

BULK BAGS / FIBC'S

POLESY

SINCE 1950

TRUSTED SUPPLIERS OF BULK BAGS

Polesy Packaging is an Australian family-owned business that has been active in the packaging industry for four generations. From starting as a trader in jute bags in 1950, Polesy has evolved into one of Australia's leading packaging suppliers, with expertise across a range of packaging solutions including Flexible Intermediate Bulk Containers, known as FIBCs or Bulk Bags, and offering a comprehensive range of packaging solutions to meet all types of product applications and requirements.

Polesy's packaging team has a breadth of experience and an in-depth understanding of its customers' day-to-day operations and requirements. This ensures Polesy can provide packaging solutions that fully fit its customers' operational and quality needs.

Polesy is committed to evolving its relationships with its long-term partners and building new partnerships for the future. The Polesy packaging team takes pride in providing sustainable packaging solutions for all industries.

All Bulk Bags / FIBCs supplied by Polesy Packaging & Textiles are manufactured in accordance with Australian Standard AS 3668:2019 and International Standard ISO 21898:2004.

TYPES OF BULK BAGS/FIBC'S

Polesy Packaging offers a range of options to help select a Bulk Bag / FIBC to suit customers' operational and sales requirements.

CONSTRUCTION TYPE

BAFFLE BAG

Baffle bags are form-stable FIBCs fitted with an internal baffle structure. The internal baffles ensure the bag stays within the confines of a pallet and guarantees maximum load space

VENTILATED

Ventilated bags allow for maximum airflow to ensure the longevity of the contained product. The bags are extremely durable and perfect for transport and storage

FOOD & PHARMACEUTICAL GRADE

Food grade and pharma clean bags are manufactured to the Standard(s) relevant to the industry sector; providing safer, cleaner and more sustainable packaging for food and pharmaceutical products

CIRCULAR WOVEN

Circular woven bags are made from fabric woven on a circular loom thereby eliminating the vertical seams on each of the bag's corners. Circular woven bags are recommended for fine and hydroscopic materials as well as many other applications

TYPE C

Type C anti-static bags are specially designed for electrostatic applications and meet the requirements of IEC 61340-4-4:2018. Type C bags offer safety during filling and discharging in the presence of flammable gas vapours or dusty atmospheres

SINGLE OR DUAL POINT LIFT

Ideal for use on fully automated and semi-automatic filling lines. These bags usually have lower Safe Working Loads of 500 - 1100kg and are for use in situations where speed of handling is crucial

UNDG

UNDG bags are certified for the transportation of hazardous goods under ADR regulations. Polesy's UNDG bags are tested by independent testing laboratories and designed to comply with all the requirements of a UNDG FIBC

POLESY BULK BAGS/FIBC'S

are used in many industries including:

SEEDS & GRAINS
STOCKFEED
ANIMAL NUTRITION
