

CSB BASIC ERP

The turnkey industry-specific solution

- All important core processes and industry specifications as standard
- Less work and cost for your IT
- More transparency and efficiency for your company

Today an ERP system is important for every company.

Today an ERP system is important for every company in order to supply trade customers economically, manage corporate processes in an optimal manner, meet legal requirements and gain transparency of the whole enterprise.

Therefore, you need an ERP system, which meets your specific requirements, is exactly tailored to your industry and can visualize all important core processes in its standard version. Only then it will bring you real benefits.

CSB BASIC ERP: The turnkey industry solution.

With CSB BASIC ERP you get the industry competence of the internationally successful CSB-System as turnkey industry solution. It gives you access to more than 40 years of industry experience, best practices from over 1,200 installations and state-of-the-art software technologies.

With CSB BASIC ERP, you supply trade just as economically as major corporations and company groups. You can comfortably access best practice processes that cover all industry and market requirements.

All important core processes and industry specifications in the standard version.

Optimized raw material purchase, highly-efficient production and inventory processes, electronic data exchange with your business partners, compliance with all legal requirements as well as secure quality and product transparency for your customers: The CSB BASIC ERP is tailored to your needs right from the start and covers all important core processes

and industry requirements in its standard version. Expensive special programming or costly adjustments of the system are not necessary. Best-practice industry processes provide more efficiency and quality in your business processes. With CSB BASIC ERP you can optimize your whole company and direct it consistently towards further growth.
