- 20 CASE PACKER | **V150N**

V2 ENGINEERING, NOW PART OF MARCHESINI GROUP BEAUTY, PRODUCES A WIDE RANGE OF MACHINES FROM CARTONERS TO OVERWRAPPING MACHINES AND CASE PACKERS, FOR BOTH STANDARD AND HIGHLY CUSTOMISED SOLUTIONS.

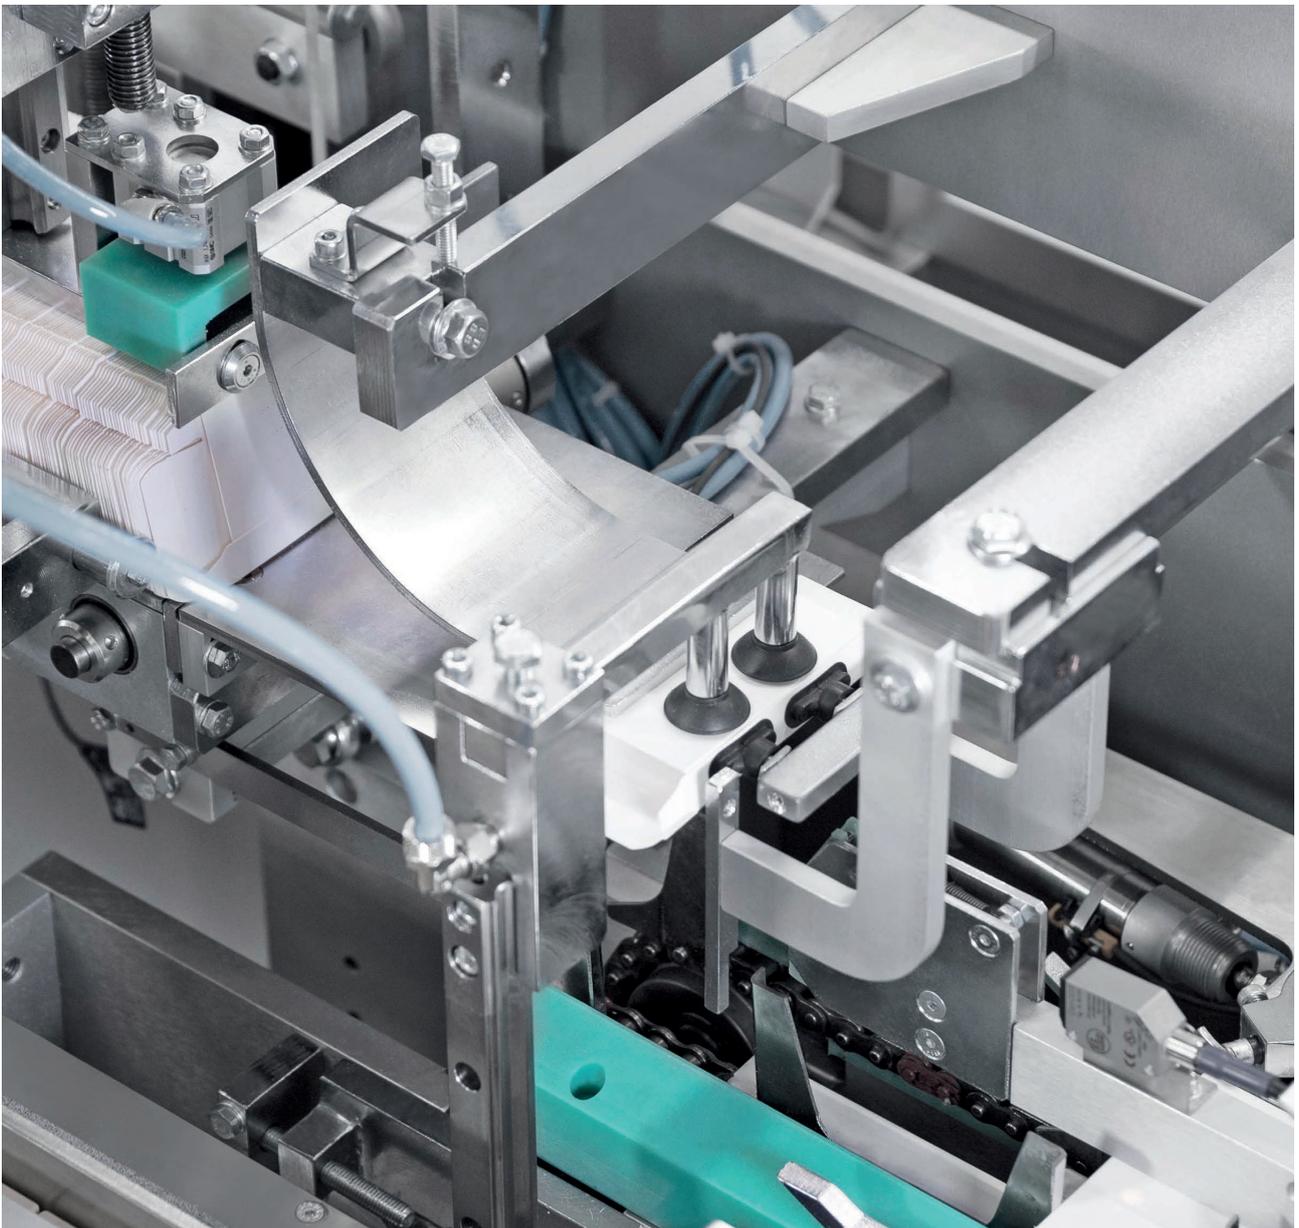

V2 engineering was founded in the early '90s by Carlo Veronesi who gained the extensive experience to set up his own company after having worked, for a long period of time, with a leading manufacturer of automated machinery, in Bologna.

Veronesi's production initially focused on cartoning machines then it evolved to satisfy new market demands. Today V2 engineering produces a range of machines which are constantly developed and updated. It goes from overwrapping machines to case packers, for both standard and highly customised solutions for the cosmetic industry.

The level of care put into the search of innovation is the same used for every step of the process: from the initial design phase to production, until the testing and inspection of the machines.

V2 engineering sets great store by after-sales support, paying the maximum attention to the customers' needs and requests. Throughout the whole process, customers are constantly updated and made active part of it.

In 2019, V2 engineering became part of the Marchesini Group, adding value to its already wide range of machinery and contributing to its expansion into the cosmetic sector.

