

WOVEN POLYPROPYLENE & BOPP BAGS

POLESY

SINCE 1950

TRUSTED SUPPLIERS OF WOVEN PP & BOPP BAGS

Polesy Packaging & Textiles has been a leading industry expert in packaging since 1950, offering a full range of solutions that meet all types of product applications. Our packaging team has a breadth of experience and in-depth understanding of our customers' day-to-day operations and requirements. This ensures that we can provide packaging solutions that fully fit your operational and quality requirements.

Woven Polypropylene (WPP) bags, allow for air to pass through the packed products and can be UV stabilised for a longer exposure to sunlight. WPP bags can have a barrier added to protect against moisture and leaching of the product. This is achieved by adding a laminate outside or as an inner coating. We also supply bags with liners that are designed to maximise protection of your product. WPP bags are light in weight and 100% recyclable, and can be flexographically printed in up to nine colours.

Biaxially-Oriented Polypropylene (BOPP) bags are WPP bags laminated with a film, that allows for premium, full colour photographic quality print. This provides a superior packaging design that encapsulates your product, enhances your brand recognition. BOPP printed WPP bags can also increase moisture protection. The option of a block bottom, gussets and opening aids are also available.

FEATURES OF POLESY PACKAGING'S WOVEN PP & BOPP BAGS

- 5kg - 50kg capacity
- In-house flexographic printing, of up to 3 colours
- Full colour, BOPP quality printing
- A range of filling options

- Multiple moisture protection options & barrier styles
- Anti-slip options on both WPP and BOPP bags
- Sustainable high quality product, 100% recyclable

DESIGN YOUR WPP/BOPP BAG

Polesy Packaging offers you a range of options to help you design your bag to suit your operational and sales requirements.

CONSTRUCTION TYPE

CIRCULAR WOVEN

- Most common bag type
- No seam
- Bags can be made flat, block bottom or gusseted

BACKSEAM

- Cleaner finish on bag (No fins on laminated bag)

TOP OR FILLING OPTIONS

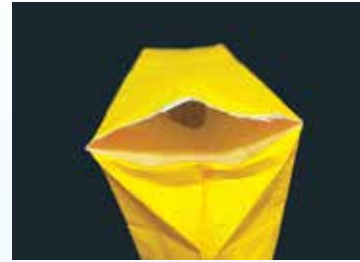

COLD CUT

- Neat, clean finish
- Easy Open option available
- Suitable for most automated filling machines

HEMMED

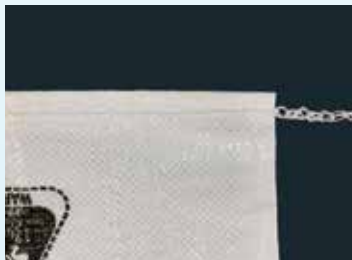

- Available in both sonic sealed hem or sewn hem
- Sonic sealed hem reduces the chance of contamination by loose sewing threads

VALVE

- Made specifically for roto packing
- Variety of valve designs
- Valve bags are available in sonic seal, traditional valves, extended valves and tucked-in valves

BOTTOM OPTIONS

SEWN BOTTOM

- Available single or double stitched hem
- Easy open options available

BLOCK BOTTOM

- The bag can stand up straight
- In combination with a valve mouth gives a square like shape
- Easy to use on an automatic roto filling machine

PINCH BOTTOM

- Once the bag is filled it takes on a square form, improving stacking

POLESY WPP/BOPP BAGS

are used in many industries including:

SEEDS & GRAINS
STOCKFEED
ANIMAL NUTRITION
FOOD & FOOD INGREDIENTS
LANDSCAPE & BUILDING
CHEMICALS
