

## PAPER AND FILM LABELS

### Direct Thermal Labels

Commonly used in many industries, including food service, retail, pharmaceuticals, and shipping, where they are used for short- to medium-term labeling applications. Direct Thermal Economy Paper (ECO) and Direct Thermal Top Coat Paper (TOP) are available.

### Thermal Transfer Labels

Used for product ID, packaging, record keeping, warehousing, shipping, receiving, working-in-process and inventory management applications, ideal for printing long-lasting variable data and offers greater durability.

### Fragile Shipping Labels

Call attention to your fragile shipment with these labels to avoid damage and delays. Permanent adhesive backing, durable high quality semi-gloss paper.

### A4 sheet Labels

Suitable for printing on either inkjet or laser printers. Features a strong, permanent adhesive. Create custom products or mailing labels.

### Color labels, Weigh Scale Labels and Multi-Layer Thermal Labels

Designed and produced to meet scale manufacturers specifications. A wide variety of colors and sizes in different core sizes are available. Used widely in the logistics and express packaging industry.

### Thermal Paper Rolls

High quality thermal paper rolls with sensitive thermal coating delivering clean and legible prints. Suitable for thermal printers, cash registers, POS systems, and credit card terminals within the retail, catering, gaming that do not require ribbon.
