

EXPOSE THE HIDDEN POTENTIAL WITHIN YOUR MANUFACTURING.

Through the course of two decades, LineView's ultimate goal has remained the same: complete digital manufacturing improvement through better information, better focus and better resolutions. We add value and clarity for high-speed line operations and the people who run them, because we know the challenges first-hand.

EFFICIENCY

Gather data automatically from machines to understand efficiency.

LineView

Fully integrated line information system, identifying the highest impact opportunities for targeted productivity gains

- ✓ Integrated monitoring and analysis with live trending
- ✓ Comprehensive reporting suite with ready-to-use reports
- ✓ Powerful True Causal Loss and 6- Loss insight
- ✓ Modular and scalable solution for roll-out success

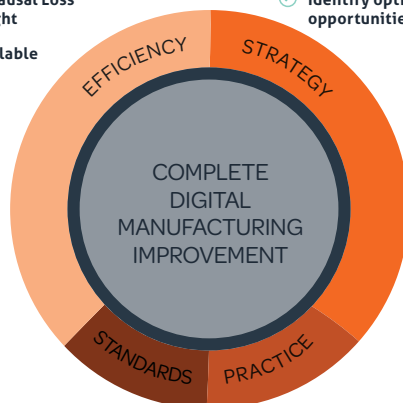

STRATEGY

Transform data into manufacturing intelligence.

EnterpriseView

Transform data into value with EnterpriseView, a complete Business Intelligence toolset to create context in manufacturing data and analysis.

- ✓ Ingest enterprise-wide data into the cloud to create a structured dataset for analysis
- ✓ Integrate a future-ready BI suite designed for AI-powered insight
- ✓ Identify optimisation and improvement opportunities across the enterprise

STANDARDS

Gather manual and automated data to meet compliance requirements.

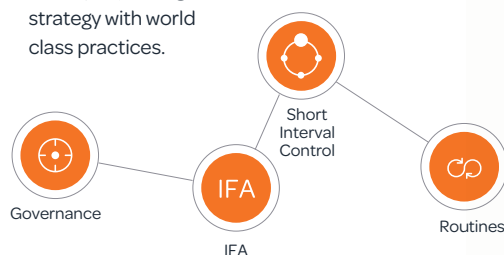

DigiView

Transform production checks from spreadsheets into a digital, Industry 4.0 ready process.

- ✓ Instant performance feedback
- ✓ Easily configurable checks
- ✓ Enterprise-wide traceability
- ✓ Tactical and strategic analysis

PRACTICE

Underpin your digital strategy with world class practices.

ROI YOU CAN COUNT ON:

1

Efficiency improvements up to 20% < 24 months

2

Average improvement of 6% across installations

3

ROI on logistics-based savings alone

4

Consistent yield and quality improvements

WHAT TO EXPECT:

Cost Avoidance & Lower Cost Per Unit

Business Efficiencies with OEE% Gains

Senior Management Up-skilling

Higher Operational Capacity

Strategic Operational Focus

Digitised Standards and Quality Checks

Planning for the Factory of the Future?

IT'S ABOUT MANUFACTURING INSIGHT.

Best of breed - a truly open, flexible system that's future-ready.

Our approach to complete digital manufacturing improvement is more than a single KPI, it is a new way of thinking about your manufacturing intelligence. We use best of breed software and systems that are open and flexible. Constantly evolving, this method reduces risk - moving toward a low-code, no-code ecosystem that's plug and play.

FOCUSED AI

Never before possible, artificial intelligence combined with 20+ years of line monitoring insight enables your team to focus on what's important

POWERFUL CORRELATION

In a 100% digital environment, every element of the process can be searched, mined for insight and correlated for previously hidden opportunities

PROACTIVE, NOT REACTIVE

No longer need to view and interpret the data, the system will provide insights, alerts and recommended actions to optimise your performance
