Customized Design to
Outlast and Outperform
XP Steel Light Dump Body

Custom Features

Ducktail:

Retains the load on ramp grades up to 10 % and higher. This design also maintains correct load distribution within the specifications of the truck OEM.

Steel Liner:

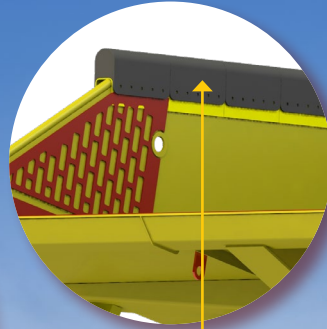

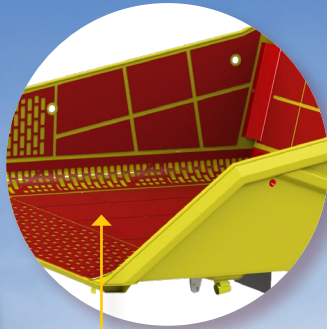

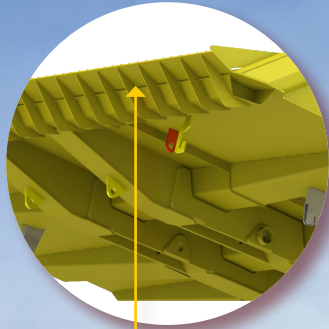

Absorbs impact and protects the truck structure from the sliding wear. Designed to be easily and securely fitted to the dump body.

Side Wall Extension:

Increases volumetric capacity of existing dump bodies.

Rubber: Designed to handle tough impact loads while resisting abrasion. Helps extend the body system's life.

Side Walls: Steel plate or hollow alloy bar for top-rail. Parallel or expanding taper geometry for side-walls. Provides extra reinforcement and preventing material build-up.

XP Design

- **X**tra **P**ayload
- **X**tra **P**erformance
- **X**tra **P**roductivity
