About SHINING

SHINING Aluminum Packaging Co., Ltd, is one of the leading Chinese manufacturers of aluminum containers, including aluminum jars, aluminum tubes, and other unique aluminum packaging options for global consumers of wine, vodka, beer, energy shot, olive oil, soft drinks, coffee and health drink.

We apply a non-toxic epoxy resin inner coating on our bottles to keep your contents safe and fresh. Our bottles have passed all rigorous third-party tests which were conducted in accordance with both LFGB and FDA standards. Our facilities are equipped with high-end production equipment from Mall+Herlan and Hinterkopf. Uncompromised quality is our principle.

SHINING Aluminum Packaging Co.,Ltd provides innovative and customized solutions to enhance the value of your brand.

APPLICATION

Aluminum packaging is widely used in liquid packaging of various high-end beverages, and is also suitable for packing solid content, such as capsules and tablets of many high-end health products.

WATER

SOFT DRINK

JUICE

ENERGY DRINK

BEER

WINE

SPIRITS

FOOD OIL

CAPSULE

ADVANTAGE

Lightweight

Aluminum packaging conserves resources during the transport and storage of the product and the packaging itself, both to the consumer and at the end of its product life.

Recyclable

The recycling of aluminum in packaging applications use fewer resources than what is needed in raw aluminium production. Consequently, aluminum beverage cans bottles are the most recyclable container in the world.

Formable

The formability of aluminum allows for the manufacture of customized bottle shapes. The metal's malleability also means that aluminum packaging can keep its integrity even if it is deformed by external impact.

Protective

Aluminum is one of the lightest material available on consumer packaging that offers a complete barrier against light, gas and moisture - which helps to extend the life of your contents.

Conductive

Aluminum has a top-of-range thermal conductivity out of many materials, making it ideal for applications that require minimal heating and chilling times and energies, such as cold beverages sold in retail stores.

Decorative

Aluminum's diverse range of finishes plus its compatibility with all printing technologies provides designers with enormous flexibility to create packaging with stunning graphic design, maximizing shelf presence and brand identity.

Alcoholic Beverages Bottle

100-1750ml
