

## CONVEYING AND BOTTLE DRYING

- Combining, dividing, distributing
- Accumulation system
- Preforms, containers, caps, crates cases, packs and pallets

## LABELLING

- Modular solutions for Roll-fed, Adhesive, Cold Glue and Hot Melt label applications
- Sleeve labels
- 6 carousel sizes, up to 5 labelling stations and 36 configurations
- From 6,000 to 81,000 bph

## PALLETISING

- Up to 12 layers per minute
- Conventional, columnar and robotic
- High and low level infeed

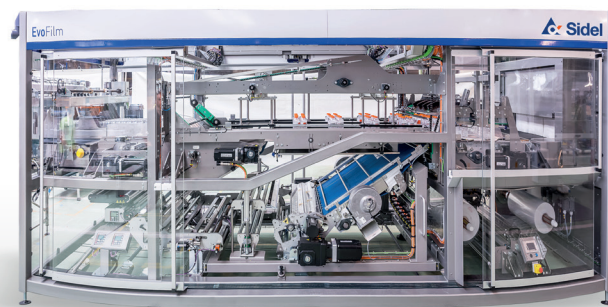

## PASTEURISING, COOLING AND WARMING

- Up to 160,000 bph
- PU control with PRINCE Plus
- Water savings and optimised heating and cooling energy

## OVERWRAPPING AND PACKING

- Multi-format solutions
- Wraparound and RSC case packing
- Film, pads, trays
- Speeds up to 120 cycles per minute (PET bottles), 150 cycles per minute (cans) in 3 lanes

## INTRALOGISTIC SYSTEMS

- Fully optimised automatic handling and flow supervision
- Motorised conveyors AGV – CM
- Fork over legs AGV – GL
- Counterbalanced AGV – GF

SIDEL GROUP

**ALL NEEDS**  
**EVERY SOLUTION**  
**ONE SUPPLIER**

## BLOW MOULDING AND PREFORM FEEDING

- From 12,000 to 82,000 bottles per hour
- From 0.25 L to 5 L
- Regular, Electrical Heat Resistance, Preferential heating and Aseptic blowing process

## DECRATING AND CRATING

- Up to 3,200 crates per hour in single lane
- Up to 5,600 crates per hour in double lane
- Conventional, columnar and robotic
- Automatic crate magazines

## FILLING

- From 32 to 216 filling valves
- From 0.2 L to 3 L
- Mechanical level, Electro-pneumatic, Volumetric Electronic technology
- Ambient, hot, cold, aseptic filling

## CAP FEEDING

- Output of up to 80,000 caps/hour
- Allows for careful individual handling of each cap or crown
- Full closure compliance at capper infeed

## DEPALLETISING

- Up to 7 layers per minute
- Semi automatic, automatic and robotic
- High and low level outfeed

## CRATE WASHING AND BOTTLE WASHING

- Up to 160,000 bph
- Single or double-end
- Equipped with label extraction
- 4 rinsing zones

## CARBONATING, MIXING AND CLEANING UNITS

- From 6,900 to 80,000 L/h
- Carbonation range from 2 g/L to 9 g/L
- Standalone or Blendfill
- CIP standalone or integrated systems

## INTEGRATED SOLUTIONS

- Preform feeding – Blowing – Filling – Cap feeding
- Preform feeding – Blowing – Labelling – Filling – Cap feeding
- Preform feeding – Blowing – Labelling
- Ambient, hot, cold, aseptic filling
