- Made from plant-based materials that the cling wrap was certified compostable to meet the ASTM D6400 standard. Also it's BPA and plastic free, contains no polyethylene.
- Biodegradable sticky film could provide a tight seal which keep the air out from containers to extend the freshness of food and prevent odors or freezer burn.
- It's easy to cut the food wrap with the design of slide cutter on the surface of package and reduce the waste of product.
- Measures 11.8 inch x 262 feet, total 258 square feet - the cling film is suitable for daily use. Due to the materials of plant extract which the shelf life only 12 months, so using it off as soon as possible.
- Adding the PLA allow it to break down into carbon dioxide and water completely in the composter during 4-6 months which it won't pollute the environment and make a contribution to our planet.
