STAINLESS STEEL TANKS

Featuring all Stainless Steel Construction

Fallsdell Machinery Pty. Ltd. has been designing and manufacturing stainless steel tanks for the pharmaceutical, cosmetic, food, chemical and allied trade industries since 1981.

The Stainless Steel Tank Specialists

FEATURES

- All S/S Construction
- 316 S/S Shell
- 304 S/S Frame
- Double Welded Seams
- Radius Corners
- Fully Polished
- BSP Male Outlet
- 600mm Outlet Height
- Sani-Lid Manway on T.E. Tanks

OPTIONS

- Dimple Jacketed Side & Bottom
- Steam Coils
- Baffles
- Mixer Bracket
- Sight Glass
- Lids
- Mixers
- Outlet Size & Type
- Frame Design
- Chemical Grade to Pharmaceutical

Conical Bottom Angle Frame

Sloping Bottom Angle Frame

Totally Enclosed Tubular Frame

EMULSIFIERS

NEW, IMPROVED HYGIENIC HI-FLOW DESIGN

Featuring all stainless steel construction, these heavy duty, high shear Emulsifiers are especially suitable for Food, Chemical, Cosmetic and Pharmaceutical processes requiring rapidly produced Solutions, Gels, Suspensions or Homogenous Emulsions.

Batch Type Emulsifier

Products:

Creams
Lotions
Gels
Sauces
Mustards
Mayonnaise
Dressings
Soups
Shampoo
Conditioner
Gums and Resins
Glues and Adhesives
Soaps and Detergents
Oils and Greases
Inks and Dyes
Insecticides
Oils
Flavours
Beverages
Polishes
Varnishes
Paints
Dairy

In-line Emulsifier

Features:

- 316 grade polished stainless steel wetted parts
- New hygienic quick clean design, no tools required
- High flow impeller
- Interchangeable screens
- External seal design
- IP56 rated T.E.F.C. motors

Options:

- Flameproof motors, Exe or Exd
- Interchangeable head and screen designs
- Shaft length (RB) only
- S/S motor cover and trolley (RC only)

Emulsifiers are used for the rapid disintegration of solids, reduction of agglomerates and production of stable emulsions, gels and suspensions in either batch or continuous processes.

How the Emulsifier works:

The mixing cycle is divided into three stages, the first being when the materials are drawn into the mixing chamber and subjected to intense mixing in the chamber by the high speed rotor. The second stage occurs when the materials are expelled through the perforated screen and subjected to intense shear at extremely high velocity by the rotor blades. The third stage is the expulsion of the processed ingredients with great force and velocity into the body of the mix or into the recycling vessel.

POWDER PLUS DISSOLVER

INDUCT

PREMIX

DISSOLVE

EMULSIFY

incorporating our tried and proven hygenic hi-flow design in-line emulsifier, the
Powder Plus Dissolver
will induct powders and liquids, premix, dissolve and emulsify all in one operation

Features:

- Made in Australia
- 316 grade polished S/S wetted parts
- Stainless Steel mobile trolley
- 50 ltr stainless steel hopper
- Hygenic quick clean design
- No tools required
- High Flow impeller
- Interchangeable screens
- External seal design
- IP66 Rated T.E.F.C motors

Options:

- Stainless steel motor
- Flameproof motor, Exe or Exd
- Double flush seals

Model	PPD40	PPD75
Motor (k.w.)	4.0	7.5
Capacity L/m*	350	600
Liquid Inlet (dia.)	38	50
Hopper outlet (dia)	50	63
Product outlet (dia)	38	50

*Based on water.

How the Powder Plus Dissolver works:

The Powder Plus Dissolver will draw powders and liquids under vacuum from the stainless steel hopper into the product liquid stream. This is achieved by the specially designed induction venturi manifold. The manifold pre-mixes the powder and liquids then emulsifies all in the one inline operation.

DRUM TUMBLER

The Fallsdell Machinery Drum Tumbler utilizes standard 200L s/s seamless drums. This allows the operator to fill, seal, mix and store all in the container ensuring no cross contamination and double handling of product.

The mixing action turns the product over while the tumbling action eliminates the need for drum baffles. Drums can be manoeuvred from an upright position into and out of the mixing station without the need for heavy lifting.

The hoop is placed over the drum and clamped into position with adjustable toggles.

The motorised base is fitted with the machine rollers to accept hoop. Tumbler is driven by a geared motor.

The hoop containing the drum is rolled up the ramp into the mixing position, mixing then occurs. Reverse the procedure to unload.

