ABOUT OUR CONSTRUCTION

Our caravans are built using a cutting-edge 28.2mm thick fibreglass sandwich panel composite shell. This superior construction features premium 1.6mm high-gloss Italian fibreglass skins bonded to a closed-cell XPS high-density foam core. The result? Exceptional structural strength, unmatched thermal and sound insulation, and a beautifully sleek exterior.

Unlike traditional construction that runs wiring through wall studs (weakening the structure and creating potential for shorts and inaccessible wiring), our vans utilise a sophisticated wiring loom system. Concealed within easily accessible channels behind cabinetry, this system ensures worry-free maintenance and repairs. CNC-cut walls, precise keyway construction, and seamless panels eliminate the need for joins or expansion joints, preventing water and dust intrusion – a common problem with traditional framed construction that requires sealant replacement every few years. Our 1.6mm thick, high-gloss fibreglass skins offer superior durability and easy maintenance compared to traditional thinner aluminium or veneer options.

Scratches and imperfections are easily repaired, and the high-gloss finish can be easily restored or preserved. Even significant damage is easily addressed with cost-effective panel replacements, unlike the exorbitant expense of replacing entire walls in traditional builds. The smooth interior surfaces are easy to clean, minimise condensation, and even allow for the use of convenient suction accessories – something impossible with traditional ply interiors. The superior light refraction of the composite panels also means fewer lights are needed, creating a brighter, more welcoming space.

ABOUT OUR CONSTRUCTION

The benefits extend beyond aesthetics and durability. Composite construction minimises expansion and contraction issues that plague traditional framed/veneered caravans, preventing sealant failures, water leaks, and a loss of structural rigidity. This robust design also reduces reliance on specialised caravan repairers, making automotive or marine technicians equally qualified to handle any repairs, a huge advantage in remote areas.

See the difference for yourself! We encourage you to compare our composite construction with traditional framed/veneer caravans using an infrared temperature gun or thermal imaging camera. You'll be amazed by the superior performance and insulation of our advanced construction methods.

CHASSIS

- Large Front Toolbox with Generator slide on DS and BBQ slide on PS. Reinforced to allow top mounted solutions like bike racks and wood carriers, outboard mounts and much more.
- Two Removable Jerry Can holders on front tool box
- Premium Stone shield with drop down mudflaps
- Black painted chassis, hot dip gal optional
- 17in Alloy wheels load rated to 1650kg
- Single Axle tyres 32inch (265/70R17 Offroad Tyres) Tandem axle 33inch (285/70R17)
- 6" A-Frame carried through to front of Suspension control arm mounts
- Extended A/frame to provide ample clearance between tow vehicle and stone shield at maximum articulation
- 12" Electric Brakes to All Wheels
- Break Away System
- Heavy Duty 3 Arm Bumper Curved with high mounted spare wheel fitted for maximum departure angle clearance
- 6" (150mm) Heavy Duty Chassis main rail with 2" (50mm riser)
- Full Offroad Suspension 3000kg ATM single axle, 3500kg ATM for Tandem axle, optional upgrade to 4500kg twin shocks absorbers per wheel
- Twin shocks absorbers per wheel
- DO35 Coupling on single axle 3000kg ATM and tandem axle 3500kg ATM
- DO45 when upgrading tandem axles to 4500kg ATM
- 8" long shaft Jockey Wheel for maximum height flexibility on uneven sites
- Spare Wheel Fitted to Bumper Bar Bolt On
- Double Aluminium Pullout Step Manual
- Sturdy Checker plate Water Tank Guard/s
- Heavy Duty Drop Down corner Stabiliser Legs – Premium Black finish

