TRADING AND EVOLVING SINCE 1972

Welcome to our catalogue, giving you an overview of Coppice. If you would like further details or a full product catalogue – please contact: sales@coppice.net or visit coppice.net

coppice

Consisting of about 8.2% of the earth's crust, aluminium is the world's most abundant metal.

An established and evolving company

Coppice are market leaders in sustainable packaging solutions, leveraging extensive industry knowledge and expertise, our commitment to quality, service and innovation ensures we are the supplier of choice in aluminium and alternative packaging. With over 50 years in packaging and product development, and recognised across multiple industry organisations, we are positioned as experts and proven providers of innovative, creative, and cost-effective design solutions.

Our focus

Our focus has always been on manufacturing the highest quality trays supplying the food manufacturing, processing and bakery industries as well as the wholesaler, institutional catering and non-food markets. We know you value fast, reliable and cost-effective service, allowing you to fulfil your own obligations to your customers.

"We are dedicated to delivering excellence and value, as we continue to innovate and set new standards in the industry."

Quality

Delivering quality in packaging for over 50 years

Service

Agile and responsive to all our customer needs

Innovation

Market leaders in creative, innovative design solutions

Investment in people

Nurturing talent to deliver highest levels of service

Sustainability

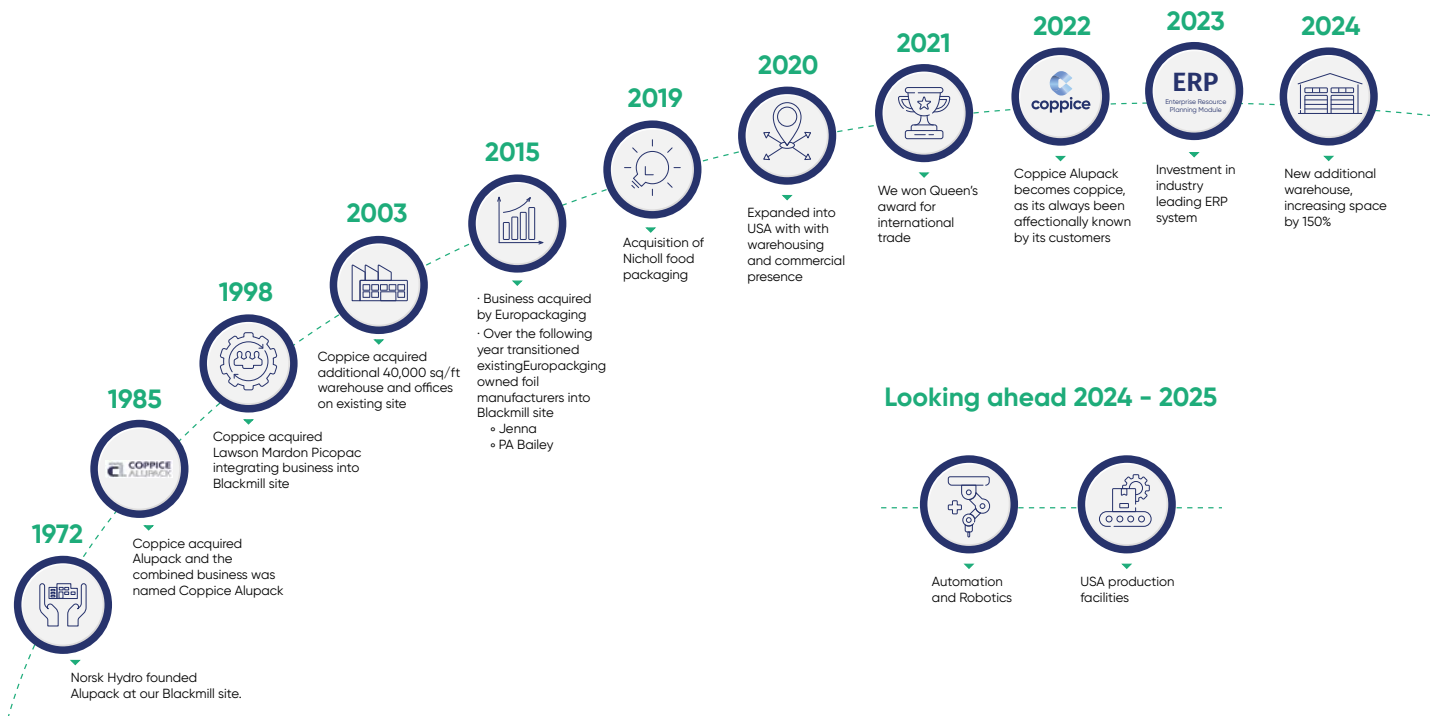

Embedding sustainability in business, culture and operations

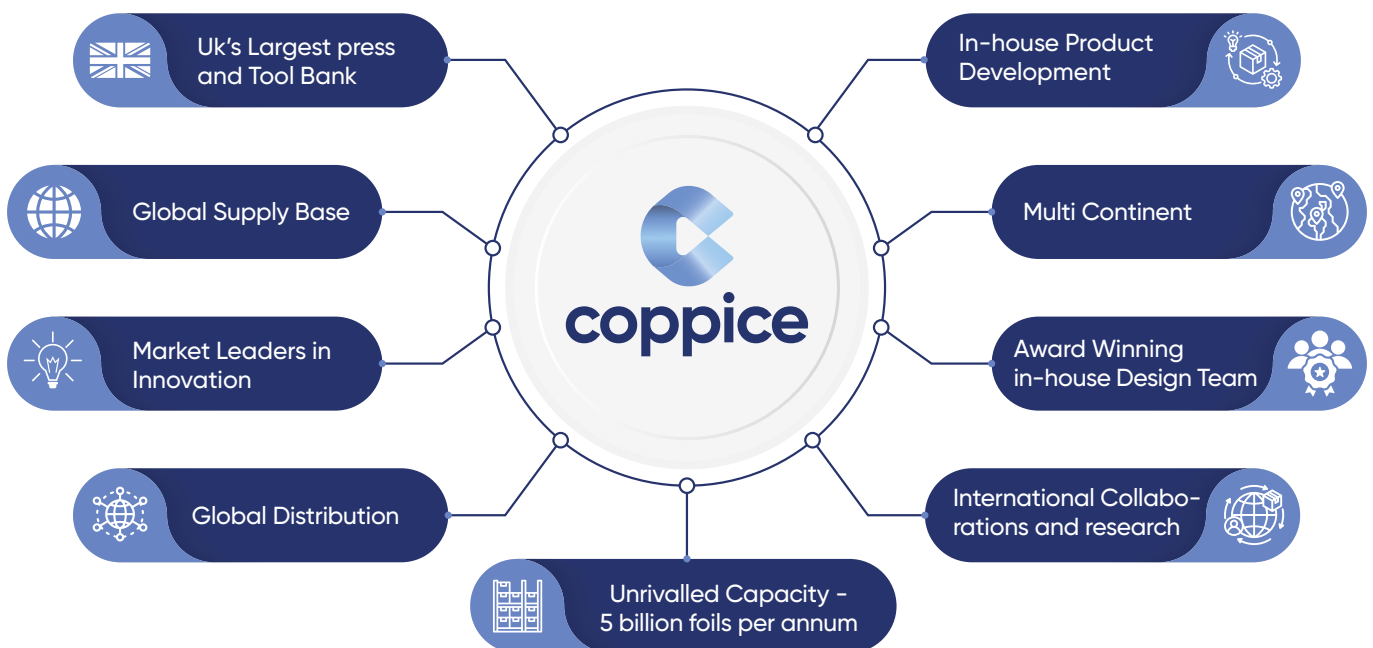

WINNER

We are delighted to announce we've been awarded a Queen's Award for Enterprise: International Trade

Our Journey

Why choose Coppice

Bespoke Innovation & NPD

We have a comprehensive on-site foil product development team, well-versed in the intricacies of the production process, capable of crafting an extensive array of shapes, sizes, colours and formats tailored to your requirements. With our talented in-house design team, we possess the prowess to conceptualise an assortment of pack formats, combi-packs, and promotional materials.

