MedTech
Capability statement

Automated materials handling

Established in 1983, Australis Engineering are multi-faceted providers of engineering design, automated materials handling equipment and industrial automation. We excel at designing and manufacturing innovative, fully tailored materials handling equipment.

We have a strong engineering design focus and apply our mechanical and automation expertise to develop the broad spectrum of equipment required in Australian MedTech manufacturing and warehousing. Australis' collective knowledge across a range of industries results in smart thinking and innovation.

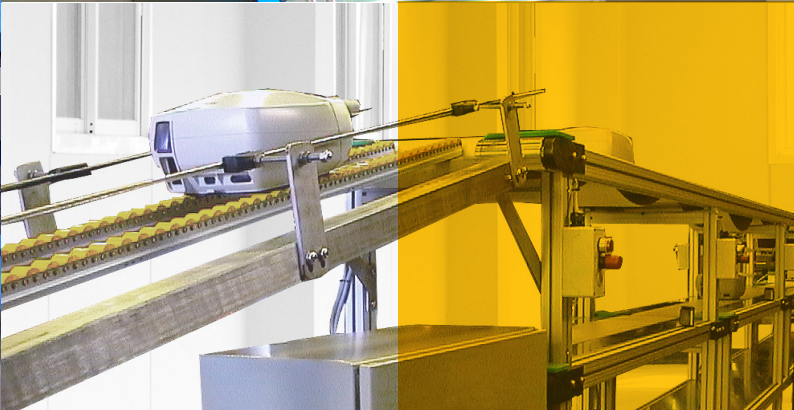

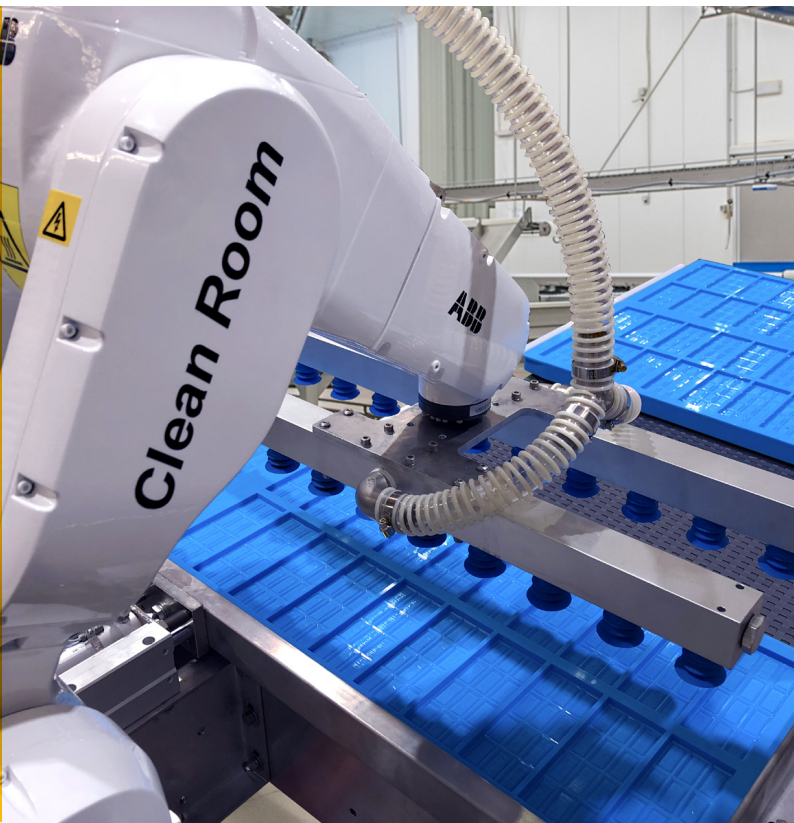

Smart thinking is delivered by our in-house engineering and trade experts meaning customers have direct access to the Australian based designers and technicians who are delivering your solution.

Our Medtech Clients

We have experience working with many MedTech clients including:

- Australian Red Cross Blood Bank
- Australian Nuclear Science Technology Organisation
- CSIRO
- NSW Health
- Cook Medical
- Resmed
- Baxter Health
- Hartmann
- Sphere Healthcare
- GlaxoSmithKline
- Ecolab
- Radpharm Scientific

Our Capabilities

Australis has been manufacturing and integrating innovative equipment for over 36 years. We are experts in conveyors and pallet handling systems and have extensive experience in robotics and industrial automation.

Our clients choose Australis for our smart thinking which is derived and is applied from our expertise across a broad range of industry segments including:

- MedTech
- Food and Beverage
- Warehousing
- Packaging and Processing
- Industrial and Construction Products

Smart thinking draws on this diverse industry experience and in-house engineering expertise to help clients develop solutions that:

- Increase production
- Improve efficiency
- Implement automation
- Enhance safety
- Improve hygiene

Customised Equipment

Throughout our history, Australis has excelled at designing and locally manufacturing, fully customised, special purpose machinery.

We have delivered proven solutions for a wide range of products and package types.

Our equipment includes:

- Conveyor Systems
- Robotic Pick & Place and Machine Tending
- Automated Inspection
- Automated Quality Control
- Process Automation
- Packaging Automation
- Pallet Handling
- Collaborative Robots
- Autonomous Vehicles & Mobile Robots
- Palletising and Depalletising
- Machine Safety and Guarding
- Workstations
- Clean Rooms
- Special Purpose Machinery