ALL STAINLESS STEEL CONSTRUCTION

Ideally suitable for the pharmaceutical, cosmetic, food and chemical industries. The tumbler will mix and blend both dry and wet powders, granules, slurries, supplements etc.

DRUM ROLLER

OPTIONS

- Flameproof motors
- NEW 200L s/s drums
- Fully seal welded baffles (For a more intense mix)

Suitable for mixing and blending of powders, granules, liquids, slurries etc., ball milling and coating.

FEATURES

- Suitable for 200L (44gls) drums
- Adjustable idler to accept smaller drums
- End safety roller
- Available with .37kw single phase or three phase motors

FLUID MIXING EQUIPMENT

PORTABLE RANGE

FEATURES

- Nose cone with steady bearing standard on SSP
- Stainless Steel Coupling
- New design universal swivel clamp
- 316 grade stainless steel balanced shaft and propellers
- IP55 electric motor protection

Proper position of mixer shaft to give a thorough mix without drawing air into the liquid.

Position of mixer shaft to cause a vortex for drawing into liquid, light powders, gas or air.

The above range of Mixers are all fitted with a universal swivel clamp which allows the shaft and propellers to be located almost anywhere in the tank by releasing one nut, making off-centre mixing possible.

High Speed Mixers

MIXER STANDS

Manufactured from stainless steel, these fully adjustable mixer stands provide a free standing or mobile mixer support system, giving you a wide variety of mixing positions and easily adjusted to suit your tank or mixing level.

MIXER OPTIONS

- Air Motors
- Flameproof Motors
- Top Entry right angle drives
- Slow Speed Paddles or Turbines
- Side Entry Mixers – Medium Range Mixers
- Corrosion Resistant Materials & Coatings
- Electronic Speed Control
- Scrape Surface Paddle Mixers
- Computer Designed to suit your Tank and Product
- All Mixers Designed and built in Australia
- Full range of Propellers and Paddles available

 **HOLLAND**[®]
Tabletting Science

TABLET PUNCHES & DIES

For 60 years, **I. Holland** have supplied punches and dies for every type of tablet press to pharmaceutical, nutraceutical and confectionery industries around the world.

Using specially developed materials of the highest quality, **I. Holland** combine the latest manufacturing process with state of the art Quality Assurance Technology to bring you tooling that delivers outstanding performance.

I. Holland have set the standard to which the tooling industry aspires, helping tablet manufacturers to achieve ever increasing quality and productivity targets.

Coating treatments and steel selection for improved:

- Wear resistance
- Corrosion resistance
- Anti-stick properties
- Surface hardness

PUNCH POLISHING

Polishing tablet punches takes up valuable time and can be a Health & Safety risk.

I. Holland recognise the considerable value of punches and the importance of keeping them in excellent condition. We are therefore pleased to be able to offer an extensive range of automatic Micro-Fine polishing machines.

Using a simple yet effective process, tablet punches are loaded into specially designed fixtures which are then rotated through a compound of particiles to achieve a Micro-Fine finish. Up to 60 punches can be polished in one cycle (approx. 30 minutes) with consistent results every time.

NEW Pharma range of MF Polishers designed exclusively for the pharmaceutical industry. Encased in stainless steel, this new range offers the benefit of a fully enclosed operational area with a stainless steel hood to contain any dust particles and an optional extractor fan.

The MF Polishers are ideal for use in the punch and die maintenance room offering many benefits including smoother operation and improved efficiency within the tablet press, reduced polishing man-hours and less risk of 'over-polishing'.

Versatool Storage Systems

Modular Storage Systems for Pharmaceutical and Nutraceutical Punch & Die Tooling.

Our high quality Versatool storage cabinets and enclosures incorporate a range of alternative inserts to accommodate all types of tablet press punch & die tooling (B,D,F, Kilian & IMA) used in the modern pharmaceutical and nutraceutical environments.

iTAB is I Holland's new "Windows" based tablet design aid that calculates basic tablet parameters and stress analysis for Rounds and Shapes in 3 easy steps.

Users are not required to possess any technical expertise or have any formal training, as iTAB is very user friendly and intuitive throughout.

SPIRAL RIBBON BLENDER

FOR INTIMATE BLENDING OF FOODSTUFFS, CHEMICALS, COSMETICS, PHARMACEUTICALS, ETC.