- ✓ Collaborate with our design team for custom containers.
- ✓ Choose from lacquer matching branding, embossing logos, and unique shapes.
- ✓ Get 3D visuals for project visualization.
- ✓ Mission: Elevate food products through custom solutions.
- ✓ Expertise, support, and adaptive operations for sustainable packaging.
- ✓ Enhance product value, turnover, and profits for customers.
- ✓ Collaborative exploration of novel designs and cost-effective solutions.

Our Sectors

coppice

Today, about 75% of all aluminium produced in history, nearly a billion tons, is still in use.

HEAT SEALABLE

Smoothwall

An excellent solution for convenience meals and high-quality roasting meats.

Our smoothwall trays can be supplied in both plain silver and externally coloured lacquers. They can be used in conventional ovens and where basic guidelines are followed, modern microwaves. They remain rigid in the oven, are 100% recyclable and offer high levels of heat resistance.

The smooth rim surface allows for film lidding giving a sealed, leak-proof product. Coppice can also supply the lidding film in many different widths to suit your requirements. We can also supply a range of plastic clip-on lids to fit many of our profiles.

Oven cook, grill, BBQ, microwave

Enhanced strength and durability

Retain strength and rigidity at high temperatures

Hermetic seal, gas flushable for extended product shelf life

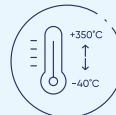

Easy handling, leak proof seals, shatterproof when frozen

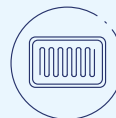

Minimise handling of raw meat / poultry, straight to oven and table

100% recyclable

Temp range
-40°C – +350°C

Excellent conductor of heat

Can be lacquered for acid / alkaline based products

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Stack and Store: When it's time to store leftovers or transport your prepared meals, take advantage of the tray's rectangular shape. These trays are stackable, so you can save valuable space in the fridge or freezer by neatly stacking them on top of each other. For added convenience, consider using a tray with a compatible lid to create a sealed storage container.

Smoothwall - Rectangulars | 200 x 155 mm Family

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Temperature Resistance: Aluminium trays can withstand high temperatures. This feature is crucial for both hot and cold food items. High-temperature resistance allows you to bake, roast, or reheat food directly in the trays, simplifying the cooking process and ensuring food remains at the desired temperature during service.

Smoothwall - Rectangulars | 200 x 130 mm Family

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Easy Cleanup: Cleaning up after cooking or serving is a breeze with aluminum foil trays. To minimise the mess, line the tray with aluminium foil or parchment paper before placing the food. This not only helps prevent sticking but also makes cleanup a simple matter of discarding the liner.

Product Tip

Labeling and Presentation: Utilise aluminium trays that offer a smooth surface for easy labeling and presentation. You can attach labels or tags to identify different food items or provide important information such as allergen warnings. Additionally, aluminium trays provide a professional and clean look for your catering display.

Smoothwall - Rectangulars | 221 x 168 mm Family

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Pre-cut Parchment Paper Liners: To streamline your cooking and baking processes, consider pre-cutting parchment paper liners that perfectly fit your large rectangular aluminum foil trays. These liners not only prevent food from sticking to the tray's surface but also make cleanup a breeze. Simply place the liner in the tray before adding your ingredients, and when you're finished, remove the liner for a mess-free tray.

Smoothwall - Rectangulars | 234 x 138 mm Family

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Roasts and Whole Poultry: Aluminium trays are ideal for cooking large cuts of meat like roasts and whole poultry. They distribute heat evenly, ensuring even cooking and browning. The trays' depth and size can accommodate the size of the meat, allowing you to capture delicious drippings for gravies or sauces.

Wrinklewall

Great for baking, catering services, desserts and many other uses.

Our Wrinklewall containers are able to remain rigid in the oven, are 100% recyclable, and offer high levels of heat resistance.

Trays are available in a variety of shapes and sizes and colours, they can also be heat-sealed with peelable film.

Wrinklewall containers can also be used in all microwave ovens.

