

Tyre Bead Locking System **SecondAir**

by Avanterra Group

Allows for extreme tyre deflation to enhance off-road traction and comfort.

Ensures secure locking of both tyre beads.

Manufactured in Australia

Compatible with all rim types

Features an invisible design

Does not affect wheel balance

Boasts durability, simplicity, and effectiveness for reliable performance

Lightweight

[SA1579]	suits 15" x 7-9" rims
[SA151012]	suits 15" x 10-12" rims
[SA1679]	suits 16" x 7-9" rims
[SA161012]	suits 16" x 10-12" rims
[SA16.579]	suits 16.5" x 7-9" rims
[SA16.51012]	suits 16.5" x 10-12" rims
[SA1779]	suits 17" x 7-9" rims
[SA171012]	suits 17" x 10-12" rims
[SA1879]	suits 18" x 7-9" rims

WHY SECONDAIR?

When off-roading in your 4-wheel drive, it's common to lower tyre pressures for two reasons:

Improving comfort and enhancing traction.

By reducing from 38 psi to 14 psi, you can increase tyre footprint by 37%, enabling you to traverse steep red clay tracks, conform the tyre around rocks, and achieve greater flotation over mud or sand.

However, pressures below 18 psi pose risks such as tyre rotation or debanding and deflation. SecondAir™ offers a solution: a pneumatic beadlock system fitted inside the tyre, securing both beads to the rim. This system provides separate air pressures and ensures the tyre stays in position even with zero air pressure.

SecondAir™ Beadlocks installed on a tyre with zero air pressure due to a puncture, prevents damage on both tyre and rim. Positioned 45-50mm above the wheel rim, the beadlock prevents contact between the rim and road surface, significantly enhancing vehicle safety, especially during high-speed blowouts. The secure hold of the tyre onto the rim by SecondAir™ Beadlocks also helps cushion impacts, preventing the rim from digging into the road. This aids drivers in maintaining control, reducing the risk of rollovers.

Join Countless satisfied customers who have experienced the peace of mind and unrivalled performance that SecondAir™ Beadlocks bring to their off-road adventures. Experience the freedom to explore, conquer, and push the limits of off-road driving like never before with SecondAir™.

Components

SecondAir™ Beanie:

This is a canvas casing that has an outside tread, side walls, and beads that can resemble a traditional tyre.

- ▶ Black rubber Inner Tubes
- ▶ French chalk and special valve

Warranty

SecondAir™ Beanies are guaranteed against defects in workmanship and materials for a period of 5 years from the date of original purchase by the original purchaser. The inner tube is guaranteed for a period of 1 year

For off-road use only. SecondAir Beadlocks may not be legal in all states. Avanterra Group Pty Ltd and its distributors are not liable SecondAir Beadlocks that have been incorrectly installed and/or misused in a manner for which they were not intended. Vehicles driven with low tyre pressures may result in unfamiliar and less predictable handling on or off road, so drive accordingly. Avanterra does not accept responsibility or liability for misdrilled rims and/or pinched or damaged inner tubes.
