All Your Floor Cleaning Needs

Sweep, Steam, Scrub, Wash, Disinfect, Dry, You read it right - The Duplex Lithium Hybrid does all the necessary tasks to keep your floor clean and disinfected. That's what makes it the world's most versatile floor scrubber, washer and carpet cleaner.

All Types of Floor

From awkward profile floors, tiles, concrete, rubber, carpet, flotex, or timber. Duplex Lithium Hybrid's 800,000 bristle brushes are designed to agitate different floor surfaces, lifting grease and dirt to make your floor look clean again - all in one single pass, without a cord. Just as powerful as the rest of the Duplex floor cleaning range.

All Directions, Small or Large Areas

Cut down your cleaning time. Imagine cordless cleaning a 20 meter long corridor in just 4 minutes - Duplex Lithium Hybrid will make it effortless to manoeuvre cleaning in all directions. From wall to wall, doing long laps in large areas, or to clean right to the edges in small bathrooms.

All Types of Spills

From fresh spills to stubborn stains and sticky floors, Duplex Lithium Hybrid is powerful in its ability to remove spots and spills in a single pass, thanks to its powerful motors and brushes. It can tackle wine marks, coffee stains, body fluids on carpets, rubber floors, and even timber floors.

20 Meters Corridor = 4 Minutes

Regular Cleaning

TOTAL FLOOR CLEANING IN ONE SINGLE PASS

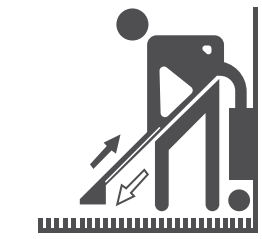

Tired of old labor intensive cleaning methods?

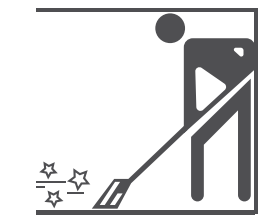

“ up to **3X FASTER** with **BETTER QUALITY** results than human cleaning by hand. ”

Mopping by hand

Carpet cleaning

Scrubbing by hand

MORE MANOEUVRABLE

Two Way Handle

CLEANS RIGHT TO THE EDGE

The dual brushes agitate and clean right to the edge and go underneath tables and chairs.

FEATHERLIGHT HANDLE

No hard pushing, pulling and lifting. Duplex Lithium Hybrid is incredibly light to handle. The ergonomic design with bi-directional handle and contra-rotating brushes will result in featherlight, single-handed operations and maneuverability that is unequalled.

WEIGHT REDUCTION SYSTEM

The innovative and patented WRS[®] (Weight Reduction System) drastically reduces the weight of the handle by transferring it to the machine body thus reducing risks of WMSD (Work-related musculoskeletal disorder), operator fatigue and increasing scrubbing performance.
