SLIM4 PAPER & PACKAGING

Paper & Packaging is a dynamic industry: the availability of materials, parts and SKUs paired with the everchanging market demands puts pressure on companies.

Given the thousands of SKUs, current supply chain disruptions and longer lead times, it is vital that the inventory is managed effectively to ensure customers continue to enjoy availability and increased service levels. As a result, paper & packaging businesses require specialised inventory optimisation solutions to build more effective supply chains.

With over 1200 customers across the world including some of the biggest paper & packaging businesses such as Moonen Packaging, Premier Paper & Kaiser + Kraft, we help supply chain teams maximise customer satisfaction while simultaneously minimising supply chain costs. Through utilising our inventory optimisation software, Slim4, coupled with our extensive paper & packaging experience, we ensure that our customers attain their inventory goals: the right stock, at the right place, at the right time!

FORECASTING

"Slim4 provides us with greater insight and we can now anticipate and respond to problems much faster."

sappi

Peter Conings

"Backorders have been almost entirely eliminated while the stock turn increased by 20%."

Roland van Bussel

Headquartered in Brussels, Sappi Europe is the leading European producer of coated graphic paper as well as packaging and speciality papers. Sappi has been able to reserve the capacity of machines 2-6 months in advance, in turn achieving an enormous increase in availability.

Moonen Packaging is a leading packaging wholesaler with more than 65 years of experience. Moonen has been using Slim4 to manage their inventory for more than 10 years, and over this time, the number of backorders have been almost entirely eliminated while stock turn increased by 20%.

Our customers are active across a range of sectors including consumer products, paper, stationary, packaging and office supplies:
