

CSB INDUSTRY ERP

# The turnkey solution for your entire company

- All industry-specific business processes covered 100% by the standard version
- From the individual process to an overall solution expandable by modules
- More transparency and efficiency for your company

# Have you integrated your whole value chain in one system?

Being the central tool for the management of your company, the ERP-System is vital, as it covers many areas and provides a wide range of functions. Many ERP systems can support the company-specific processes of a business in an optimal way only by a high adjustment effort and additional stand-

alone solutions. If your ERP system meets your specific requirements, is exactly tailored to your industry and can visualize 100 % of all value-added processes, it will be of real benefit to you. Especially, if you want to expand on an international basis.

## Gain more with CSB INDUSTRY ERP.

With CSB INDUSTRY ERP you will achieve an entirely new performance level for your company. It makes processes more efficient, speeds up information access and significantly increases transparency. CSB INDUSTRY ERP is more than an

ERP system. It is a turnkey solution universally covering all areas of the value chain of your industry in its scope and depth. Your whole company is digitalized and optimized.

## All industry-specific business processes covered 100% by the standard version.

CSB INDUSTRY ERP covers all requirements and vital core processes in the industries food and beverages, trade, chemistry, pharmaceuticals and cosmetics in its standard version - from primary production to the consumer and from the machine to controlling. You benefit from completely integrated business processes without stand-alone solutions

and you can control your company even more successfully. Besides the material and information flows, all business processes and industry-specific requirements are visualized. And CSB INDUSTRY ERP can be applied internationally across locations and countries. This does not only ensure a smooth expansion, but also secures your investments.

## CSB INDUSTRY ERP is modular and scalable.

CSB INDUSTRY ERP adapts to the development of your business, and not vice versa. CSB INDUSTRY ERP offers modules for all areas of your company.

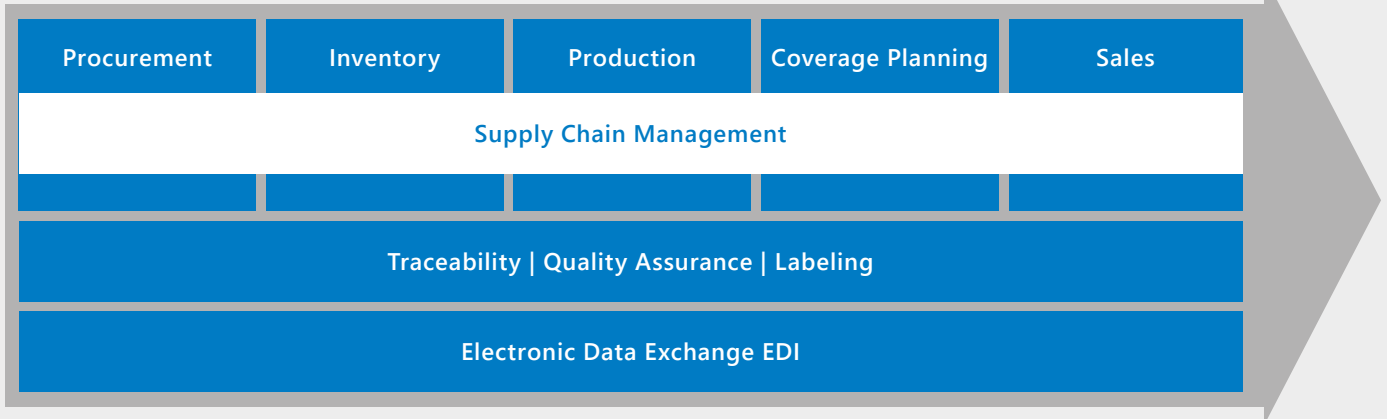

Thus, you can introduce the functionalities that offer you the most added value. Flexibly and in the steps you decide. You save cost and introduce the system faster.

### The turnkey solution for your whole company.

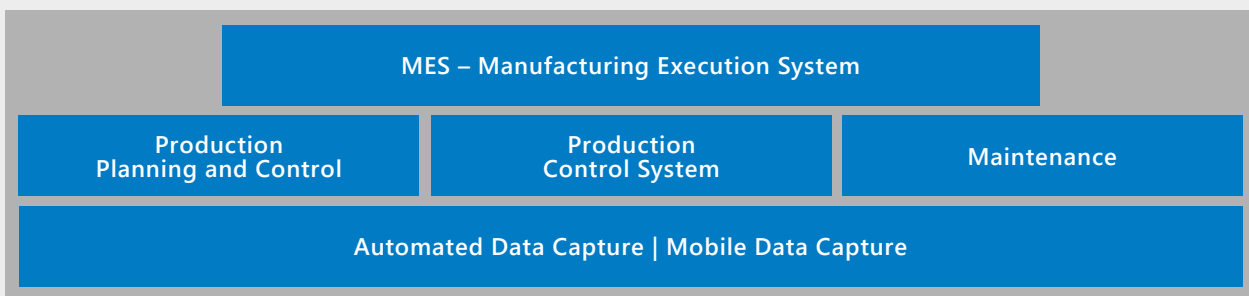

#### Management

#### Value creation

#### Production

CSB INDUSTRY ERP covers all business processes from the individual process to the turnkey solution. And it can be expanded flexibly.

## CSB INDUSTRY ERP ensures transparency and efficiency.

The use of the turnkey solution establishes a consistent data basis for all departments. All business units are linked to each other, all information is available across all areas. This improves transparency, the flow of information and

communication. Redundancies, inconsistencies and double entries are eliminated. Weak spots are recognized quickly, the responsiveness is accelerated and the overall cost is reduced substantially.