Oven cook, grill, BBQ, microwave

Enhanced strength and durability

Retain strength and rigidity at high temperatures

Product Tip

Perfect for pies and quiches: Round trays are excellent for baking pies, quiches, tarts, and other circular-shaped baked goods. The shape helps maintain the integrity of the crust and evenly distributes heat. Round trays are also great for portion control when serving individual meals, desserts, or appetisers. They are perfect for reheating leftover individual servings of casseroles, pasta, or any dish that benefits from even heat distribution.

FOILS COLOUR SELECTOR

Bespoke foils can be supplied with brand logo and in any colour options.

Product Tip

Square trays are perfect for baking casseroles, lasagnas, and other layered dishes. The straight sides help keep the layers intact. They are also perfect for Barbecuing and grilling: Use square trays for marinating and grilling vegetables, meat, or fish. They prevent the juices from dripping and make it easy to transfer to the grill. Square trays are stackable, making them space-efficient for storage in the fridge, freezer, or pantry.

DualPakECO[®]

Packaging with Purpose

Made with certified
compostable ecovio[®] by BASF

Introducing DualPakECO[®]

Australian Made & Australian Certified
Compostable Dual Ovenable Paperboard Tray

DualPakECO[®] is a coated paperboard food tray.

This tray is coated with a food safe, compostable biopolymer coating. The coating itself provides excellent barrier properties against liquids, aromas and oils.

DualPakECO[®] is one of the first Australian made 100% certified compostable paperboard food trays, which is both ovenable and microwavable.

DualPakECO[®] has been created in partnership with BASF, world leaders in the development of fully certified compostable biopolymer coatings.

What is DualPakECO[®] made of ?

THE PAPERBOARD

DualPakECO[®] food trays are made using a pressed paperboard. Made from renewable resources and recyclable, the board is lightweight yet rigid enough for in-line production facilities. It also offers secure sealing across a variety of film substrates and machinery.

THE BARRIER LAYER - ecovio[®] by BASF

ecovio[®] by BASF is a worldwide certified compostable biopolymer. As a coating to paperboard food products ecovio[®];

- Provides a superior barrier against fat and oils.
- Provides a barrier against aromas, hot and cold liquids.
- Is an effective functional barrier against the migration of undesirable mineral oils, creating a food safe package.
- Helps to preserve food freshness and flavours.

Make, Store, Serve with DualPakECO[®]

Ovenable

Certified Compostable

Microwavable

Heat Sealable

Freezable

Customisable

Why the move to composting?

LESS TO LANDFILL

DualPakECO® is certified to Australian standard AS4736-2006. DualPakECO® trays carry the seedling logo as verified by the Australasian Bioplastics Association.

Commercial composting is an integral part of a circular economy where waste can be turned into a valuable resource rather than be disposed of in landfill. As more communities introduce source separation systems for diverting food waste from landfill, having certified compostable products will give consumers and organics recyclers (commercial composting facilities), the assurance that the products will completely biodegrade in efficiently run systems.

**DO YOU
KNOW
I CAN BE USED IN
THE MICROWAVE?**

coppice

Recycling scrap aluminium requires only 5% of the energy used to make new aluminium from the raw ore.

DID YOU KNOW?

Helping the environment...

Recycling aluminium foil
Recycling aluminium foil requires only 5% of the energy needed to produce new aluminium from raw materials. By recycling aluminium foil, we can significantly reduce energy consumption and greenhouse gas emissions associated with the production process.

Aluminium foil is lightweight
Aluminium foil is incredibly lightweight, which means it requires less material compared to other packaging options. Its light weight makes it energy-efficient to transport, reducing carbon emissions during transportation.

Aluminium foil is often used for food preservation and storage
Aluminium foil is often used for food preservation and storage. It helps keep food fresh, reducing food waste by preventing spoilage and extending the shelf life of various perishable items. By minimising food waste, we can also reduce the environmental impact associated with food production and disposal.

Aluminium production emits relatively low amounts of greenhouse gases
Aluminium production emits relatively low amounts of greenhouse gases compared to other metals. Additionally, the recycling process for aluminium foil generates fewer emissions compared to producing new aluminium. Using recycled aluminium foil further reduces the carbon footprint associated with its production and disposal.

