

PROCESSING LINES

TAILORED TO YOUR
INDUSTRIAL CHALLENGES

KEY BENEFITS

- Optimized industrial performance
- Global project deployment expertise
- 360° support from engineering to industrial production

ADVANCED PROCESS TECHNOLOGY

In a constantly evolving markets, industrial performance is no longer limited to mastering the extruder alone. Product quality, consistency, recipe flexibility, energy efficiency, cost control and food safety require a comprehensive vision of the entire process. It is precisely this approach that drives CLEXTRAL in designing and delivering complete, reliable, scalable and fully integrated extrusion lines.

With more than 70 years of expertise in twin-screw extrusion, CLEXTRAL supports industrial players from the design phase through to long-term optimization of their installations.

COMPLETE SOLUTION

FULL PROCESS INTEGRATION

CLEXTRAL designs each project as a coherent whole, where every processing step contributes to the final product performance.
The processing lines developed by CLEXTRAL integrate the entire process:

- Raw material preparation and precise dosing systems,
- Preconditioning,
- Twin-screw extrusion,
- Shaping and cutting,
- High-efficiency dryers,
- Sweet or savory coating systems,
- Cooling and conveying equipment.

This global integration ensures technological consistency of the installation, optimizes energy consumption and simplifies day-to-day operation.
