Sustainable Bulk Packaging

Reclaim30™

30% Recycled Polypropylene

Reclaim30 - The Future of FIBCs

Our manufacturing partner is a global leader in polymer processing with state-of-the-art infrastructure and has developed Reclaim30 - a compatibilizer-based technology that uses 30% recycled PP in its FIBCs. Reclaim30 is the world's first and only Labordata Certified recycled FIBC with Safety Working Loads of 1000kgs, 1250kgs and 1500kgs with a 5:1 Safety Factor. Reclaim30 FIBCs are made in an advanced in-house reprocessing facility, and have an assurance of end to end traceability.

Do Reclaim30 FIBCs cost more?

While there are additional costs to manufacture a FIBC with 30% recycled PP when compared to a traditional FIBC made with 100% virgin PP, these costs being:

- 10% increase in GSM of fabric
- 20% extra UV stabiliser
- Cost of compatibilizer
- Cost of processing waste PP into recycled PP

The cost of a Reclaim30 FIBC will be comparable to a FIBC with 100% virgin PP.

30% Recycled Polypropylene

Why Reclaim30?

Environmental and Social
Responsibility

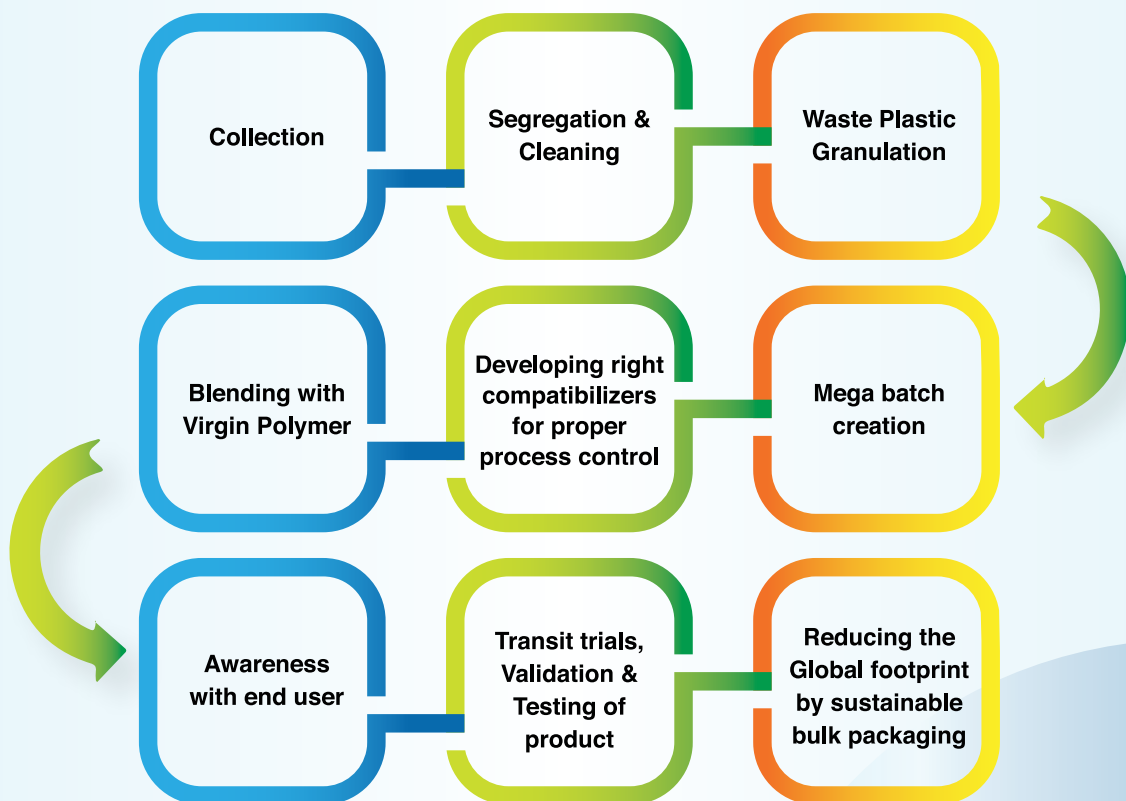

How?

Mix Post-Consumer Waste
and Post-Industrial Waste

What our manufacturing partners do

POLESY BULK BAGS/FIBC'S

are used in many industries including:

SEEDS & GRAINS
STOCKFEED
ANIMAL NUTRITION
FOOD & FOOD INGREDIENTS
LANDSCAPE & BUILDING
CHEMICALS
