ET930 Series

ET1110 Series

ET1150 Ultimate Series

REDUCED WHEEL SPIN

Patented Design Angle improves Tyre Grip

48°

Traditional Recovery Board Approach Angle

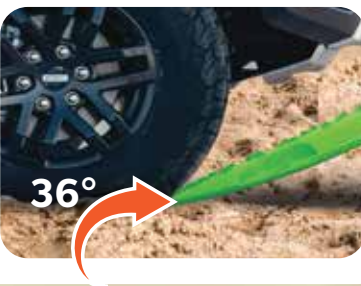

Traditional Recovery Boards create steep Angle for Wheel causing Wheel Spin and reduced Grip.

36°

EXITRAX® Recovery Board Approach Angle

The Angle required to Climb is reduced, which means less Power is needed, leading to less Wheel Spin.

REDUCED BOARD MOVEMENT

With strategically placed Ground Engagement Teeth.

ULTRA TOUGH CLEATS

Lock in the Tyre and provide increased Tyre Grip.

Handy Leashes Included

Making it easier to find and extract your Boards if buried
