

LEAN WAREHOUSE MANAGEMENT

How do you get the best out of your warehouse?

The warehouse is the heart of your distribution business. Get it wrong and you can be delivering the wrong things to your customers at the wrong time and really damage your reputation.

Innovative application of lean thinking tailored to your business needs.

TXM has worked with dozens of companies around the globe to improve warehouse performance.

We work with your people in the office and warehouse to engage them in the change process and come up with practical solutions. This ensures that they can sustain the improvement.

TXM can deliver:

Streamlined warehouse layout to make the most of the space you have and minimise waste of motion and transport.

More effective warehouse organisation and leadership.

Optimised inventory so you have the right stock in the right quantity at the right time.

Efficient receiving, put away, picking and packing processes.

Improved inventory accuracy.

Streamlined order handling processes in the office.

Fewer errors

Increased on time in full delivery.
