

PL-622 - FRONT & BACK WIPE-ON LABELLER

PL-622 - FRONT & BACK WIPE-ON LABELLER

Pack Leader's PL-622 Front & Back Wipe-On Labeller is a part of the extraordinary fleet of high-quality, versatile labelling machines on offer by Packserv. This machine offers fully automated dual labelling heads for wipe-on application of containers requiring front & back labelling. Ideal for flat and near-flat containers this machine can be configured with options to apply a label to almost any container type.

The PL-622 features an overhead conveyor and dual foam-pads in addition to the labelling heads that ensure extra stability and perfect labelling of your product. Designed to be used as a continuous, reliable, high-speed labelling machine, it's manoeuvrable and simple to change between production lines or to remove it for cleaning. Manufactured in strict compliance with GMP standards the PL-521 is made from 304 grade stainless steel and high quality aluminium which ensures longevity even in the harshest of environments.

The PL-622 incorporates a high-quality LCD control panel featuring inbuilt troubleshooting and training for operators to ensure minimal downtime on your production schedule. Additionally, the conveyor and labelling heads are all automatically synchronised via the control panel to ensure perfect labelling time and time again, with minimal setup when changing between products.

SPECIFICATIONS

- **Weight:** 240kgs (approx.)
- **Power Supply:** 240V 10Amp
- **Machine Length:** 2450mm
- **Machine Width:** 1500mm
- **Machine Height:** 1550mm
- **Max Label Height:** 150mm
- **Max Label Roll Size:** 300mm
- **Inner Core Size:** 76mm
- **Conveyor Width:** 100mm
- **Conveyor Height:** 890mm-1140mm
- **Max Container Width:** 82mm
- **Label Dispensing Speed:** Up to 30m/min
- **Max Container Width:** 110mm
