

SpaceVac

High Level Cleaning

Benefits:

- Increased safety - no need for ladders, cherry pickers or scaffolding
- Faster cleaning times and reduced downtime

Internal Range - for internal spaces such as ventilation systems, ductwork, ceilings, inside windows and machinery.

SpaceVac ATEX Range - for hazardous or explosive environments, such as sawmills and food production plants.

Customised Solutions

We will work with you to assess your cleaning challenges, recommend the most suitable combination of machinery and accessories, and provide ongoing support to ensure you can clean faster and more hygienically.

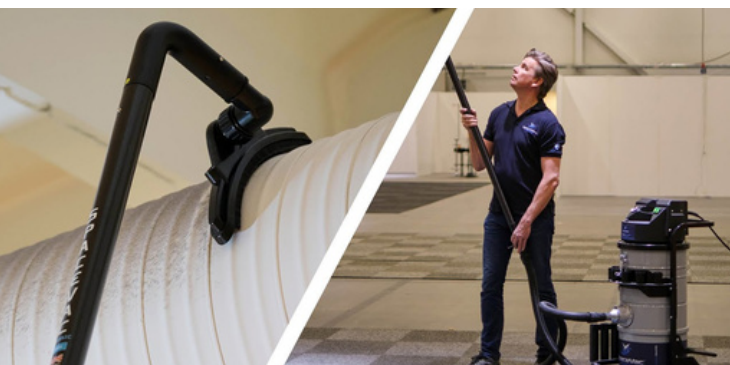

By combining a selection of cleaning machinery and accessories, we can create a solution to any cleaning challenge in any environment or industry.

Examples:

- Encapsulated cleaning
- Conveyor cleaning
- Mobile and fixed cleaning setups

INNOVATIVE CLEANING

KAIVAC®

Univac

- Commercial kitchens
- Restaurants
- Food service
- Hard surface cleaning

A compact and user-friendly cleaning system that effectively cleans and extracts dirt and liquids from floors, leaving them spotless and dry. Its compact size and maneuverability make it easy to use in congested areas, and it requires minimal training to operate.

Steam Cleaning

Steam cleaning is an eco-friendly and powerful cleaning method that's popular in industrial settings. It effectively cleans and sanitizes surfaces and equipment, making it ideal for food processing facilities and more.

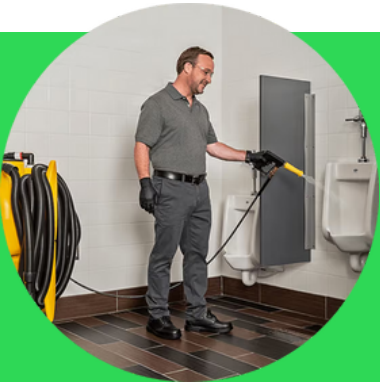

Cleaning Validation

ATP testing is a method for cleaning validation that measures the amount of ATP on a surface to assess its cleanliness. A high reading indicates contamination, while a low reading means the surface is clean. It's a useful tool for cleaners to validate cleaning effectiveness.

No Touch Cleaning

- Bathroom cleaning
- Hard surface cleaning
- Carpet cleaning
- Tile and grout cleaning
- And more...

Allows you to clean areas without touching them. Comes in battery or cable options and in a range of sizes for small and large facilities.

The systems use high-pressure sprayers to apply cleaning solutions to surfaces, followed by a powerful vacuum that extracts the dirty water and debris, leaving surfaces cleaner and drier.

Pressure Washers

We provide a diverse selection of pressure washers that are reliable and powerful for commercial and industrial cleaning. These can be:

- Electrically heated
- Diesel-powered units
- Stationary
- Portable
- Truck/trailer mounted

Hot Water

Ideal for food processing plants, hospitals, construction sites, and other commercial or industrial spaces.

Cold Water

Blasts away dirt, grime, and contaminants from various surfaces, including concrete, brick, and metal.

Vacuum Cleaners

We provide a wide selection of vacuums designed for commercial and industrial use. Our range caters to various environments and applications, from general cleaning to hazardous dust removal.

- ATEX and IECEx vacuums for flammable / combustible dust.
- Wet and dry vacuums
- Pneumatic vacuums
