

## **INCREASE SAFETY, STORAGE AND EFFICIENCY WHEN HANDLING AND WAREHOUSING PACKAGING**

The Aisle Master articulated forklift is designed specifically for warehouses and provides ease of movement through very narrow aisles.

Our Combilift range of forklifts makes easy work of packaging and turns storage space into a profit zone and can help you optimise your racking layout and reduce aisle widths down to as little as 1.6m, to dramatically increase your storage capacity by up to 50%.

### **1.6M NARROW AISLE WITH AISLE MASTER**

High quality, robust construction of chassis and mast means Aisle Master are designed to withstand heavy-duty use inside and out.

With the ability to operate in very narrow aisles in the warehouse – as narrow as 1.6m – the Aisle Master articulated forklift increases and maximises storage capacity.

## **INCREASE YOUR STORAGE CAPACITY BY UP TO 50%**

When you require additional warehouse space, you have two options -extend your existing facility or move premises. With an Aisle Master articulated forklift, you have a third option.

By optimising your racking layout and reducing aisle widths down to as little as 1.6m, you can dramatically increase your storage capacity within your existing facility.

Greater reach and capacity means 50% increase in warehouse storage and reduced costs

### **COMBI-WR & COMBI-WR4**

The COMBi-WR & WR4's excellent ergonomics make them easy and stress free to operate. The unique patented multi-position tiller enables push button rotation of the rear wheel parallel to the chassis and back, allowing the operator to remain in the safest possible position when placing and picking in narrow aisles, namely at the side of the unit rather than between the truck and the racking.

## COMBI-CS

Equipped with our patented multi-position tiller arm, the Combi-CS offers safer operation by providing full visibility of the load and forks, while maintaining full steering control, providing the user with greater awareness of their surroundings which enhances overall safety

*"It's a great improvement on the previous system: the ability to pick from racking and load directly to HGVs in the yard is particularly beneficial as this eliminates double handling and really speeds up operations across the twelve hour shifts that the trucks put in."*

*Operations Manager Noel Finnegan, AGS Packaging*

## FREE WAREHOUSE OPTIMISATION SERVICE

Combilift's concept is built around the efficient use of space. Our articulated technology alone can double the capacity of any warehouse. Our Free warehouse optimisation solutions can dramatically increase storage and improve productivity in your warehouse.
