

kp Elite®

Unique, Recyclable MAP Solution

kp Elite® offers this modified atmosphere packaging (MAP) solution for fresh protein that delivers end-to-end sustainability. This award-winning product is made with up to 100% recycled PET (rPET), which is recyclable, highly efficient, reduces food waste and extends shelf life.

Packer/Processor Benefits

- ↻ High barrier lidding film
- ↻ Seals through contamination
- ↻ Reduced rework and repacking
- ↻ Reduced sealing time and temperature
- ↻ Hermetic seal, reduced leakage

Retailer Benefits

- ↻ Exceptional clarity (only 5% haze)
- ↻ Very low haze shrink lidding film
- ↻ Improved presentation
- ↻ Reduced leakage
- ↻ Extended shelf life

Sustainability Benefits

- ↻ Made with up to 100% post-consumer recycled PET
- ↻ Very low carbon footprint
- ↻ Recyclable tray (mono material)*
- ↻ Maximum strength with minimum weight
- ↻ Reduced food waste

*Easily sorted and recycled where the right infrastructure is in place

Made with
Tray2Tray®

kp Elite®

Technical Information

LINtop® PE Shrink Lidding Film

-  Securely seals at high speeds
-  Allows full colour printing
-  High and low shrink rate films available
-  High anti fog properties
-  High barrier film - thickness 25µ and 30µ

rPET kp Elite® Tray

-  Available in a number of colours and sizes
-  Patented kp Elite® sealing system
-  No PE liner
-  Mono material, recyclable PET tray

Made with

Tray2Tray®

The kp Tray2Tray® programme is an initiative to recover used food packaging and turn it back into more of the same. kp is working with the entire value chain to generate and drive continued demand and ensure a constant supply of post-consumer recycled plastics.

Corporate Information

-  Food Packaging
-  14 countries worldwide
-  21 manufacturing sites
-  Producing plastics in rigid films, rigid trays and flexible films
