About SHINING

Shining Aluminum Packaging Co., Ltd, is one of the China leading manufacturers of aluminum bottle, aluminum jar, aluminum tube, and other unique aluminum packaging for personal care, beauty, spray perfume, health care and household.

Our bottles are made from pure aluminum which is 100% recyclable, making our bottles eco-friendly. The one-piece aluminum construction and customized shape of our bottles and canisters, offer a feeling of originality and exclusivity. Aluminum containers are virtually unbreakable and for all-purpose usage, available in capacity ranging from 10ml to 5,000ml, even larger if required.

ADVANTAGE

Lightweight

Aluminum packaging helps save resources during the transport and storage of the protected product and the packaging itself, both to the consumer and at the end of the packaging life.

Protective

Aluminum packaging is the lightest material to offer a complete barrier to light, gases and moisture and can help to extend the life of products.

Recyclable

The aluminum bottle is the most recycled cosmetic container in the world and most aluminum bottle applications are fully recyclable as well.

Decorative

Aluminum's diverse range of finishes and its compatibility with all printing technologies provide designers with enormous scope to create packaging with stunning graphic design, shelf presence and brand identity.
