

CSB FACTORY ERP

Adding industry expertise to your Group ERP

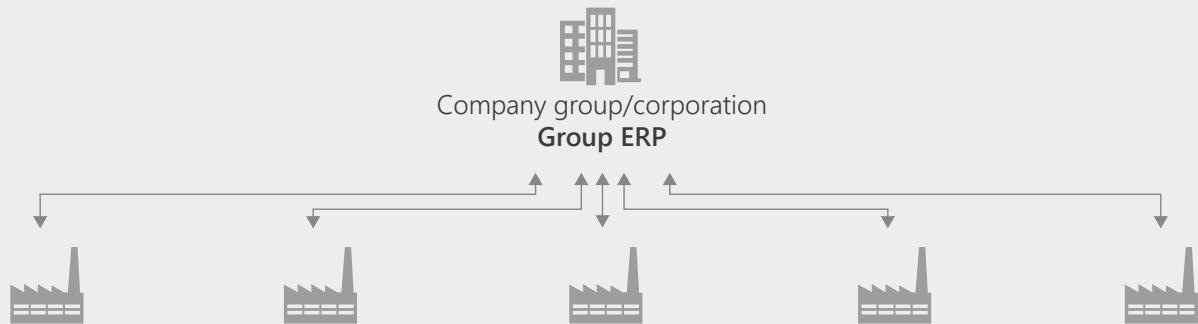

- Unrivaled industry specialization of processes to enhance your Group ERP
- Homogeneous IT landscape for your entire group
- Transparency and efficiency at all facilities around the globe

Are you managing your factories efficiently?

Three out of four company groups and corporations control the production at their facilities and in varying industries with entirely different, autonomous ERP systems developed in-house. The data is inconsistent and incomparable, the cost for operating the different IT systems is high, working with multiple stand-alone solutions means less transparency for

management, and in many cases the group ERP systems are not capable of optimally replicating industry-specific production and logistics processes despite the time and money spent for the adaptation – and even less so in a global organization.

Situation of the IT landscape in many company groups and corporations

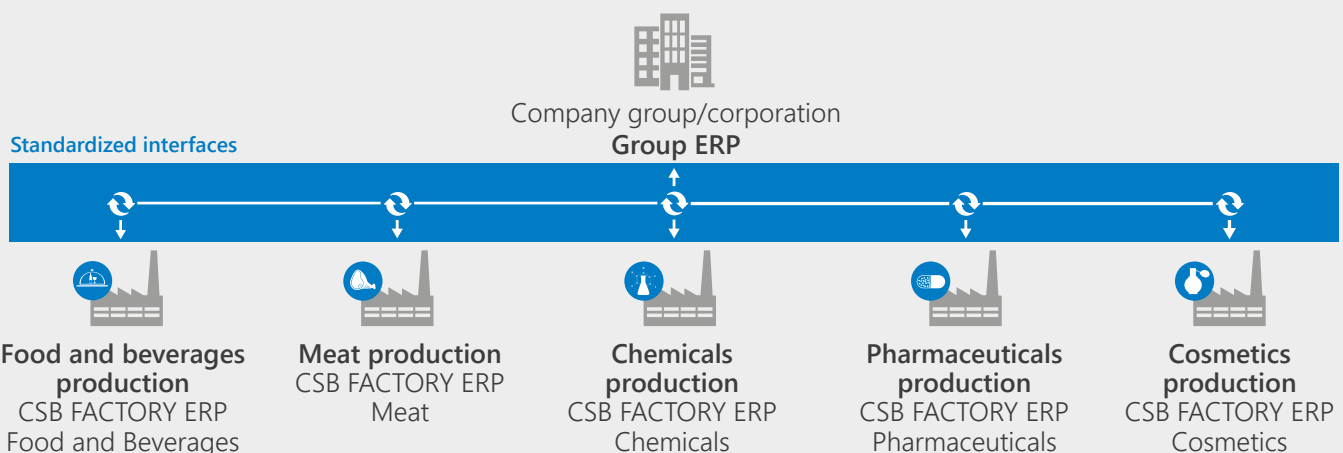

Factories of varying industries in many countries are controlled by many different IT systems.

Achieve more with CSB FACTORY ERP

Enhance the control of your factories and create more transparency of processes and key indicators with CSB FACTORY ERP – the industry-specific ERP system to supplement your Group ERP. Because CSB FACTORY ERP consistently represents the entire primary value creation

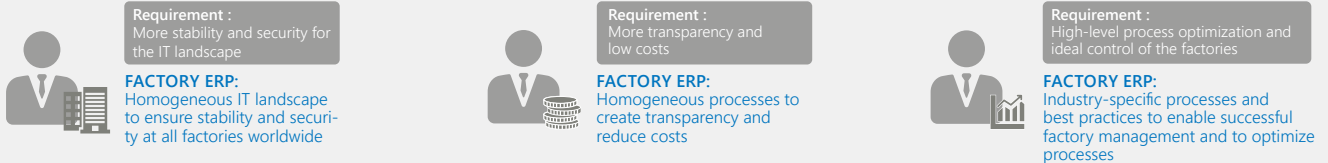

of production and logistics in the industries for food and beverages, chemicals, pharmaceuticals and cosmetics. Standard interfaces between Group and FACTORY ERP guarantee a stable, flexible and integrated system landscape.