STANDARD ELECTRICAL

- Projectors powerhouse RV management system, the INTELLI-GRID-IG3-BT7
- 3000W inverter with grid power booster and AC transfer switch, easily capable of running appliances off grid including Air Conditioning.
- 180A charging which can compound with solar input to achieve exceptional recharging input AMPS
- Bluetooth 7" Colour monitor showing SOC, full control of the RV, its water, lighting and hardware. Phone app for both iPhone & Android mirrors the controls for the ultimate in control and convenience
- 30A DC-DC charging that compounds onto solar for maximum charge of grid whilst driving
- 80A MPPT solar charging additional MPPT's can be added with solar upgrades
- 880w of solar (4x 220w solar panels)
- Maximum solar upgrades- (18'8 up to 1540W) -(20'6 & 21'6 up to 1980W) May need additional MPPT's
- 600AMP lithium batteries (2x300A) provides reliable, off-grid power. Provision for more batteries
- GREE Whisper quiet rooftop reverse cycle Air Conditioning, Wi-Fi connectivity, Inverter technology for low start up current draw and minimal power consumption, ideal for off grid 12V/inverter operation. Powerful Cooling Capacity: 3600W, Heating Capacity: 3400W
- 224ltr 12V compressor fridge with freezer draw below fridge and no external fridge vents required for improved dust ingress prevention
- Recessed Twin induction cooktop
- Integrated 3 in one 34ltr Oven (Microwave, Grill and Convection Oven)
- 12V Rangehood
- Roof Skylight with Blind & Flyscreen and warm white LED halo night light
- 12V Fan Hatch to Shower
- 240V 15A Inlet/Breaker unit
- 240V 10A Single Outlet awning side
- 240V Double Power Points in Kitchen, 1in each Wardrobe, 1 Lounge, 1 Ensuite, 1 tunnel boot
- 12V Twin Outdoor sockets – 1x USB and 1x Cig
- Reversing Camera

/// STANDARD ELECTRICAL ///

STANDARD ELECTRICAL CONT

- Wireless programmable switch panels Projecta controls, preset for lighting Tunnel boot, Kitchen, Ensuite Under main bed overhead. Additional switch panels available and customer can program each of the 4 switch's on each panel for many applications that the Projecta system controls, example Dust reduction system, lighting, water pump, 12v accessories plus much more
- Large Tunnel Boot with a internal light on either side, Large additional tunnel boot with King bed layouts
- 6x White/Amber exterior lights (3x awning side, 1x rear, 1x front, 1 x drivers side)
- Anderson plug (blue) with cover drivers side for portable solar input
- 12 Pin Trailer Plug
- Diffused LED soft glow strip lighting recessed under overheads above main bed split at centre for individual side control, warm tone for bedtime
- 2x TV Wall Mounting Brackets 1x internal, 1x external (TV not provided standard as there are many different configurations from 24inch to 32inch to choose as an option)
- Premium Corner Aluminium LED channel with diffused continuous soft glow LED strip lighting above overheads
- Diffused LED continuous soft glow strip lighting recessed under overheads for superior bench top illumination or night time mood lighting
- Diffused LED continuous soft glow strip lighting at floor kick panel for subtle night time mood lighting and ease of movement around van at night
- Omnidirectional 12v Fans- 2 x living/main bed area plus 1x per bunk
- 12v USB-A & USB-C sockets at each bunk
- Each bunk includes Diffused LED soft glow strip lighting recessed individually controlled, warm tone for bedtime

*Disclaimer: All illustrations, information and specifications referred to in this brochure were correct at the time of distribution. However, Sunseeker Caravans reserves the right to discontinue or change the models, features, specifications or designs of the RV's referred to herein, at their discretion and without prior notice.

STANDARD EXTERNAL

- Single piece that include front wall, roof and rear wall. No joins for superior strength and resistance to water/dust ingress
- Composite floor for superior strength and temperature insulation
- All cabinetry is glued and screwed to walls and floor for superior strength essential creating monocoque construction for superior strength and durability. We use advanced polymer sealant/adhesives, traditional manufacturers use basic silicon to seal gaps which has very little adhesive benefits.
- RAPTOR base strip around van for the ultimate in protection and durability (Genuine premium Raptor)
- Triple locking entry door with sturdy security screen, crime safe metal mesh covered with midge proof flyscreen
- Grab Handle entry door
- Rollout Awning
- Awning support cradle to support awning barrel weight in off road conditions such as corrugated roads
- LARGE Premium dark tinted flat pane double glassed windows with fine woven midge screens and thermal resistant block out roller blinds
- LARGE Front Window with huge oversized shade to protect from the rain when window is open, curved for better strength and distance to damage. It doesn't feel right NOT having a front window, we believe its your window to adventure!
- Picnic Table under kitchen window

*Disclaimer: All illustrations, information and specifications referred to in this brochure were correct at the time of distribution. However, Sunseeker Caravans reserves the right to discontinue or change the models, features, specifications or designs of the RV's referred to herein, at their discretion and without prior notice.

