FENGQI PACKING

Product brochure

Established in 2014 with registered, Guangdong Fengqi Packaging CO., LTD. Our provide kinds of air waybills, express plastic mailing bags, packing list envelopes, label stickers,, bubble mailing bags. tamper evidence bags, etc... Now we have developed more environmentally friendly packaging : glassine paper bags ,kraft foam padded bag,honeycomb paper rolls, Most of our products have sold to U S A, Europe, Russia, Australia, Canada, Singapore, Asia, we have builded up long term business relationship with many customers. Fengqi Packaging to develop with the innovation of the services. An award-winning leader in the filed of packaging & printing with over20 years experience. In our philosophy, we believe that packaging bag canbe more than just something used to pack products. It can be an extensionof yourself and a way to express your passion to clients... We truly care abouteach client as we understand how important packaging is, so our passion is to provide you with the perfect bag matches the passion that you have for serving your customers.

01. Logistics packaging

① Packing list envelope

.Packing list envelope

.100% paper Packing list envelope

② Poly mailer

③ Degradable Poly Mailer

④ Bubble Mailer

⑤ Shipping label

03. Paper packaging

① Honeycomb paper bag

② Foam kraft padded mailer

③ Glassine paper bag

④ Honeycomb paper roll

02. Tamper evident packaging

① Tamper evidence bags

② Security tape

③ 95kpa Biological specimen bag

Logistics packaging

① Packing list envelope

application: It is mainly used in express delivery. The main role is to play a transfer invoice when the product is transported, and the transportation of safety data is widely used in logistics and express industries.

Specification

Film: CPE, CPP, PE, etc

Release Paper: : hot-melt glue

Release Paper: glassine, kraft paper, white artpaper, etc

Thickness: 25-120 Micro

Printing: Custom

OEM: Accepted

MOQ: PP/PE film with release paper

Color: Red/Yellow/Green/Custom

.100% paper Packing list envelope

application: It is mainly used in express delivery. 100% paper composition, environmental protection and recycled.

Specification

Top paper : 25-30g glassine paper

Bottom paper: 40g white kraft paper

Release Paper: 40g

Thickness: 25-120 Micro

Printing : Custom

OEM: Accepted

② Poly mailer

Poly Mailer mainly used in express delivery. It is basically made of polyethylene material. This material has low cost, easy to use, and has good waterproof performance. At the same time, customize some express bags that meet the characteristics of the enterprise, so that the culture of the enterprise can let more customers know.

Specification

Feature: Water-proof, Tear-proof, disposable, strong self-adhesive

Material: Co-extruded PE film

Printing: customizable

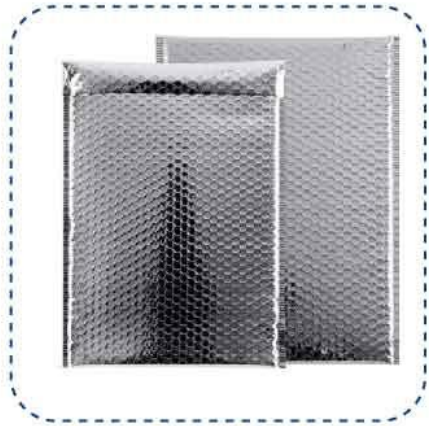

OEM: Accepted

③ Degradable Poly Mailer

Our degradable express bags are a new type of environmentally friendly packaging materials, they are made of biodegradable plastics, can decompose in the natural environment, reducing pollution and damage to the environment. They have the same features and performance as traditional plastic delivery bags, but are more environmentally friendly, which will help protect our planet.

④ Bubble Mailer

Bubble mailer is a common packaging material, its main role is to protect items from damage. Bubble bag is characterized by light, soft, durable, shock-proof, waterproof, moisture-proof, anti-static and so on.