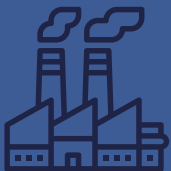

Switch to Aluminium Trays: Lighter, Greener, and Perfectly Sealed!

While some plastic packaging is recyclable, many types are not, leading to a large amount of plastic waste in landfills.

Some plastic food packaging release harmful chemicals when heated.

Plastic food packaging requires substantial energy, increasing greenhouse gas emissions and climate change.

Aluminium can be recycled unlimited times, the quality loss is limited, and can maintain its original characteristics.

Aluminium does not produce any harmful chemicals when heated or used for cooking.

Aluminium trays are not only versatile but also microwave-safe when used correctly.

**TRADING
WORLDWIDE**

Sustainability

Our mission is to become a purpose-led, values driven, sustainable business; by developing a regenerative mindset to adapt to a rapidly changing world through innovative business models.

As a purpose lead business with sustainability at the heart of everything we do, we want to have greater positive and regenerative impact on the world.

RESPONSIBLE

We balance the needs of people, plant and prosperity

CAPABLE

We act as an extension of your team

TRUSTED

We invest in developing long-term relationships

INFORMED

We will help you safely navigate an ever shifting landscape

SUPPORTIVE

We will provide you with all the practical help you need

AMBITIOUS

We will take you further to explore new possibilities

Malawi Water – Borehole Project

We work with and support charities bringing **fresh water** to remote villages in **Malawi**.

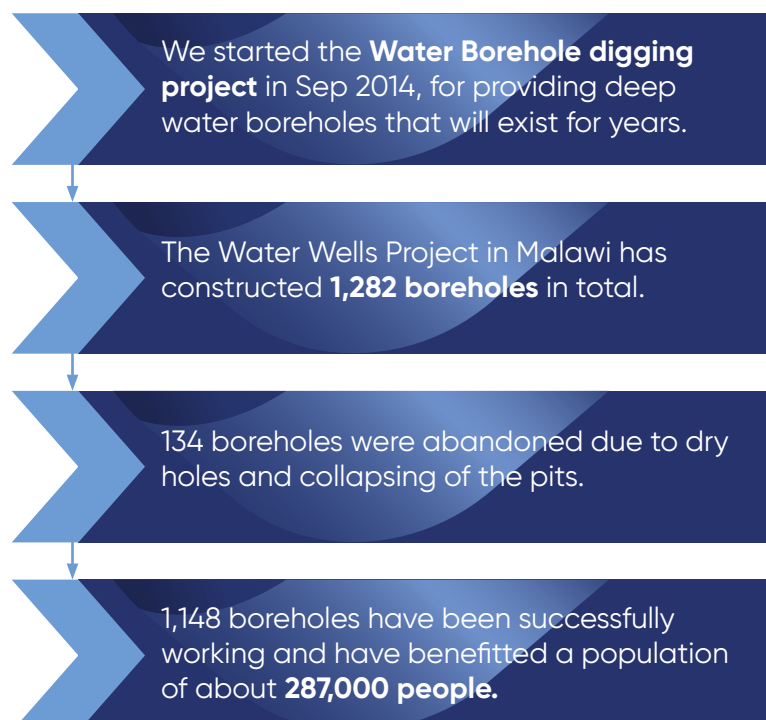

In Malawi, more than **13 million** people have no **access to clean water**.

Over 80% of the population live in rural areas and still drink water from unprotected sources. This increases the risk of outbreaks of water-borne diseases.

Children, in particular, suffer from water-borne diseases in the country.

Achievements:

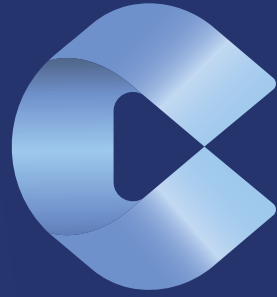

Clean, accessible water for all is an essential part of the world we want to live in.

COMPATIBLE LIDS AVAILABLE

Our Aluminium lids come in a variety of shapes and sizes, suitable for many different containers and trays. We can produce and supply Foil backed lids, PE 2 sides lids, PET lids and also lidding film. We can also supply printed lids for an enhanced product appearance.