01

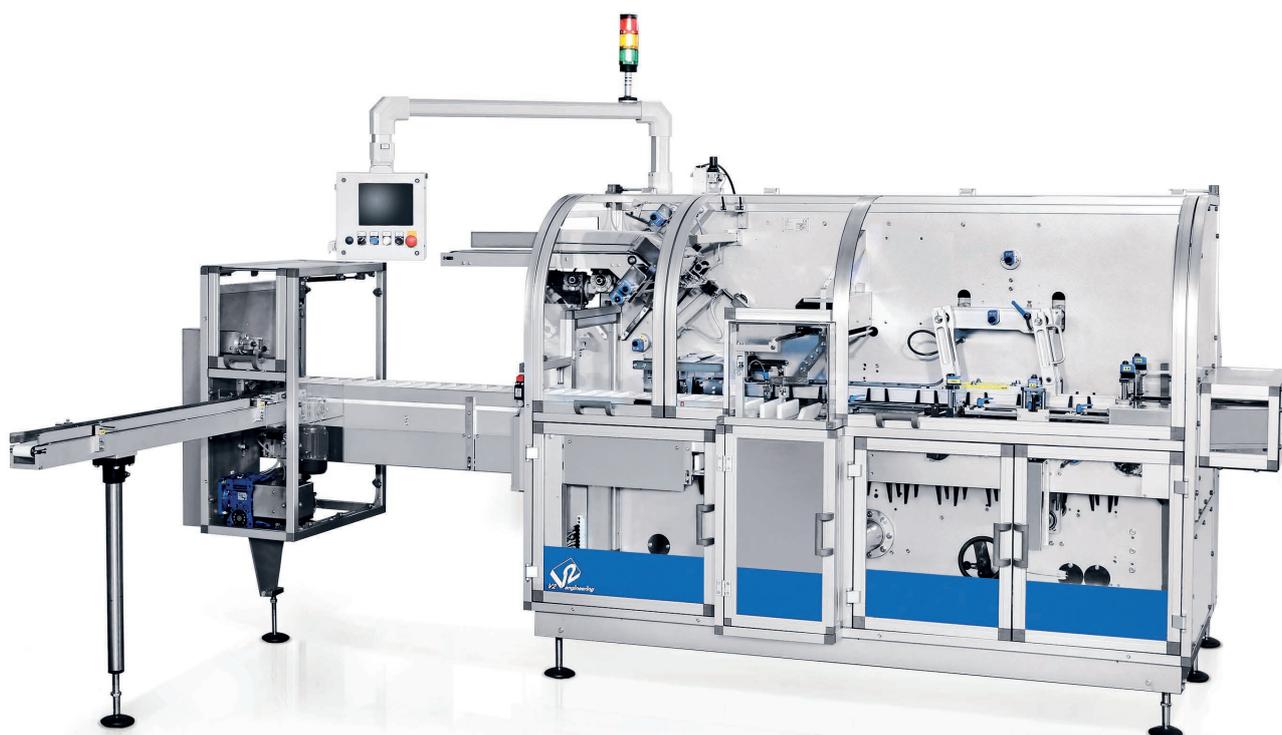

MACHINE SOLUTIONS
CARTONERS

HORIZONTAL CARTONER V CENTOSEI C

Automatic intermittent motion horizontal cartoning machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast change over from operator side
- Touch screen control panel for machine management
- Highly reliable positive carton opening ensures erection of square and/or hard carton with low grammage
- Multiple product feed options (bottles, tubes, lipsticks, mascara, lipgloss, trousse, sachets&stickpacks) as well as different components (leaflets, booklets, etc)
- Wide selection of coding and print systems available (embossing, inkjet, and laser)
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 80 cartons/min

PRODUCT RANGE

Width (A): 30 mm - 140 mm

Height (B): 15 mm - 80 mm

Length (H): 90 mm - 200 mm

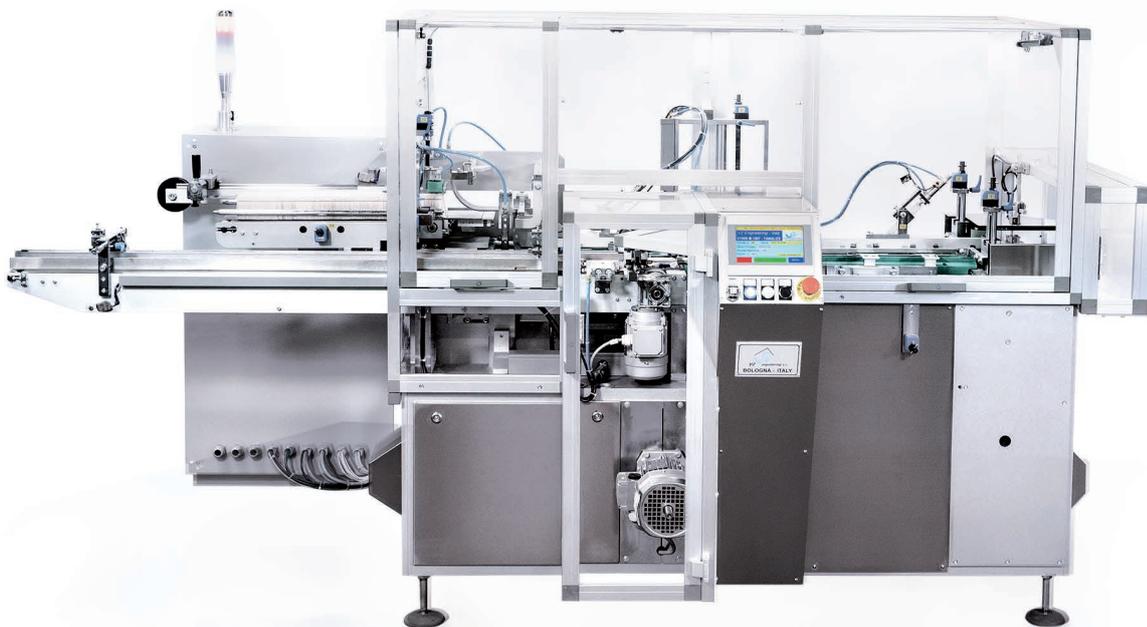

Made by

HORIZONTAL CARTONER V106N

Automatic intermittent motion horizontal cartoning machine.

