

COLLECTION AND RECONDITIONING OF IBCS

Save time and money with ease.

The SCHÜTZ TICKET SERVICE is your global solution for the return of empty containers. As the supplier of the world's most successful IBC system, we offer **free collection** and **eco-friendly reconditioning** within the scope of our collection service.

Benefit from SCHÜTZ's efficient service –
your advantages:

FAST

- IBC collection within a few working days
- Get the right information instantly: with our producer-operated service you have a direct contact person for all queries and details concerning the collection of your IBCs
- Easy ordering either online, through the app, by e-mail or phone

FLEXIBLE

- IBC returns, from small quantities to full truckloads
- Need a special pick-up time? Contact us!
- Do you require special logistics solutions or have individual specifications for your IBC collection system? We can help!

WORLDWIDE

- Collection and reconditioning of IBCs in all major industrial regions around the world
- SCHÜTZ has its own global network of reconditioning and production sites for original SCHÜTZ components
- Standardised global service quality

SUSTAINABLE

- Our reconditioning processes comply with the highest environmental and safety standards
- We preserve valuable natural resources through IBC recycling and guaranteed traceability of reused containers
- The entire inner bottle with outlet valves and caps is replaced with original SCHÜTZ components – all reconditioned IBCs offer complete product safety

Benefit from our intelligent recycling system.

By returning your empty IBCs through the SCHÜTZ TICKET SERVICE you are making an active contribution to lower costs, high quality standards, safe recycling material flows and improving the eco-balance of packaging in your supply chain.

As RECOBULK, the SCHÜTZ IBCs provide complete product safety again. The UN approval for the container is extended for a further five years.

5

Reuse

4

Reusing the steel grid and pallet

The steel components are thoroughly cleaned and repaired if necessary. Replaced plastic or steel components are recycled for materials.

SCHÜTZ

ECO BULK / REGO BULK

This is how it works:

Register on our website at www.schuetz.net/ticket and we will send you a customer reference number which identifies you as disposer of empty IBCs. Registration is free of charge and non-binding. You will also find our current collection and service terms on the website.

Order a collection

1

With your customer reference number you can order the collection of your emptied IBCs. This can be done online, through our website or the app, by e-mail or phone.

Your IBCs are collected

2

Collection will take place within a few days. We will get in touch if there are any questions or to arrange a collection time.

Replacing the inner bottle

3

All components that came into contact with the filling product – e.g., the inner bottle, screw caps and valves – are replaced with new original components.

Now we are only one scan away.

You can order the collection of your emptied IBCs even more conveniently now with our new SCHÜTZ TICKET SERVICE label. Simply scan the QR code with a web-enabled mobile device to be connected directly, in your own language, to the website of the responsible service station.

JUST CALL US!

www.schuetz.net/ticket

On the back of the label cover sheet, which is easy to remove due to the perforation, you will find our world wide phone numbers in an overview. This enables you, for example, to contact us from the comfort of your workplace to ask questions about our service or to make collection orders with us directly.

