

# ADVENTURE DRIVEN™

NISSAN PATROL Y62 MY2020

IT'S ALL ABOUT PERSONALISATION  
& PROTECTION

**OL** opposite lock  
4WD & Vehicle Accessories

# THE NEW GUARD

Opposite Lock's new premium steel bull bar has been designed to incorporate the stylish new looks of the Nissan Patrol, whilst keeping safety and the vehicle's inbuilt intelligent systems at the forefront.

From the initial sketches, the Opposite Lock R&D team has focused on ensuring that any addition to the Nissan Patrol needs to be built to a standard that feels like it is part of the vehicle and shaped to fit smoothly.

Incorporating the high number of safety and tech features of the Patrol, you can be confident that your vehicle will perform to ADR standards and provide the maximum protection to your vehicle and your family.

With high approach angles and rigid strength, this bar allows you to challenge the tough terrain and fit out all the accessories you need to conquer your journey.

The Opposite Lock Bull Bar equipped to your Patrol is the true essence of being Adventure Driven.

# CONTEMPORARY DESIGN

At the heart of its design, the Opposite Lock Bull Bar has taken on the Patrol's styling queues, combining its grand on-road stance with tough terrain capabilities.

Tasked with providing a slim fitting bar that works with the curves and shape of the Patrol, Opposite Lock's design team have developed a contemporary bar that has been formed, folded and engineered that performs when needed – but also looks the part.

**Applicable Vehicle Trim Levels:** Ti and Ti-L Trim Packages

**Colours Available:** Standard Matte Black, colour matched at additional cost

**Warranty:** 2-year Nationwide Warranty

**Approximate weight added to vehicle:** 80KG

**Approximate length added to vehicle:** 160MM

# PLAY IT SAFE

Constructed with 63mm diameter tube and 3mm high grade powder coated steel. The Opposite Lock Premium Bull Bar provides the strength for maximum defense. Heavy duty over riders protect the bar against nudging, while the bar has been designed with clearance and protection in case of vehicle impact.

A central split air dam has been incorporated to help maintain airflow to the Patrol's V8 engine and improve strength in frontal impacts. The bar is also available with a central or three piece protection plate to reduce the chance of engine damage in the event of a collision.

The Patrol's technology platform has been integrated into the design of the bar allowing for the forward camera and parking sensors along with the vehicle's Intelligent Cruise Control, Intelligent Lane Intervention, and Intelligent Forward Collision Warning systems.

The Premium Bull Bar has been engineered for airbag compliance to ensure that in the event of an accident, airbags are deployed and perform as required.

All Opposite Lock bull bars are designed, built, and independently tested in accordance with ADR requirements.

# BAR BENEFITS

The location of the winch and fairlead has been designed with accessibility for when you need it most. The low winch mount allows for optimum vehicle recovery and is built to suit a wide range of popular winch models.

Recessed LED indicators are packaged with the bar and designed to reduce the risk of damage

Fog lights can be interchanged with halogen or LED to create the style you are looking for

Hi lift jack points conveniently located under the overriders for stability and strength

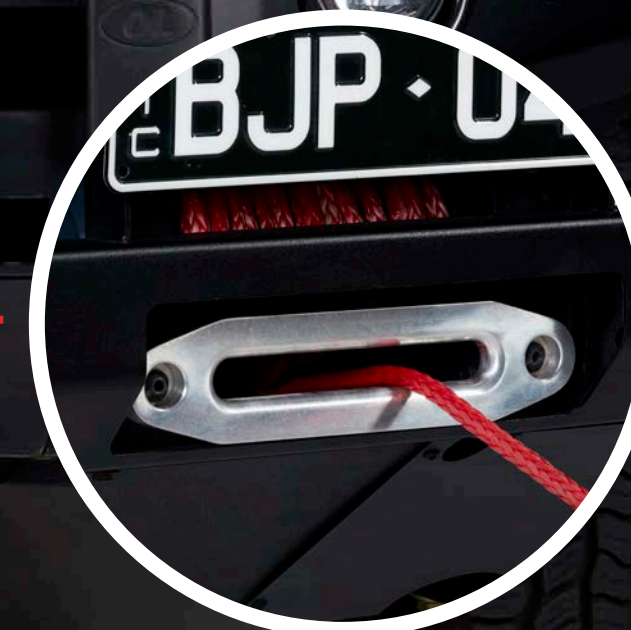

Compatible with washers to keep the dirt and grime off your headlights

Three CB aerial mounts - two located on the passenger side, one located on the driver's side - with each mount utilising a quick fit cut out so additional accessories can be easily installed later

Additional driving lights can be mounted and is compatible with all major brands

The location of the winch and fairlead has been designed with accessibility for when you need it most. The low winch mount allows for optimum vehicle recovery and is built to suit a wide range of popular winch models
