Rebul Packaging Pty Ltd

PACKING PROTECTION

Honeycomb Board Panels

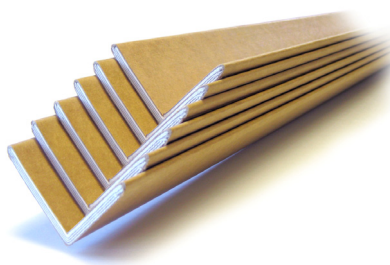

Its hexagonal structure provides extraordinary strength, for its light weight / low density of material. Honeycomb board is used across many industries, due to high bending strength, very high shock absorbency, good insulation properties and tons of loading strength.

Uses:

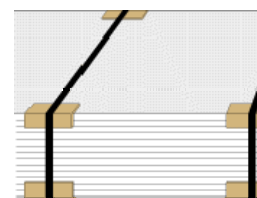

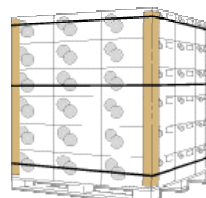

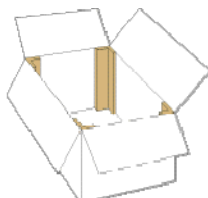

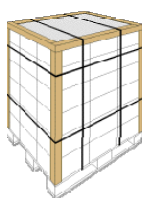

- Packaging filler/reinforcement
- Product Divider
- Office wall, whiteboard & door internal structure
- Weight Spreading
- Cushioning Material

Edgeboard

The quickest, simplest, most economical and environmentally friendly packaging solution for reinforcing delicate edges & corners of your valuables.

- Available in widths of 30mm - 80mm and in almost any length.
- Branding & Printing also available

Corner Protectors

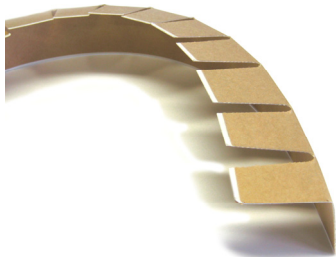

A really neat pre-cut application of edgeboard

- 50 x 50 x 200mm corner pieces
- Available in 500 pieces/carton or 27 cartons per pallet

Edge Wrap

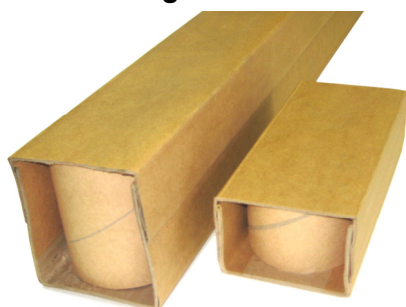

3 different shape cut designs, range from 30mm - 80mm width

Uses: A great way to ensure the protection of curved surfaces such as furniture and coils of materials.

Pallet & Edge Runners

Multiple alternatives to optimise your shipments with this alternative to wood.

The surface is reinforced giving high protection against humidity and they need no treatment making them ISPM15 compliant.

Available with self adhesive strip to secure to the bottom of your cartons.

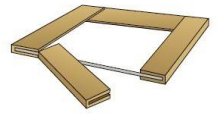

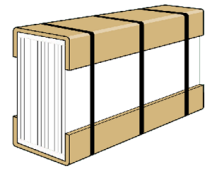

U-Profiles

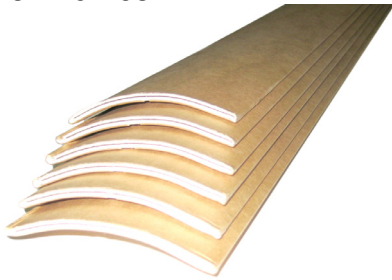

Designed to protect surfaces from scratches and transport damage, without adding extra volume or weight to the load. Branding & Printing also available

Uses: Suitable for multiple applications i.e. doors, windows, table tops, panels, pipes, profiles, etc.

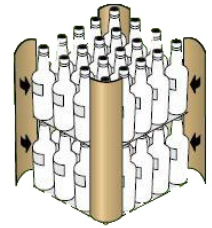

C-Profiles

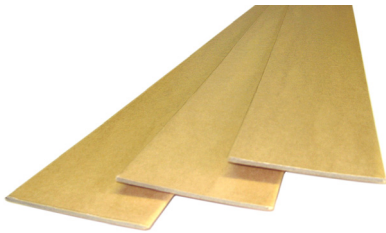

Protecting the edges of difficult round products

Commonly used for bottles, cans, drums, barrels, paper rolls, textiles, furniture, etc.

Width: 85 or 100 mm
Thickness: 2-5 mm
Length: 50-3000 mm

Flatboard

Designed to replace materials like hardboard, MDF and chipboard, which are hard to recycle.

Due to its strength, size and quality, flatboard is a product with endless possibilities, or dividing, reinforcing & protecting.

Also available in rolls for possible automatic use. When many different lengths are needed, cutting from a roll minimises waste.

Slip Sheets

Load more goods without bulky pallets.

Also known as transfer sheets, divider sheets, tear sheets, slip sheets are extremely tear - and moisture-resistant.

Uses: a substitute for traditional pallets or as divider sheets.

Dunnage Bags

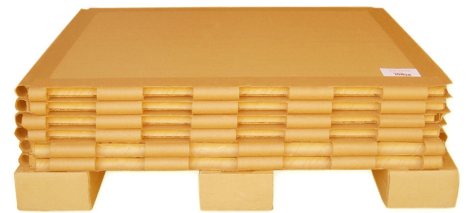

The quick, convenient and cost-effective way to secure your cargo in transit.

Uses: In containers, trailers, trains and ships to act as a cushion, protect loads against impact, brace the load and prevent movement.

Our fast-filling re-usable valve allows the re-use of the bags.

BOXES & CRATES

STRONG

SIMPLE

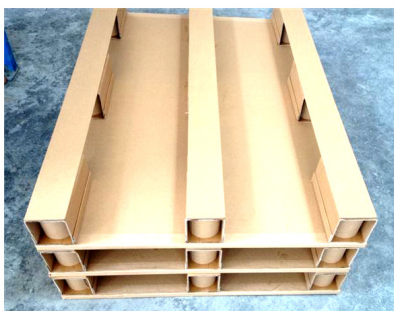

VERSATILE

RECYCLABLE

PALLETS

Our Honeycomb Pallet is an excellent alternative for wood, plastic or other pallets for many reasons, some include:

- Capacity for several tons
- 100% Recyclable
- Lightweight