Specification

Material: PE film/ Metal film/kraft paper

Size: customizable

Printing: Custom

OEM: Accepted

⑤ Shipping label

Specification

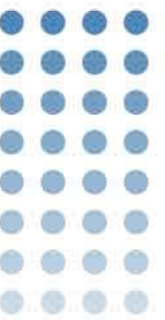

Item: Thermal Label/Direct Thermal Paper

Face Paper: High Quality Thermal Paper

Glue: Permanent Glue or Customized

Feature: Four-proof (Waterproof, Oil-proof, Rub resistance, alcohol-proof)

Liner: White/customizable

Anti-counterfeiting packaging

① Tamper evidence bags

1. **Multiple Tear-off Receipt:** For track and trace record during the chain of custody.

2. **Level 4 Tamper Evident Tape Closure:** Maximum security level tape with state of art technology.

3. **Special heat seal:** Wide in-set seals are used for the highest level of tamper evidence. The width of the seal yields a high strength film bond and the in-set position gives a very positive indication of possible tampering.

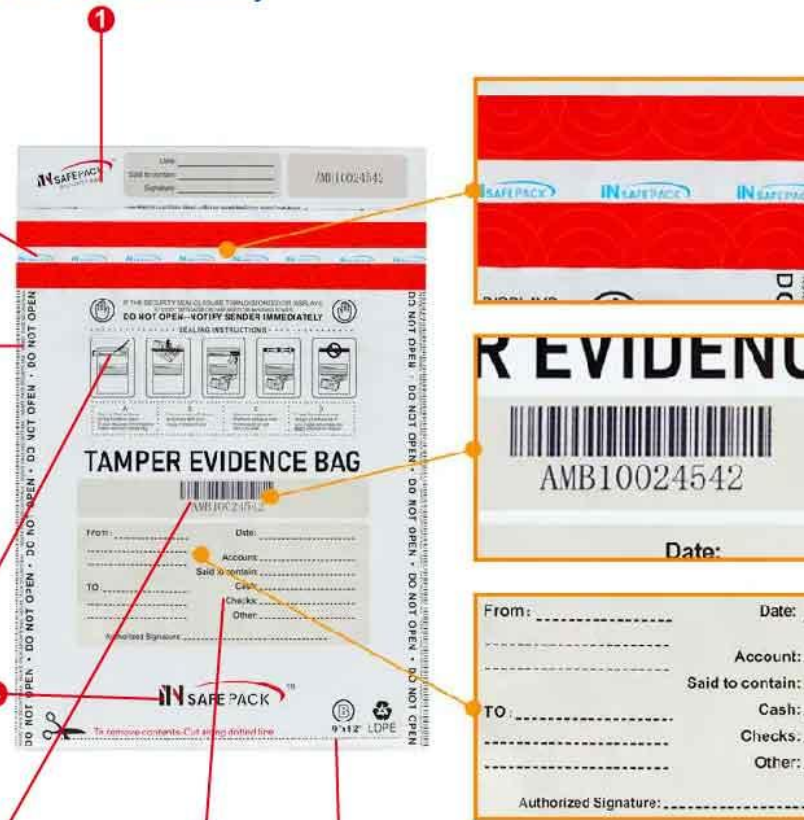

4. **Our Website:** Please kindly do visit our website for more information.

5. **Easy to Use Instructions:** provides guide on how to properly seal the security bag.

6. **Multiple Barcode & Serial numbers for Track and Trace:** location on both the tear-off receipt and the body of the security bag, these numbers provide a tracking method throughout the entire chain of custody (from sender to end receiver).

7. **Write-on Information Panel:** Prompts the user with vital information categories.

8. **Dotted line at the bottom:** cut along it when you want to remove the contents.

Security bags are often used in high-risk situations, such as handling cash, checks, shares or bonds and other sensitive items, including court evidence, sampling handover and storage of various samples. Applicable objects are law enforcement departments (court system, public security, police system, market supervision, customs system, etc.), banks, jewelry industry, Treasury, airport duty-free shops, express logistics, personnel department archives management department, security management department, etc.

② Security tape

Security tape is generally used for sealing and fixing valuables and plays a protective role in the transportation process. When the anti-counterfeiting sealing tape is torn from the surface of the carton, the pre-set anti-counterfeiting matrix (such as VOID or other special version) information will be transferred to the media film and permanently left on the surface of the carton together to show that there are traces of opening and cannot be restored, playing a deterrent and warning role. There is no adhesive on the label surface material and the bearing surface after tearing, which plays a beautiful role.

