DESIGNED FROM EXPERIENCE

Experience from over 400,000kms of international overland travel means the Global Xplorer has a cabin to module access, significant internal and external storage, a low power to weight ratio, a great fuel economy and spectacular off-road ability.

"Twenty years from now you will be more disappointed by the things you didn't do than by the ones you did. So throw off the bowlines, sail away from the safe harbour and catch the trade winds in your sails. Dream. Explore. Discover." – Mark Twain

CLASS LEADING FEATURES

The Fuso is rated at 6500kg GVM, yet with the module, full of fuel and water you still have over 1 ton of carrying capacity. This class leading power to weight ratio means that long distance touring is easy, enjoyable, with an impressive low fuel consumption.

THE TRUCK ADVANTAGE

- Safe highway cruising position
- Dual air bags (driver and passenger)
- High/Low Transfer box
- Rear LSD Traction advantage
- Hill start assist
- Exhaust brake
- Impressive off-road
