

# ALL-IN-ONE

ULTRA COMPACT BAGGING  
AND PALLETIZING

ULTRA COMPACT BAGGING AND PALLETIZING

Worldwide supplier of bagging and palletizing end of line solutions

## ULTRA COMPACT BAGGING AND PALLETIZING

The ALL-IN-ONE robot is one of the market's most compact solutions for automatic bagging and palletizing. It can handle all sorts of valve bags: paper, PP or PE from 5 to 50 kg. This robot is particularly suited for bagging of powdery and free flowing products: flour, starch, yeast, milk powder, pre-mixes for bakeries, vitamin correctors, mortar, fertilizer, fine chemicals, PVC, pigments, etc.

## THIS INGENUOUS ROBOT HANDLES THE WHOLE PROCESS

- It picks up the empty bag
- It presents the bag to the filling spout
- It palletizes the filled and closed bag

## OPTIONAL FEATURES

Ultrasonic sealing valve

- Ultrasonic sealing valve. Closes the bag hermetically to avoid any product contamination or leakage from the bag
- Hygienic design
- Corrosive and abrasive protection
- Additional tool for slip-sheet dispensing
- Additional tool for an empty pallet dispenser.

PAYPER can personalize and adapt the installation according to your individual needs.
