

Result with a smile keeps our customers satisfied

VH Vertical Packaging was founded in 1998 and since that time there has been a steady growth.

Refurbishing of used high end vertical packaging machines was our main activity in the beginning. We still refurbish over 30 machines every year! But... time flies.

Our focus on new Centurion vertical packaging machines changes the company from a small and flexible supplier into an even more flexible but very professional one-stop-shop vertical packaging specialist. High quality machines, fair pricing and best service are benefits for everyone. In Weert (NL) you can find our modern factory, from where we sell, build, service and maintain our machines worldwide. Today we have machines everywhere and our priority is to keep the customers satisfied in the first place.

Centurion first class product

- Centurion SI and SC, full equipped, suitable for packaging of all your fresh and frozen food products.
- Sealsystem PTC or Heatseal, combination of both is possible as an option.
- Big range of sealjaws available, customized for your product or application.
- Very high sealpressure to ensure a safely closed seal.
- The in-house developed control system guarantees a reliable packaging machine to match with all modern weighing- and dosing systems.
- The components used in our machines are first class products. This is the only way to guarantee highest uptime combined with lowest operational costs.

A perfect machine for a fair price

VH Vertical Packaging gives used machines a second life

We started in 1994 with refurbishment of used vertical packaging machines. The machines were prepared for a second life in our workshop, electric, optical and mechanical.

VH Vertical Packaging never stopped refurbishing as we have both new and used machines in our program. It is a kind of craftsmanship in our modern company. In Weert (NL) you can find our modern factory, from where we built, refurbish, service and maintain our machines worldwide. Today we have machines everywhere and our priority is to keep the customers satisfied in the first place. We call this result with a smile!

Sustainability doesn't have to be expensive

Smart investing in efficiency

Do you need a premium vertical packaging machine, high quality but you don't want to invest the amount of money for a Centurion or Velteko? VH Vertical Packaging has over 25 used GEA/Aquarius machines on stock that we can deliver as a newly refurbished machine.

Complete refurbishing of the machine

Over 25 used machines on stock

Discover the many possibilities

We only refurbish servo driven GEA/Aquarius machines. Your present machine needs an upgrade or you need to replace it, what can we do? Is your control system not up to date anymore? No problem for VH Vertical Packaging.

- Complete refurbishing of the machine, including control system. We use the same control system as in our Centurion SI/SC machines (Sigmatek®). The machine is as new when we deliver it. Same warranty as a new machine.
- Partly refurbishing, customer decides together with us what he wants. Custom made solution and always clear view on costs.
- Replacement of control system. Relatively young GEA/Aquarius machines with a control system that is not up to date or even not serviceable can get a complete new Sigmatek® control system. After replacing the control system of the machine is 100% up to date and can produce for years without any problem. Cost effective and very popular as changed more than 100 control systems until now.

A second life pays off

Attractive proposal, top quality at moderate prices. Count on 60% of the price of a premium vertical packaging machine. Please ask for all our possibilities, or check our workshop to investigate how we work. You are welcome.

Almost 25 years of experience

Replacement of control system