RIBBON MIXER WITH
STAINLESS STEEL
FRAME

**RUGGEDLY BUILT OF STAINLESS STEEL,
THESE BLENDERS FEATURE THE
FOLLOWING ADVANTAGES:**

- Capacities from 50 to 2,500 kilograms
- Rotors with double-spiral ribbons
- Standard butterfly-valve discharge
- Heavy-duty construction for durability
- Fallsdell's proven hygienic gland assembly
- Lid, internal grill and safety switch are standard on all models
- Wide variety of optional equipment
- Sanitary internal finish with radius corners

OPTIONS

- Stainless steel frame
- Dimple jacketed bowl
- Spray bars

SPIRAL RIBBON BLENDER

PACKING GLANDS: Our specially designed sanitary packaging gland is fitted to all blenders. The gland features an “easy-clean” system that enables the components in contact with the product to be quickly dismantled for sanitary cleaning. When the gland is dismantled a large orifice in the end wall is revealed through which the rotor shaft passes, thus enabling quick and easy cleaning, in this problem area of blenders.

BLENDING TIMES: Fallsdell’s tried and proven rotor design ensures quick and efficient blending. Blending times depend entirely on individual mixtures but, generally speaking, lie within the range of 10 to 25 minutes.

The removable Spiral Ribbon rotor with clean, crevice-free design to lessen powder build-up on the ribbon blades.

STAINLESS STEEL ROTARY MIXER

WITH STAINLESS STEEL FRAME

**Suitable for Mixing Powders, Granules, Slurries, Spices, Dry Fruit and Nut Mix,
Roasting Nuts, Coating Products and many more**

Features:

- 90 ltr Capacity
- 316 Stainless Steel Bowl
- Full Stainless Steel Frame
- 0.55kW, 240 Volt single phase motor
- Direct motor / Gearbox drive
- 3 Mixing Baffles
- Tipping Bowl
- Easy Discharge
- Mobile with pneumatic tyres
- Suitable for small batches

New Design:

- Shaft mounted direct drive geared motor
- Reduced noise
- No pinion or bevel gears
- Low maintenance gearbox

STAINLESS STEEL ROTARY MIXER

WITH PAINTED FRAME

- Available in 60 ltr or 90 ltr Capacity
- 316 Stainless Steel bowl
- Single phase 240 volt Belt Driven
- Fully welded tube and round bar frame
- Easy maintenance
- Mobile with pneumatic tyres

**MADE IN
AUSTRALIA**

ROTARY MIXER FEATURES

- 3 Removable mixing baffles
- Contoured baffles to ensure mixing of small batches
- 440mm diameter opening
- Heavy duty construction

Options for all versions

- Removable lid
- Larger motor/gearbox
- 3 phase motors
- Custom made mixing bowls

FLOMAX PUMPS

**TWO MODELS PROVIDE A CAPACITY RANGE TO OVER
450 litres/min. (27,000 litres/hour)**

FLOW GRAPH (water)

— 2880 RPM — 1440 RPM

FEATURING:

- All wetted parts polished 304 stainless steel
- Simple smooth internal parts for easy flushing and cleaning
- Quick-acting clamps allow stripping in a few seconds — without tools
- Long life shaft seals — trouble free "O" ring body seals
- Outstanding simplicity giving low cost and easy maintenance
- Flange mount direct to metric or imperial electric motors, air motors, hydraulic motors, etc.
- All wetted parts are food quality materials

- Statistical calculation function
- Multiple weighing units
- GLP, GMP, GCP, ISO compliant
- Counting function with ACAI
- Auto Power ON/OFF function
- Under hook for suspended weighing
- RS232 Data Interface
- Internal Calibration (F2i versions)

FXi/Fxi - WP Series

Model	Capacity	Resolution	Pan Size
FX-300i	320g	0.001gm	130mm ø
FX-500i	520g	0.001gm	130mm ø
FX-3000i	3200g	0.01g	150mm ø
FX-5000i	5200g	0.01g	150mm ø
FX-300iWP	320g	0.001g	130mm ø
FX-3000iWP	3200g	0.01g	150mm ø

Moisture Analyser

- Fast & Uniform Heating
- Halogen Heating Lamp
- SRA - Secondary Radiation Assist Technology
- High Repeatability 0.01% (Std. Devn.)
- Standard WinCT-Moisture Software
- Sodium Tartrate Dihydrate sample for Accuracy Check
- Heater Temperature Calibration MX
- Memory Function
- Four Measurement Programs
- Clear & Easy To Read VFD Display

Model	Capacity	Resolution	Pan Size
MX-50	1~51 g	0.001 g	ø 85 mm
MF-50	1~51 g	0.002 g	ø 85 mm
ML-50	50 g	0.005 g	ø 85 mm
MS-70	70 g	0.0001 g	ø 85 mm