③ 95kpa Biological specimen bag

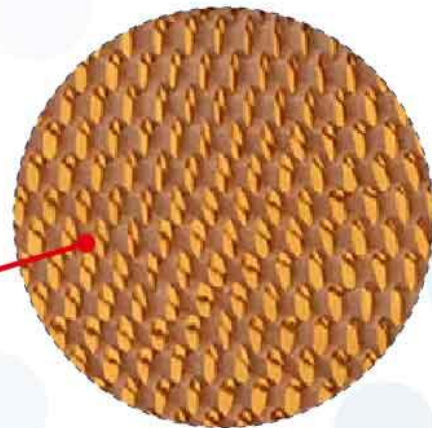

Product characteristics

- ★ Biosafe transport bags are designed as secondary packaging for the transport of Class B biological substances by road or air (UN3373).
- ★ To ensure the safe and compliant storage and transportation of diagnostic and clinical samples, infectious and hazardous materials, chemicals, drugs and environmental samples.
- ★ It can be used in biomedicine industry, cold chain transportation industry, etc.
- ★ It can resist 95kPa after sealing.
- ★ Independent test and validation reports.
- ★ Sealing permanent adhesive, can withstand temperature range $-40^{\circ}\text{C} \sim 55^{\circ}\text{C}$ ($-40^{\circ}\text{F} \sim +130^{\circ}\text{F}$).

Paper packaging

The company's paper products have passed the FSC forest sustainable certification (wood certification), using pure paper as raw materials, can be recycled or composted after waste to fully degrade, environmental protection and pollution-free, truly "from nature, return to nature". The implementation of the global plastic ban is imminent, and the generation of honeycomb paper bags undoubtedly gives the industry another better choice.

① Honeycomb paper bag

② kraft foam padded mailer

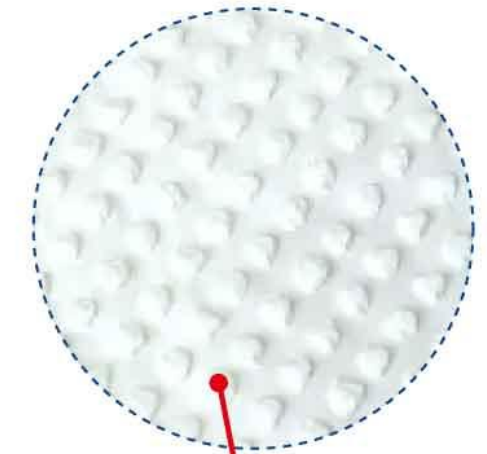

★ Environmentally-friendly 100% curbside recyclable padded mailers-lightweight, flexible-no plastic filler. Sustainable.

★ Envelopes constructed from 4 layers of Kraft paper and 2 layers of patented cushioning material using cutting edge technology. Used by some of the largest e-commerce retailers in the world.

★ Use to safely ship clothing, books, paper supplies, cell phone cases, cosmetics, etc.

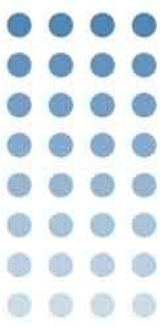

★ Shipped items stay secure with easy peel and seal closure and are easily accessible with a pull tab tear strip. Much lighter weight and less mess than traditional padded mailers.

③ Glassine paper bag

Glassine paper bag is a kind of eco-friendly material made of paper and natural vegetable oil. It has the characteristics of waterproof, oil, moisture and so on, can effectively solve the traditional paper bag fragile, easy to wet and other problems.

At the same time, it also has the advantages of degradability and recyclability, and will not cause pollution to the environment during use. With the continuous improvement of people's awareness of environmental protection, environmental protection materials will be more and more welcomed and sought after by people. As a kind of green environmental protection material, the environmental protection glassine paper bag will be more widely used in the future. At the same time, with the progress of science and technology and the continuous innovation of technology, it will also have better prospects for development.

④ Honeycomb paper roll
