

## ELF-20 AUTO TOP WIPE-ON BENCH LABELLER

## ELF-20 AUTO TOP WIPE-ON BENCH LABELLER

Pack Leader's ELF-20 Auto Top Wipe-On Bench Labeller is the ideal machine for any wipe-on application of labels up to 120mm in height. The compact size of the ELF-20 means that it can be positioned with ease, particularly when mounted on an optional wheeled trolley.

Featuring its own in-built conveyor belt, the ELF-20 offers simple and efficient adjustment. Change-over between different labels and containers is easily achieved and requires very little operator training. The ELF-20 can be utilised as a benchtop machine or, when switched to automatic mode, can be incorporated into a full production line. The trolley features in-built threaded levelling jacks to allow the conveyor belt to be set to any height to match any existing conveyor line.

The ELF-20 machine features food and pharmaceutical grade quality components with all parts made from stainless steel or anodised aluminium.
