Packaging Machinery Made Easy.

PACKSERV.COM.AU

MANUFACTURING

Packserv Manufacturing is the engineering design and manufacturing arm within the Packserv Group, servicing FMCG, Food & Beverage, Pharmaceuticals and cosmetics industries both in Australia and internationally.

Being an onshore engineering design house also means that Packserv has the capacity and facilities to fabricate high quality machines, premium parts and accessories for our customers. Packserv is here to provide the complete solution for your packaging needs.

RENTALS

Packserv has fast become the leading rental and technical service provider in the packaging industry by offering a fleet of equipment that will do almost every part of the packaging process. Small stand-alone machines, bench-top systems or large automated production lines are all available utilising the latest technologies.

ESTABLISHED IN 2007, PACKSERV IS AUSTRALIA'S LEADING PACKAGING MACHINERY AND TECHNICAL SERVICES PROVIDER.

Packserv is a proud Australian manufacturer of packaging machines for small and medium sized enterprises. Our range includes machines for volumetric filling, capping and container handling functions including conveyors in-feed and out-feed tables.

Operating Australia wide, Packserv also specialises in providing rentals for on-demand packaging equipment for filling, capping, labelling, printing, coding and induction sealing.
