

MAXXIS AT811

**Performance when it's wanted.
Safety when it's needed.**

Engineered using the know-how Maxxis has gained from years of research in the off-road and all-terrain tyre market, the **Maxxis RAZR AT811** is cutting edge in every way!

Blade shaped tread block design ensures **excellent off-road traction** and **water drainage in wet weather conditions.**

Aggressive 'side biter' lugs assist in providing **optimal traction in muddy conditions** and **protect the sidewall from cuts and punctures.**

Unique shoulder lug design **assists with traction in heavy off-road conditions** – especially when being driven at lower inflation pressures.

'Saw edge' shoulder blocks **enhance traction in harsh off-road conditions.**

A unique stone-ejecting shoulder groove **reduces the possibility of stones lodging between tread blocks and damaging the tyre casing.**

Dual-layer high tension cap ply ensures **excellent cornering ability on and off the road**, as well as **further improving puncture resistance.**

The high-strength polyester carcass construction **improves cornering ability** and **ensures optimal puncture resistance.**

A high elasticity lower sidewall filler compound results in **excellent ride comfort** – especially on unpaved roads.

The 3 ply sidewall construction provides further **puncture resistance in off-road conditions.**