Enhanced control, more transparency and homogeneous IT landscape with CSB FACTORY ERP

CSB offers FACTORY ERP for many industries and subsectors, for instance dairy products and bread & bakery products.

How FACTORY ERP meets your requirements

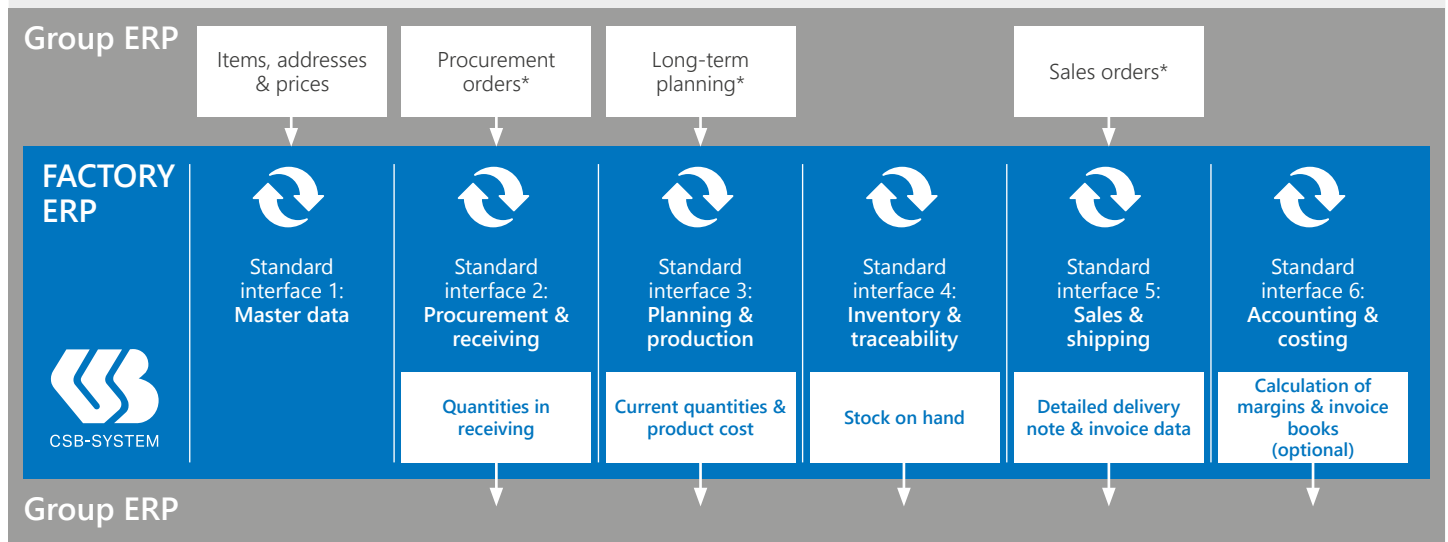

Unrivalled industry specialization of processes to enhance your Group ERP

- CSB FACTORY ERP meets all requirements and covers all important core processes in the food and beverages, chemicals, pharmaceuticals and cosmetics industries in its standard version.
- CSB FACTORY ERP can be deployed worldwide.
- Using best-practice standards, CSB FACTORY ERP can represent industry-specific processes in a way unmatched by any generic Group ERP. Or is your Group ERP capable of connecting scales, optimizing recipes or documenting seamless traceability?

Homogeneous IT landscape for your entire group

- Standard interfaces between Group ERP, Factory ERP and machines and equipment guarantee an integrated system landscape. Not only does this ensure security and stability, but it also makes your IT more flexible and simplifies expansions. Any separate MES is replaced.
- With CSB FACTORY ERP, updates and upgrades to new releases can be realized quickly and cost-effectively.
- New market requirements and legal changes can be easily integrated in CSB FACTORY ERP.

Standardized data exchange between FACTORY ERP and Group ERP as well as machines and equipment

* optionally possible also in CSB FACTORY ERP

CSB FACTORY ERP offers standard interfaces to machines and equipment. The integrated CSB Linecontrol makes any separate MES redundant. We will be glad to provide detailed information.

Transparency and efficiency at all factories

- CSB FACTORY ERP networks all factory areas including machines and equipment in a single system with a consistent data basis. This ensures transparency and optimizes the processes at your factories.
- A separate MES is not needed anymore.
- Redundancies, inconsistencies and work for double entries in Group ERP and FACTORY ERP are eliminated.
- Weak points at your factories are easily identified, the responsiveness on site is enhanced, and costs are reduced substantially.

CSB FACTORY ERP – Overview

Do you want cost minimization and fast system introduction?
CSB FACTORY ERP meets your industry's requirements in its standard version

Do you want to optimize the management of your group's factories?
CSB FACTORY ERP covers all important industry-specific core processes in one system