FCI Series — Counting Scales

- Internal Resolution 1/1,000,000
- High Display Resolution
- Automatic Counting Accuracy Improvement

- Store and Retrieve up to 500 ID Units and Tare Weights
- Additional Remote Platform Option
- Built-in RS-232
- Two-Key Operation for Ease-of-Use
- Programmable Data String

Model	Pan Size
FC-500Si 500 g (min piece weight 0.00005 g)	128 x 128 mm
FC-5000Si 5000 g (min piece weight 0.0005 g)	165 x 165 mm
FC-5000i 5000 g (min piece weight 0.001 g)	300 x 280 mm
FC-10Ki 10 kg (min piece weight 0.01 g)	300 x 280 mm
FC-20Ki 20 kg (min piece weight 0.02 g)	300 x 280 mm
FC-50Ki 50 kg (min piece weight 0.05 g)	300 x 280 mm

GP Series — Industrial Precision Balance

- Very Fast Response Using Super Hybrid Sensor
 - Swing Arm Display
 - Water and Dust Resistant - IP65 Standard
 - Time and Date from Internal Clock
 - Standard RS232C Interface for Printer or Computer
 - Comparator with HI / OK / LO Indication
 - GLP / GMP / ISO Compliant
 - Accumulation of Weighing Results
 - Internal Calibration by Motor Driven Mass
 - Supplied complete with WinCT Free Software Package
 - NSC approved versions available
- * Detachable display units available

Model	Capacity	Resolution	Pan Size
GP-12KA	12 kg	0.1 g	384 x 344 mm
GP-20KA	21 kg	0.1 g	384 x 344 mm
GP-32KA**	6.1/31 kg	0.1/1 g	384 x 344 mm
GP-30KA**	31 kg	0.1 g	384 x 344 mm
GP-61KA**	61 kg	0.1 g	384 x 344 mm
GP-40KA**	41 kg	0.5 g	384 x 344 mm
GP-100KA	101 kg	1 g	386 x 346 mm
GP-102KA	61/101 kg	1/10 g	386 x 346 mm

EK - EP Series, IECEx Intrinsically Safe Balances

- Easy Read LCD Screen
- Stainless steel pan and top cover
- Counting Feature
- Built in Comparator
- Battery Operated

Model	Capacity	Resolution	Pan Size
EK-300EP	300gm	0.01gm	110 mm
EK-3000EP	3000gm	0.1gm	133 x 170mm
EK-12KEP	12kg	1gm	133 x 170mm

AD 8121 — Statistical Printer

- Statistical Software
- Print Interval Timer
- Calendar Functions
- Graph Printing Capability
- Accepts RS232C or Current Loop
- Impact Dot Matrix Mechanism
- Graphic Plotting Included
- Large Paper Roll in Holder

Pallet Scales

- Standard Models 1500 kg and 3000 kg
- Very Low Profile Design
- Optional Loading Ramps
- Strong Construction Allows Capacities to 10 tonne
- Drop Centre Model Available to Order
- Galvanised Frame and Platform
- Choice of Indicators from the Extensive A&D Range
- Certified for Trade
- Choice of Platform Sizes

SF - KA / SF-KB Series Retail Scales

- Dual Rang for Maximum Accuracy
- Liquid crystal or Vacuum Fluorescent display
- Stainless steel weighing Pan
- 30 slot price lookup memory

Model	Capacity	Resolution	Pan Size
SF - 6	3kg/6kg	1/2gm	300 x 280mm
SF - 15	6kg/15kg	2/5gm	300 x 280mm
SF - 30	15kg/30kg	5/10gm	300 x 280mm

Price Computing Scales

- Shock and Overload Protected
- Splashproof Keyboard and Display
- Battery Operation Available
- Dual Range for Best Weighing Accuracy
- Choose from 6 kg/15 kg/30 kg Capacity
- Efficient & Intuitive Operation Gives Fast Checkout Times
- Large Wide Angle Liquid Crystal Display
- Stores 12 Price Look Ups
- Large Stainless Steel Weighing Pan

High Mount Display – SF Model

Model	Capacity	Resolution	Pan Size
*SG-6KA	3 / 6 kg	1 / 2 g	300 x 280 mm
*SG-15KA	6 / 15 kg	2 / 5 g	300 x 280 mm
*SG-30KA	15 / 30 kg	5 / 10 g	300 x 280 mm

FALLSDELL MACHINERY PTY. LTD. are Authorised A&D Weighing Dealers.
