

Adhesives for Aseptic Packaging

BEARDOW **ADAMS**™

Unique Adhesives

Cap it with our Advanced Adhesives

Hot Melts for Aseptic Packaging

Food and drink companies across the globe keep aseptic packaging safe and secure with our range of cap fixing, straw attachment, and packaging hot melt adhesives.

Uniquely formulated to provide **excellent pot stability** and **clean running performance**, our adhesives help to reduce operating costs by increasing **production uptime**, lowering **maintenance costs**, and reducing **material waste**.

And because container integrity is paramount, our adhesives are specifically designed to provide a high-strength bond, at both cold and warm temperatures, ensuring products pass safely through the distribution chain without spilling a drop!

Our latest innovation, BAMFutura™ 55OB is a cap fixing glue that will fluoresce when exposed to UV light, further enhancing product assurance and productivity. It is joined by another recent development, BAMFutura 43VE a vegan safe grade that meets the growing demand for eco-friendly products.

Available with BRCGS* food approvals, customers can rely on our adhesives to keep their products safe and their brand reputation intact.

Adhesive Grades

Product	Application	Special Features	Colour
BAMFutura 43VE	Straw attachment / packaging	Vegan safe. *Available with BRCGS.	Water white
BAMFutura 51	Straw attachment / packaging	Excellent versatility. *Available with BRCGS.	Water white
BAMFutura 55OB	Cap fixing	Optical brightener technology	Water white

Aseptic Hot Melt Adhesive Applications

Cap Fixing

Adhesives are used to locate and hold the cap in position and to allow the carton to be opened.

Straw Attachments

Adhesives bond the straw wrapper to the polyethylene coated carton board.

Packaging

Carton, case sealing and tray erection are standard applications used to transport, store and present products.