STANDARD INTERNAL

- Lightweight CNC cabinetry with soft-close drawers and hidden cutlery storage. Cabinetry is keyway for superior strength and consistent construction accuracy
- Waterfall Bench Top next to entry door standard on most floor plans.
- Upholstery- Diamond stitch over Dual density foam with Lumbar Support
- Upholstery Café, Club or L Shape most floor plans (change from standard fees may apply depending on model)
- Footrest at dinette returns
- Square edge Benchtops
- Full Laminate Splashback & Benchtops
- Spacious ensuite with a vanity
- Unique Austrian inspired angled mirrored Vanity cupboards tapered down angle for excellent viewing and clears room at base to prevent head being hit on the lower part of cabinet and still provides industry leading storage space and convience
- Pillowtop Innerspring queen mattress, premium mattress upgrades available
- All new full length bedside tables with Soft Glow Warm White recessed LED strip lights 12v USB-A & USB-C sockets and 240 volts twin outlet power points
- New tapered wardrobe doors to achieve concealed catches and premium sleek appearance to match the rest of the vans cabinetry, Robes include hanging on one side shelves on the other
- Adjustable Cabinet Hinges
- 2 Single Towel Rails and 1 Toilet Roll Holder
- Tri-Fold Table leg at dinette or swivelling neumatic telescoping leg to fascinate extra bed if required (optional infill cushion required)
- Large One piece Shower cubical with multi-layered base support to prevent deflection or cracking
- Sleek translucent pearl shower screen door
- Slatted bed base in island bed models
- 2 bunk model gets 2 additional internal draws under bottom bunk and rear external hatch and storage at rear of bottom bunk
- Diamond stitched upholstered pocket for each bunk bed
- Rear central cabinetry that includes 3 x large draws for lower half and washing machine concealed in cabinetry, sufficient space for fabric Ikea baskets for dirty clothes. Additional storage shelf above washing machine
- Smoke Detector & Fire Extinguisher

*Disclaimer: All illustrations, information and specifications referred to in this brochure were correct at the time of distribution. However, Sunseeker Caravans reserves the right to discontinue or change the models, features, specifications or designs of the RV's referred to herein, at their discretion and without prior notice.

STANDARD PLUMBING

- Cassette toilet, (composting toilet optional)
- Frontload washer dryer combi unit (3kg Washer & Lower 1kg Dryer)(Hot water wash option) (Low water consumption)
- Swift Gas/Electric Hot Water System 28lt stainless tank storage, mounted in rear ensuite to achieve shortest distance for water to travel to shower, hot water reaches the shower quicker resulting less water wastage. The shower is highest item that consumes hot water. Is also a very effective use of a awkward corner space typically next to toilet.
- Pre-plumbed for hot/cold water and gas beneath front tunnel boot for outdoor living convenience and optional slide out kitchen
- Dual 9Kg Gas Bottles with Changeover Regulator
- 2x 95L Water Tanks
- 100ltr Grey Water Tank
- Water Manifold at mains inlet allowing van to run of mains pressure or rapid fill tank independently. Good for separation of different water quality, fresh potable water in one tank and potential average water for general use in other tanks.
- Grey water tank shut off ball valve that includes quick release coupling connection
- 12V Water Pump with tank isolation valves accessible from hatch on rear of van. Handy to fill and drain tanks independently
- Proper water waste traps in kitchen and bathroom to prevent odours entering van from the plumbing
- Water Filter to kitchen Sink with 3-Way tap
- External shower with flicker mixer mounted at rear on passenger side
- Tanks vented independently through individual filter per tank

COLOURS & CUSTOMISATION

- Standard Decal options – Sunseeker signature Croc stripe with Metallic flame accents in a range of colours
- Premium Artwork Decals are available, ask about your options today!

ABOUT

Sunseeker Caravans is a proud Australian owned, family company. Our vans are constructed to the highest standards in the Brisbane-based factory. Every design feature in a Sunseeker is meticulously considered and debated amongst the development team. Final decisions are based on the team's own adventures in caravans along with decades of experience in the RV industry.
