

# Flexibles and Stretch Film Capability

Over the past 53 years, we've grown into Australia's leading packaging company, with a national footprint of production and multiple warehouse facilities around the country. We are proud to remain the same Aussie family-owned business looking after yours!

Film manufacturing has been at the heart of the Signet business since 1968. We have the tools and expertise to analyse film performance to ensure that our customers are achieving the best possible results.

## Manufacturing Capability and Operations

### **Brisbane-based manufacturing producing up to 3,800 tonnes per annum**

24/7 operations

95% of our polyethylene is generated from Australian gas

### **Dual operating model**

Domestic production = fast reaction times

Imported Sourcing = extends range and increases redundancy

### **National distribution network**

Brisbane, Sydney, Melbourne, Townsville, Perth, Adelaide and Darwin

## Industries

Signet flexible products are suited and supplied to the following industries:

**Food Production:** Meat, Dairy & Produce

**Agriculture:** Growers & Packing Houses

**Logistics:** Collation shrink, eCommerce & Pallet Wrap

**Industrial:** Manufacturing, Construction & Engineering

**FMCG:** Garbage Bags & Bins

**Retail:** Mattress bags & Furniture bags

**eCommerce:** Recyclable mailers & Shipping bags

## An environmentally friendly focused innovation pipeline

### **Increase Recycled Content**

Increase the number of products in our range made with recycled content. A 10% target has already been achieved at plant level.

#### **Collation Shrink**

*Signet supplies Shrink Film to a major coffee/milk products producer*

- Signet performed the R&D to match existing properties
- Slip and shrink properties are critical
- 15% recycled content achieved

### **Increase Renewable Content**

3 key products are now made with renewable content, with a focus on expanding.

#### **Pallet Caps**

*Signet supplies Pallet Caps to a wide range of customers*

- Signet sourced recycled materials
- All pallet caps now have 30% recycled content
- Contains 20% plant-based plastic produced from sugarcane
- Made from 100% recyclable polyethylene

### **Encourage Recycling**

Assist our customers in recycling more of the products they purchase from us, to reduce the impact on landfill.

#### **PCR stretch film**

*Signet supplies Stretch Film to a wide range of customers*

- Introducing recyclability with partners
- Signet conducted R&D across multiple formulations
- 15um film with 30% recycled content achieved
- Range to be expanded

### **Introduce Compostable Options**

Initial trials have begun to increase our range of compostable Flexibles products and physical properties are looking good.

#### **Mega Bin Liners**

*Signet supplies bin liners into the white meat industry*

- Using high-quality materials to make thin products
- Currently some products are imported
- Internal process in development

## Future Growth

### Products and Equipment

- Conversion: Extend side/bottom/mitre seal capabilities
- Extruder: Capacity expansion

## Improving our environmental impact and footprint

### Meet the remaining APCO 2025 National Packaging Targets

- 100% of all Australia's packaging will be reusable, recyclable or compostable by 2025 or earlier.
- 70% of Australia's plastic packaging will be recycled or composted by 2025.
- 50% average recycled content will be included across all packaging by 2025.  
**Note** - Recycled content targets by packaging type differ.
- Problematic and unnecessary single-use plastic packaging will be phased out through design, innovation or introduction of alternatives.

### Sustainability

- Continue to increase recycled content in product ranges.
- Broaden compostable product offerings.
- Large investment in solar power.
- Increase solar electricity generation capacities.