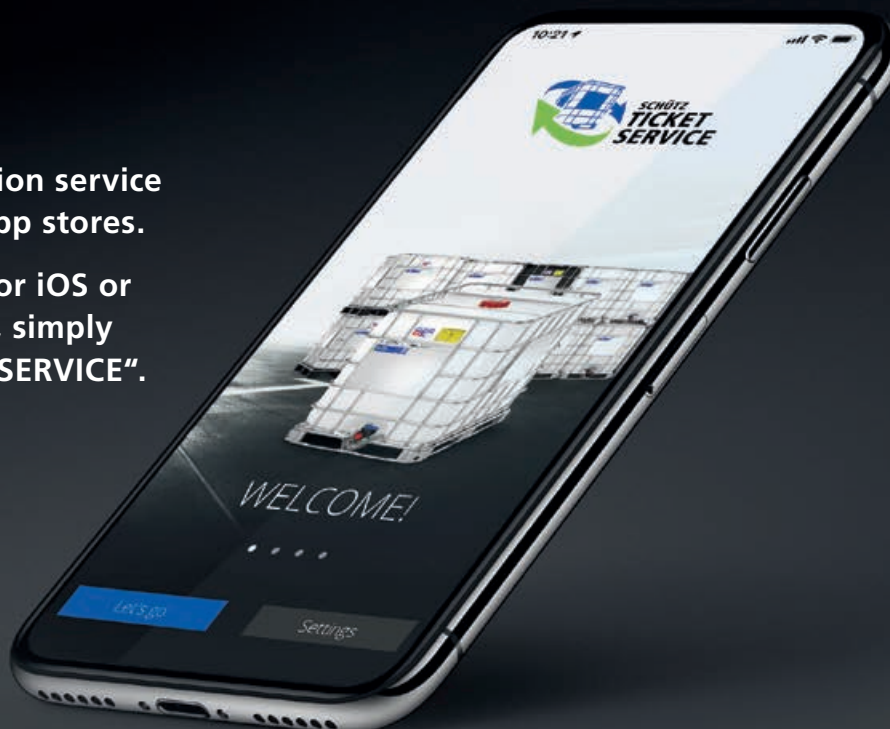

Download on the
App Store

GET IT ON
Google Play

Order IBC collections **via app**

Our easy-to-use collection service app is available in all app stores.

To download our app for iOS or Android free of charge, simply enter "SCHÜTZ TICKET SERVICE".

