

HIGH PERFORMING DRIVING LIGHTS

VULKAN

THE DIFFERENCE IS NIGHT AND DAY

Introducing VULKAN. Designed to take on any road,
any trail, any time.

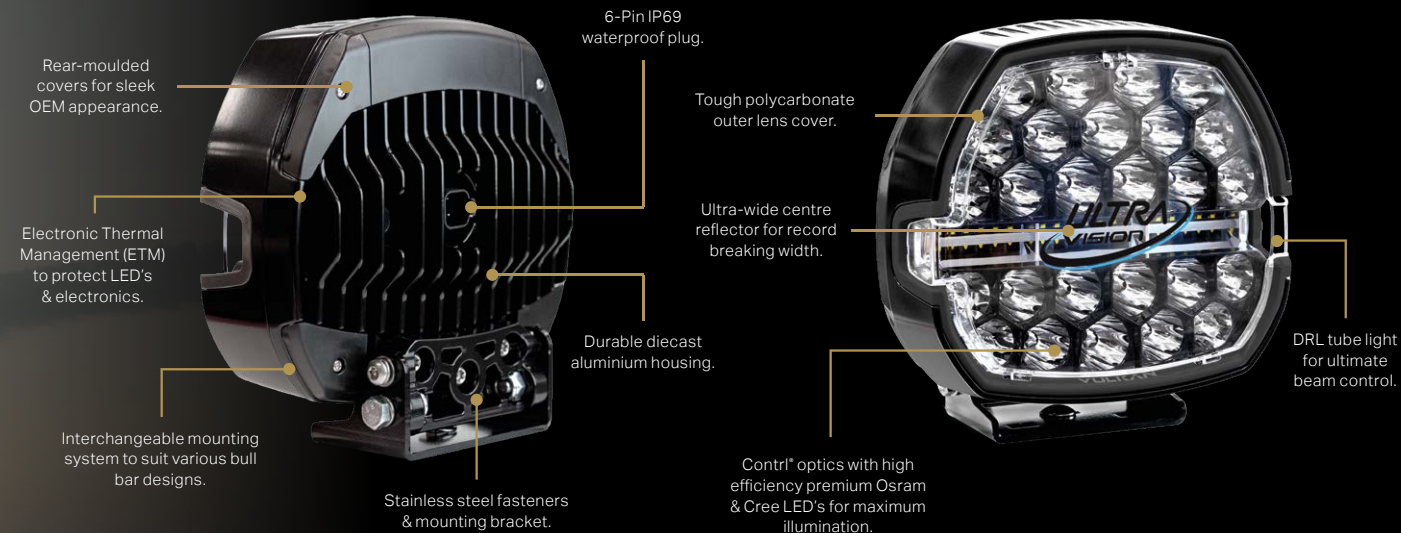

Our most advanced driving light yet, VULKAN delivers Ultra Vision power that adapts to your environment. Developed over four years and backed by more than two decades of experience and innovation, it brings the best of a driving light and light bar together in one design.

With an unmistakable look that allows for mounting either way up to give you the perfect fit, along with our class-leading optics, VULKAN really does turn night into day.

And now, you're in complete control. The adjustable dial offers nine precision settings, letting you fine-tune your beam for maximum width, maximum distance, or anything in between, so you'll be ready for any terrain.

PRODUCT FEATURES

OWN THE NIGHT

The VULKAN is built to perform in every condition and environment. Combining forward-thinking design with advanced technology, it delivers powerful lighting performance at every turn.

The design

The modern, angular look isn't just for show. It was intentionally designed to complement the sharp lines and contemporary styling found in today's latest bull bars and vehicle models — seamlessly fitting in while enhancing the overall aesthetic. The versatile shape allows the VULKAN to be mounted either way up, ensuring a fit that works to your vehicle and driving style.

The signature cut-out has been carefully designed to allow light to project from the sides of the housing, giving you maximum beam width where it matters most.

