

# kp Evolve™

## Vacuum Skin Packed Solution

kp Evolve™ is a vacuum skin tray packaging solution that uses up to 100% post-consumer recycled PET (rPET). It also preserves taste and texture and extends shelf life. kp Evolve™ offers a versatile and compact footprint for easy single packing and hanging tabs for vertical display options. Perfect for fresh red meat!

### Packer/Processor Benefits

- ↻ High barrier lidding film
- ↻ Shallow packs for improved transport efficiency
- ↻ Compatible with a range of sealing machines
- ↻ Puncture resistant film

### Retailer Benefits

- ↻ Enhanced shelf presentation
- ↻ Improved product visibility (transparency)
- ↻ Easy peel opening
- ↻ Improved consumer experience with taste and texture

### Sustainability Benefits

- ↻ Made with up to 100% post-consumer recycled PET
- ↻ Reduced food waste
- ↻ Extended shelf life
- ↻ Transport efficient

Made with

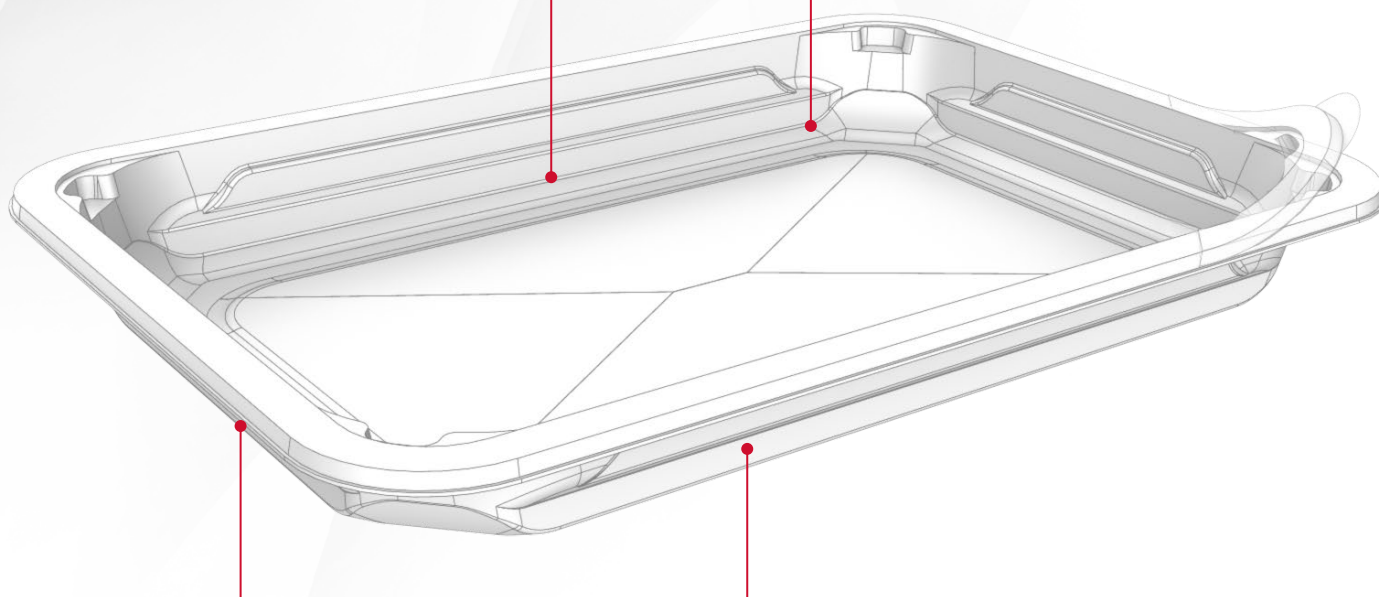

**Tray2Tray™**

# kp Evolve™

## Technical Information

### LINtop® PE HB Skin

- For use on all skin tray sealing equipment
- Excellent seal strength for longer shelf life
- High barrier skin film
- Thickness between 80µ and 150µ

### rPET/PE or PET/PE Tray

- Available in a number of colours and sizes
- Easy peel opening
- Made with up to 100% post-consumer recycled PET

Made with

**Tray2Tray™**

The kp Tray2Tray™ programme is an initiative to recover used food packaging and turn it back into more of the same. kp is working with the entire value chain to generate and drive continued demand and ensure a constant supply of post-consumer recycled plastics.

## Corporate Information

- Food Packaging
- 14 countries worldwide
- 20 manufacturing sites
- Producing plastics in rigid films, rigid trays and flexible films
