

At Asset Packaging Machines, we are committed to the success of Australian businesses from start-ups moving from manual to semi-automated filling, through to fully automated commercial filling lines.

Our steps for ensuring your success:

Step 1— Enquiry

We provide machinery for customers from food & beverage, pharmaceutical, chemical, and cosmetics industries. We *work with you* to determine the best machinery option based primarily on your output requirements, production floor layout, production needs, and your product(s) types and container specifications (e.g. volume, size).

Step 2—Quotation

We work with your financing needs from full purchase to lease-to-buy arrangements, and rental. We *request samples* of your various container and/or lid sizes and products (particularly if they contain particles or suspended solids) to determine that our formal quotation is accurate based on your particular needs.

Step 3—Production Floor Layout

This step is *optional* but particularly useful if you are working within a small production floor footprint or unsure of additional equipment that you may need either now or in the future that you are wanting to begin to plan for.

Step 4—Quotation Acceptance

Following acceptance of your finalised quotation and receipt of your deposit, manufacturing of your bespoke machinery commences with all technical details having now been clarified.

Step 5—Manufacturing Lead Time

As all our machinery is *custom made to your unique requirements and specifications*, our lead times vary between six to twelve (6-12) weeks.

Our bespoke machinery includes but *isn't limited to*:

- Stainless steel coatings to all wet parts ensuring protection of material against corrosive ingredients
- Specially engineered plastics ensuring increased lifetime and filling and/or cap tightening accuracy
- L- and U-shaped conveyors to fit within your particular floor layout
- Conveyor mountings for specialised product moving and capping
- Flameproof machinery and mechanics
- Many more—call or email to discuss your bespoke product needs

Step 6—Installation

We provide onsite installations with all machinery backed by our 12 month warranty and reputation for quality lasting across the decades.

Step 7—Ongoing After-Sales Support

Our quality service continues with ongoing *after-sales service and support* for all your Asset Packaging machinery *spare and change parts*. We work with you and your existing machinery to *provide ongoing support to your business with expanding product lines and/or production locations for the lifetime of your machine*. This ensures an ongoing relationship between your business and ours continues to help you succeed.