The tech

Backed by over 20 years of lighting expertise, the VULKAN's feature custom, in-house printed circuit boards to support advanced components. Our class-leading Contrl® optics are paired with next-gen Osram LED's to deliver class-leading performance.

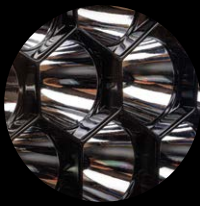

You get ultimate control thanks to an intuitive switch dial with nine selectable beam settings. It allows you to choose maximum width for those tight, turning roads and trails, or dial the spot beam distance all the way up for the open road. It's lighting power, tuned to you.

The performance

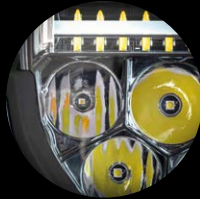

With all these innovations packed into one light, the VULKAN acts as a driving light and light bar all in one, turning night into day wherever you go:

- 44 OSRAM LEDs per lamp
- Beam distance of up to 1.7km @ 1 Lux
- Beam width of up to 235m
- Up to 10,600 effective lumens per pair
- Tough & durable die-cast alloy housing
- Hard coat PC outer lens
- IP69 waterproof rating

All this and lots more make the VULKAN your new go to driving light for when performance and control matter most.

DUAL MOUNTING

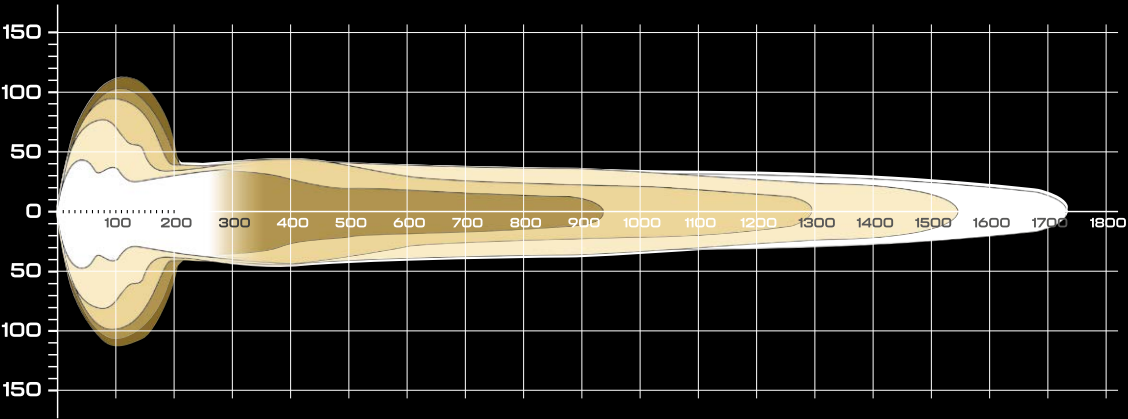

Driven by innovation and advanced engineering, VULKAN is the only driving light on the market to feature a dual-position mounting system. Its uniquely designed bracket allows you to mount the light in two different orientations, giving you the freedom to achieve the exact look you want, without compromising performance.

LIGHT SETTING SPECIFICATIONS

You'll be ready for any terrain, thanks to the adjustable dial with 30 different detents. Each one adjusts the beam pattern, putting the power in your hands. Whether you need maximum width, maximum distance, or anything in between, VULKAN gives you ultimate control.

Light Setting Effective	Wattage	Distance 1lux (m)	Width 1lux (m)	Lumens Raw	Lumens
1	95	220m	235m	12,352	6,422
2	112	675m	220m	13,320	7,265
3	128	930m	212m	14,288	8,110
4	144	1130m	202m	15,255	8,955
5	160	1300m	190m	16,225	9,800
6	175	1450m	180m	17,193	10,644
7	170	1550m	155m	15,975	10,185
8	164	1645m	126m	14,755	9,722
9	155	1735m	90m	13,535	9,265
