

# Transfer multiple materials cost-effectively

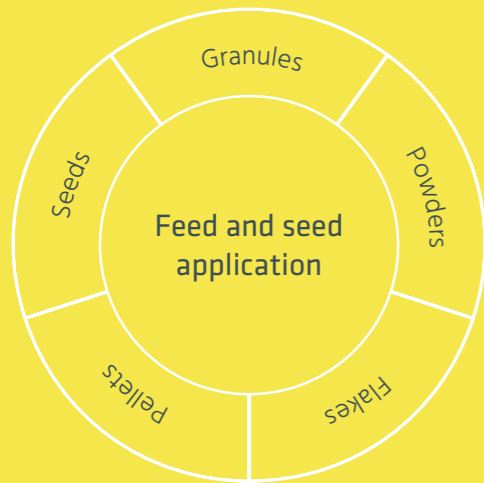

# Dust-free and contamination-free

## Cost-effective conveying for applications like stock feed and pet food

Floveyor has been designing, engineering, and manufacturing conveyors and process line technology in Western Australia since 1958.

Original Floveyors are specially designed for the rapid, gentle transfer of powders, flakes, pellets, feed, and seeds for every type of agriculture application.

## Floveyor's engineering culture

Floveyor systems are engineered to the highest standards of safety.

Our focus is on creating a dust-free, low noise environment to keep your workplace and operators safe. Floveyors are designed for rapid but gentle conveying of a wide range of materials in an energy efficient manner.

## Choose the right conveyor for your operation

Floveyor conveyors work in an unlimited number of process and plant configurations.

Elementa Range

Compliance and quality assurance for a multitude of materials.

Avida Range

Reliable, rapid order fulfilment with low cost of ownership.

## Why choose an original Floveyor?

- Effortlessly handle innumerable powders and granules with one conveyor
- Total batch transfers, with negligible residue
- Homogeneous transfer of blended products
- ATEX 2014/34/EU suited for potentially explosive applications
- Conveys hazardous materials safely via a fully enclosed system
- No product degradation
- Easy cleaning with dry- and wet-clean options available
- Fully enclosed and modular installations
- High throughput with a small footprint
- Energy efficient conveying
- Requires minimal operational maintenance
- Integrates easily with existing plant and equipment.

## FloDisc® Technology

Floveyor's proprietary FloDisc technology uses centrifugal force to suspend raw materials in an air pocket in an enclosed tube and propel them to a collection point. This provides a rapid but gentle way to safely transfer materials for agriculture applications.

**“Only Floveyors with FloDisc technology convey powders and granules so efficiently and safely.”**

# Process line technology for better powder handling

A vast range of accessories provides effortless integration to brownfield sites while meeting rigorous global compliance and safety standards.

Mobile Conveyors

Manual Bag Dump Station

Screw Feeder

Dosing Screw Feeder

FIBC Screw Feeder

Reusable FIBC Unloader

Loss-in-Weight Dosing Auger

Tubular Drag Conveyor

Transit Loading

Disposable FIBC Unloader

Rotary Lump Breaker

Trough Screw Feeder