- Ergonomic construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast change over
- Touch screen control panel for machine management
- Highly reliable positive carton opening ensures erection of square and/or hard carton with low grammage
- Multiple product feed options (bottles, tubes, lipsticks, mascara, lipgloss, trousse, sachets&stickpacks) as well as different components (leaflets, booklets, etc)
- Wide selection of coding and print systems available (embossing, inkjet, and laser)
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 70 cartons/min

PRODUCT RANGE

Width (A): 30 mm - 140 mm

Height (B): 15 mm - 80 mm

Length (H): 90 mm - 200 mm

Made by

HORIZONTAL CARTONER

V2000

Automatic intermittent motion horizontal cartoning machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- Highly reliable positive carton opening ensures erection of square and/or hard cartons and with low grammage
- Cartons transport with rubber toothed belts without friction thereby avoiding scratching or marking carton surface
- Multiple product feed options (bottles, tubes, lipsticks, mascara, lip-gloss, trousse, sachets & stick packs) as well as different components (leaflets, booklets, etc)
- Wide selection of coding and print systems available (embossing, inkjet, and laser)
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 120 cartons/min

PRODUCT RANGE

Width (A): 25 mm - 110 mm

Height (B): 15 mm - 60 mm

Length (H): 55 mm - 200 mm

HORIZONTAL PERFUME SAMPLE FORMING MACHINE

FCP

Automatic intermittent motion horizontal cartoning machine for flat card samples.

- Specifically designed to pack small cosmetic and fragrance products such as vials and plastic tubes into flat sample card for promotional activities
- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- Highly reliable carton pick-up system from magazine
- Cartons transport with rubber toothed belts without friction thereby avoiding scratching or marking carton surface
- Wide selection of coding and print systems available (inkjet and laser)
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 120 cartons/min

PRODUCT RANGE

Width (A): 58 mm - 90 mm

Height (B): 12 mm - 15 mm

Length (H): 80 mm - 100 mm

TOP LOAD CARTONER VERTIPACK

Automatic, vertical intermittent motion cartoning machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- Highly reliable positive carton opening ensures erection of square and/or hard carton with low grammage
- Cartons do not come into contact with fixed parts thereby avoiding scratching or marking carton surface
- Multiple product feed options (bottles & jars in plastic and glass) as well as different components (carton in liners, leaflets, booklets, etc)
- Flexibility for customisation
- Compact-sized machine

HIGH SPEED

OUTPUT

Up to 80 cartons/min (max. 60 cartons/minute with inliner)

PRODUCT RANGE

Width (A): 22 mm - 85 mm
Height (B): 20 mm - 85 mm
Length (H): 40 mm - 200 mm

STANDARD VERSION

OUTPUT

Up to 60 cartons/min

PRODUCT RANGE

Width (A): 22 mm - 110 mm
Height (B): 20 mm - 100 mm
Length (H): 40 mm - 200 mm

02 | MACHINE SOLUTIONS
OVER-WRAPPERS

STRETCH & SHRINK WRAPPER

V40

Automatic intermittent motion stretch banding & shrink-wrapping machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- High quality sealing in terms of stretching resistance, as well as surface result
- Bypass belt for products that must not be wrapped
- Wide size range
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 40 bundles/min

PRODUCT RANGE

Width (A): 60 mm - 300 mm

Height (B): 30 mm - 200 mm

Length (H): 60 mm - 250 mm

Made by

OVER-WRAPPER ECONOWRAP

Automatic machine for overwrapping cartons and regular-shaped single or bundled products.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- High quality wrapping
- Printed film centering device available
- Tear tape unit for easy opening available
- Possibility to over-wrap single cartons or bundles in different configuration: stacks or on-edge grouping
- Possibility to over-wrap naked soaps
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 40 cartons/min

PRODUCT RANGE

Width (A): 40 mm - 120 mm

Height (B): 25 mm - 70 mm

Length (H): 50 mm - 200 mm

OVER-WRAPPER

V122

Automatic machine for overwrapping cartons and regular-shaped single or bundled products.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- High quality wrapping
- Printed film centering device available
- Tear tape unit for easy opening available
- Possibility to over-wrap single cartons or bundles in different configuration: stacks or on-edge grouping
- Possibility to over-wrap naked soaps
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 60 cartons/min

PRODUCT RANGE

Width (A): 50 mm - 210 mm

Height (B): 25 mm - 100 mm

Length (H): 80 mm - 300 mm

Made by

03

MACHINE SOLUTIONS
END OF LINE

CASE PACKER

V140P

Automatic horizontal case packing machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- Highly reliable positive case opening ensures erection of square and/or hard cases
- Reliable bundle grouping system for flat or on-edge cartons achieved with servomotors
- Case sealing with tape or hot melt
- Flexibility for customisation
- Compact-sized machine, with small footprint

