

Advanced welding process for superior finish & strength
