PUMPS**

Just some of the many brands of equipment we service and provide spares for

- ALFA LAVAL
- ARO
- ASM
- CALPEDA
- CAPRARI
- DAB
- DAVEY
- EBARA
- FLOWSERVE
- GRACO
- GRUNDFOS
- INOXPA
- INPRO SEALS
- IWAKI
- KSB
- LOWARA
- MONO (NOV)
- PENTAIR (SOUTHERN CROSS)
- POMPETRAVAINI
- REGENT
- ROPER
- ROTO
- SAER
- SANDPIPER
- SEW EURODRIVE
- SULZER (ABS)
- TSURUMI
- VERSAMATIC
- VIKING (WRIGHTFLOW)
- WAUKESHA
- WEG ELECTRIC MOTORS
- WILDEN

GRACO®

Graco have long been the market leaders in sanitary, air operated pump and drum unloader systems. Graco designs and builds a broad array of equipment specifically for sanitary manufacturing. These include applications for the food industry, personal care products, cosmetics, pharmaceuticals, medical devices and more.

QUANTM HYGIENIC ELECTRIC DOUBLE DIAPHRAGM PUMPS

Designed to meet the growing demand for clean energy and sustainable technologies, QUANTM is the world's first (and only) affordable, hygienic electric operated double diaphragm (EODD) pump built to minimize energy consumption and related costs by up to 80%. Innovative, new FluxCore electric motors and drives provide up to 8x more continuous torque at low speeds while minimizing size and resistance losses. These revolutionary pumps are easy to clean, simple to maintain, and require less energy to operate—providing a lower cost of ownership. Graco's seal-less and self-priming diaphragm pump design delivers clear advantages over all other pumps, including centrifugal, lobe, gear, progressive, peristaltic and piston/plunger technologies by handling difficult applications.

De.mem Mechanical Seals

We are renowned for a wide range of sealing solutions for pumps and allied equipment including cartridge seals and the acclaimed Inpro Air Mizer Isolators.

We specialise in offering superior sealing options for your equipment. These include a choice of sealing face materials and elastomer options to promote superior sealing.

To extend the life and uptime of your equipment we highly recommend

INPRO/SEAL
A Waukesha Bearings Business

Inpro/Seal Air Mizer seals are permanent shaft seals for powders, liquids, slurries and bulk solids on industrial processing equipment, preventing product loss, harmful emissions and contamination.

Due to their non-wearing design, Air Mizer shaft seals are maintenance-free and constructed to last the lifetime of your equipment. Unlike conventional contact seals, Air Mizer shaft seals fully articulate to accommodate radial run-out, axial movement and angular misalignment simultaneously.

SULZER

Sulzer's Piranha range of pumps cater for most commercial waste water removal.

MAIN BENEFITS:

- Effective and economical dewatering using small-diameter discharge lines
- Unique cutting systems provide blockage-free operation
- Adjustable bottom plate maintains continuous efficiency
- High efficiency IE3 motor on Piranha PE gives energy savings
- Flexible installation options: fixed with pedestal / guide rail and transportable
