WHAT IS ADVENT GREENPAC?

Advent Greenpac is Adventpac's line of *compostable packaging solutions* e.g. bags, films and gloves.

WHY CHOOSE ADVENT GREENPAC?

Reduce plastic waste in landfill and choose compostable packaging. Our bags are certified to break down in 100 DAYS, not years.

Find out how you can compost our bags >>>

MADE FROM RENEWABLE CORN

Our bags are made from GMO-free corn that's unfit for human consumption. That means they don't impact global food supplies!

NO MICROPLASTICS

Our bags don't leave behind nasty microplastics when they break down unlike regular plastics. How good is that?

CERTIFIED COMPOSTABLE

We only use certified compostable materials which means our bags will **completely break down within 6-12 months.**

SAFE FOR THE PLANET

Our bags are free from heavy metals and toxins which means they are not harmful to earthworms and critters!

THE LIFE OF A COMPOSTABLE BAG

BORN FROM CORN

Our compostable resin is sourced from GMO-free corn; unfit for human consumption.

MADE INTO BAGS

Our compostable bags are made the same way as plastic bags; through blown-extrusion.

PACK YOUR GOODIES!

Pack your precious goodies in our compostable bags; just like you would with plastic bags.

IMPRESS YOUR CUSTOMERS

Impress your customers with your environmentally-friendly compostable packaging!

COMPOST IT!

The bags go in a compost bin or worm farm to become plant food and not to landfill! #ZeroWaste

FAQs

What happens to compostable bags in landfill?

The bags will decompose but it might just take longer than if it were composted.

Do the bags have a shelf life?

Yes, we recommend using them within 6-8 months and keep them in a cool and dark room.

What happens when the bags are composted?

After composting, the bags break down into nutritious plant food. FREE from microplastics, heavy metals and toxins!

Can the bags be reused?

Yes! We recommend using them to bag food scraps before composting them.