OUTPUT

Up to 12 cases/min

PRODUCT RANGE

Width (A): 180 mm - 500 mm

Height (B): 100 mm - 350 mm

Length (H): 130 mm - 350 mm

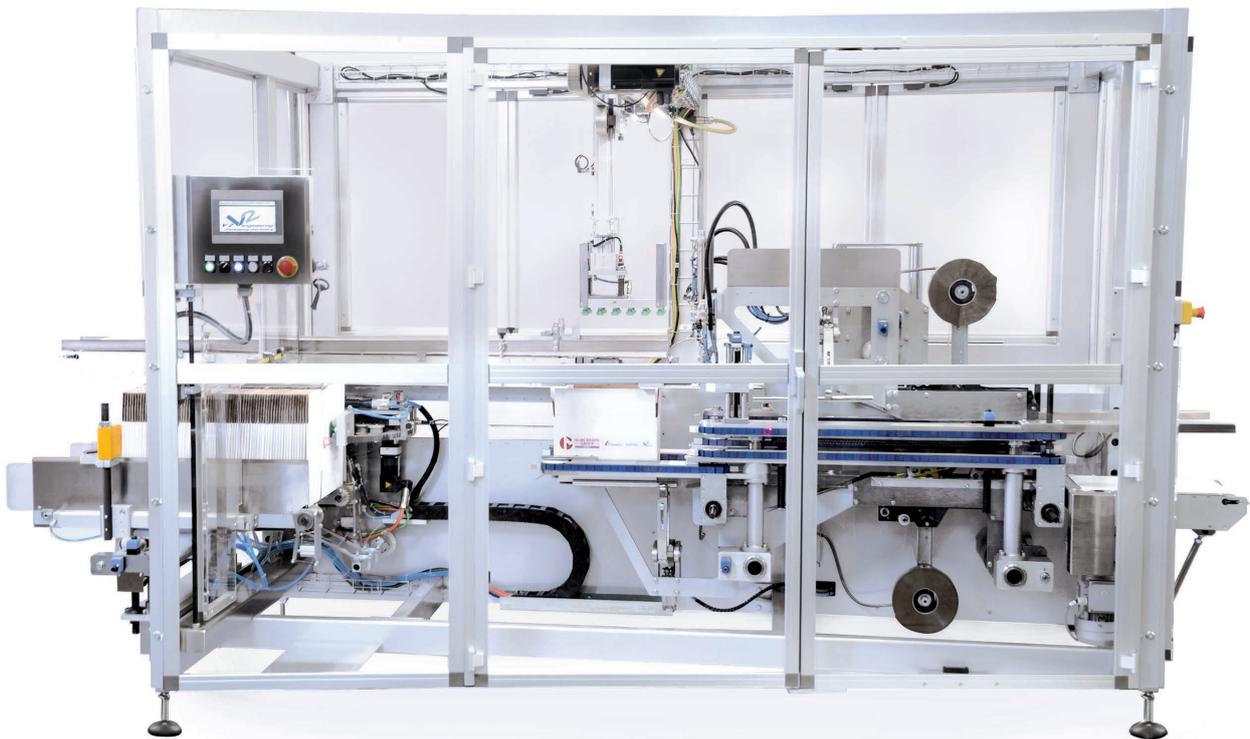

Made by

CASE PACKER V150N

Automatic top load case packing machine.

- Balcony construction for easy access, product visibility, maintenance and cleaning
- Reliable and robust mechanical construction reduces maintenance and prolongs machine life
- Easy and fast changeover from operator side
- Touch screen control panel for machine management
- Highly reliable positive case opening ensures erection of square and/or hard cases
- Particularly indicated for products which must be kept in upright vertical position during packaging process such as bottles, jars, bundles, etc
- Case sealing with tape or hot melt
- Flexibility for customisation
- Compact-sized machine

OUTPUT

Up to 6 cases/min

PRODUCT RANGE

Width (A): 200 mm - 400 mm

Height (B): 120 mm - 300 mm

Length (H): 150 mm - 300 mm

Made by

CARTONERS, OVER-WRAPPERS, CASE PACKERS AND MORE...

V2 engineering is a leader in the field of secondary packaging, with a presence in the most important markets around the world. Our machines are available for both low and high-end productions.

The technical specifications given in this catalogue are subject to change without prior notice or liability. Size range may vary in accordance with the different applications. V2 engineering constantly updates its products to meet market needs.