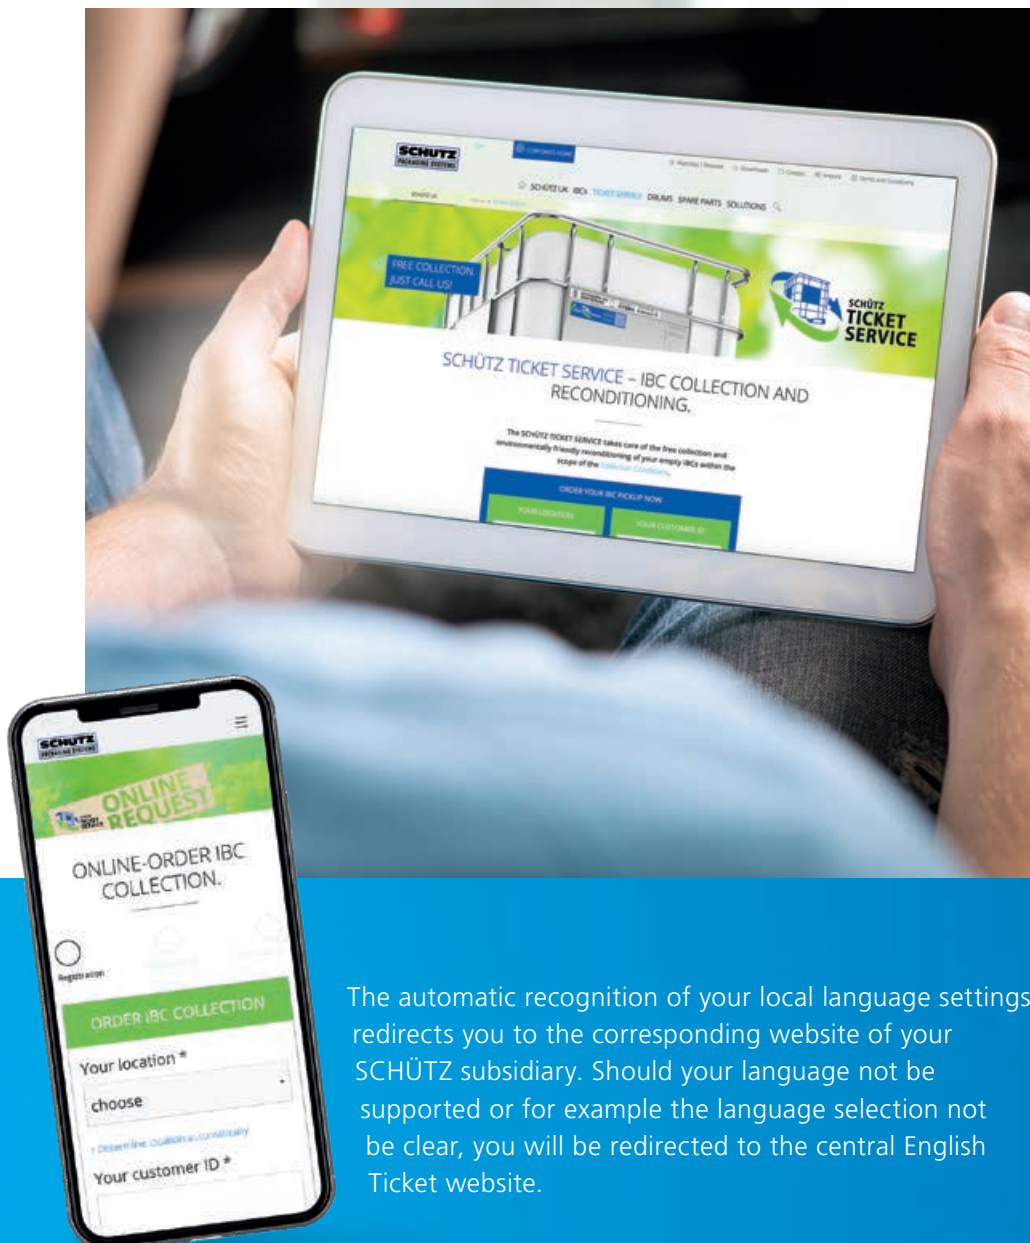

Many **app advantages**

- All orders sent from the app in a convenient overview
- Easy copying, editing and resending of orders
- Practical container check with example pictures
- Direct contact to all service stations

Our website – **your central starting point for the best service.**

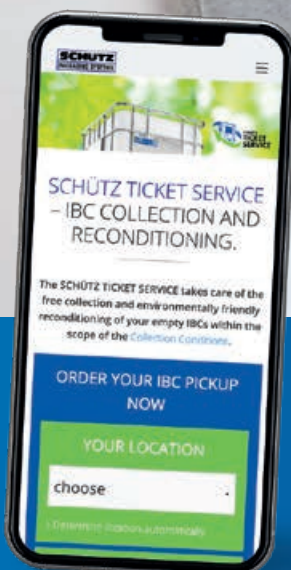

Whether you visit our website via the QR code or by entering the link manually on www.schuetz.net/ticket, you will find information, order possibilities, the online registration and our terms of collection, at all times.

The automatic recognition of your local language settings redirects you to the corresponding website of your SCHÜTZ subsidiary. Should your language not be supported or for example the language selection not be clear, you will be redirected to the central English Ticket website.

Order online, via e-mail or by phone

Your SCHÜTZ service station can easily be selected via a browser or manually on the homepage. The correct e-mail address and telephone number will immediately appear, for you to order your collection. Especially practical on your mobile phone: one more click to open the mail program, or the number is dialled.

Online registration and order form

The collection can be ordered directly via the online order form. Should you be a new user, you simply need to register free of charge and non-binding to receive your customer reference number via e-mail – for easy and fast collection orders in the future.

Eco-friendly reconditioning with original components.

The use of original SCHÜTZ parts to replace used components ensures the highest standard of safety, and the new UN approval for the container is valid for a further five years.

RECOBULK

New original screw cap

Brand new original inner bottle

New label plates are attached

Steel grid is cleaned

New original sealed outlet valves

Cleaning; replacement of the corner guards if required

Components that cannot be cleaned or are damaged are replaced and recycled for materials.

Cleaning and, if required, repairs

The used inner bottles are removed and reground in a closed-cycle washing and cleaning process to produce pure HDPE granulate.

100 % material recycling

RECOBULKS are only reconditioned on state-of-the-art production lines using certified processes in compliance with the highest environmental and safety standards.

Better environmental balance

Global collection and reconditioning helps to protect natural resources and saves hundreds of thousands of tonnes of greenhouse gases every year. Each RECOBULK saves approx. 100 kg of CO₂ emissions compared with a new IBC.
